Lorenzo Ghiberti Nel Suo Tempo Due Volumi:

Giotto the Painter. Volume 2: Works Michael Viktor Schwarz, 2023-04-17 The paintings examined and contextualised in this volume are those secured for Giotto through early written sources These sources also help to reconstruct the sequence of his works and artistic inventions as is plausible in the context of media culture in the decades around and after 1300 while Giotto was spiritually and intellectually formed in the sphere of the Florentine Dominicans his artistic path began in Rome in the shadow of the Curia The breakthrough to his own artistic concept came immediately before and during his work in Padua In addition to prominent churchmen ecclesiastical institutions and the King of Naples his clients were predominantly members of Italy's urban and financial elites The adoption and further development of his inventions by other especially Sienese painters pressured him in his later years to try new approaches again

Giotto the Painter. Volume 1-3 Michael Viktor Schwarz, 2023-04-17 Vol 1 Life Giotto 1334 is the first European artist about whom it is possible to write following the schema of life and work The situation of the sources however is complicated On Giotto's life there are on the one hand biographical accounts from the mid fourteenth century onwards that responded to various ideological requirements patriotism humanism Renaissance ideology cult of the artist on the other there is extensive documentary material from Giotto's lifetime which seems to reflect less the biography of an artist than that of a bourgeois businessman resolutely climbing the social ladder The present volume focuses on this second aspect of the Giotto figure's double life relating it to the form of existence of the pre modern artist Vol 2 Works The paintings examined and contextualised in this volume are those secured for Giotto through early written sources These sources also help to reconstruct the sequence of his works and artistic inventions as is plausible in the context of media culture in the decades around and after 1300 while Giotto was spiritually and intellectually formed in the sphere of the Florentine Dominicans his artistic path began in Rome in the shadow of the Curia The breakthrough to his own artistic concept came immediately before and during his work in Padua In addition to prominent churchmen ecclesiastical institutions and the King of Naples his clients were predominantly members of Italy's urban and financial elites The adoption and further development of his inventions by other especially Sienese painters pressured him in his later years to try new approaches again Vol 3 Survival Giotto is considered by many to be the founder of modern painting This thesis is discussed and modified in the present volume on an empirical basis What emerges is that Giotto's impact cannot be reduced simply to the introduction of the study of nature Rather his art was involved in the development of pictorial idioms that were attuned to the skills and interests of their audiences The new approaches in his painting contributed in particular to the possibility of examining and communicating psychological narrative and allegorical content of great complexity outside the media of language and text which not only changed the face of European art but certainly contributed to the intellectual opening of Western societies

of life and work The situation of the sources however is complicated On Giotto's life there are on the one hand biographical accounts from the mid fourteenth century onwards that responded to various ideological requirements patriotism humanism Renaissance ideology cult of the artist on the other there is extensive documentary material from Giotto's lifetime which seems to reflect less the biography of an artist than that of a bourgeois businessman resolutely climbing the social ladder The present volume focuses on this second aspect of the Giotto figure's double life relating it to the form of existence of the pre-modern artist

Giotto the Painter. Volume 3: Survival Michael Viktor Schwarz, 2023-04-17 Giotto is considered by many to be the founder of modern painting This thesis is discussed and modified in the present volume on an empirical basis What emerges is that Giotto's impact cannot be reduced simply to the introduction of the study of nature Rather his art was involved in the development of pictorial idioms that were attuned to the skills and interests of their audiences The new approaches in his painting contributed in particular to the possibility of examining and communicating psychological narrative and allegorical content of great complexity outside the media of language and text which not only changed the face of European art but certainly contributed to the intellectual opening of Western societies

Renaissance Vision from Spectacles to Telescopes Vincent Ilardi, 2007 Deals with the history of eyeglasses from their invention in Italy ca 1286 to the appearance of the telescope three centuries later By the end of the 16th century eyeglasses were as common in western and central Europe as desktop computers are in western developed countries today Eyeglasses served an important technological function at both the intellectual and practical level not only easing the textual studies of scholars but also easing the work of craftsmen small business During the 15th century two crucial developments occurred the ability to grind convex lenses for various levels of presbyopia and the ability to grind concave lenses for the correction of myopia As a result eyeglasses could be made almost to prescription by the early 17th century

Origins, Imitation, Conventions James S. Ackerman, 2024-03-19 Twelve studies by eminent art historian James S Ackerman This collection contains studies written by art historian James Ackerman over the past decade Whereas Ackerman s earlier work assumed a development of the arts as they responded to social economic political and cultural change his recent work reflects the poststructural critique of the presumption of progress that characterized Renaissance and modernist history and criticism In this book he explores the tension between the authority of the past which may act not only as a restraint but as a challenge and stimulus and the potentially liberating gift of invention He examines the ways in which artists and writers on art have related to ancestors and to established modes of representation as well as to contemporary experiences The origins studied here include the earliest art history and criticism the beginnings of architectural drawing in the Middle Ages and Renaissance Leonardo Da Vinci s sketches for churches the first in the Renaissance to propose supporting domes on sculpted walls and piers and the first architectural photographs Imitation refers to artistic achievements that in part depended on the imitation of forms established in practices outside the fine arts such as ancient Roman rhetoric and print media Conventions like language facilitate communication between the artist and viewer but are both more universal understood across cultures and more fixed resisting variation that might diminish their clarity The three categories are closely linked throughout the book as most acts of representation partake to some degree of all three
