Elliot and a diverse group of people as they gather in her sitting room to learn about mindfulness meditation from the wise and witty Buddhist monk Rose has invited into her home Brimming with inspiring insights and peppered with humour I Met a Monk introduces mindfulness meditation and the simple core tenets of Buddhist teaching showing how we can easily apply them to 21st century life Set out as an 8 week course each chapter ends with a concise summary of key points and recommended exercises to help put the suggestions into practice Part autobiography part self help book I Met a Monk forms a series of workshops structured into eight chapters that cover the weekly discussions held between a Buddhist monk Rose and a group of men and women including a student a hairdresser a doctor and a grandmother where they talk about the Buddhist way to finding happiness freedom and peace I hope that as you read this book you too may feel you are taking part and that it may be as life changing for you as it was for me Rose Elliot **The Devil and Two** Stephen Stewart,2020-10-26 Einstein showed us that time is an illusion relative to one's speed through space and speed therefore time is subject to the force of gravity This is the true paradox of time Time is measured backwards and compelled inescapably by gravity to contract time will end where it began at the centre of the universe Until then we will dream of a brighter future *Temporal Experience* Giuliano Torrenco,2024-09-19 Many physical theories suggest that time does not pass yet temporality deeply permeates our experience We perceive change and movement we are aware of living in the present of the constant flux of our sensations and thoughts and of time itself flowing In *Temporal Experience* Torrenco considers the core facts of temporal experience and their interconnections ultimately defending the atomist dynamic model of temporal experience The book critically examines prevalent theories of experience of change succession and passage of time both in philosophy and psychology Each chapter contributes to the construction of the atomist dynamic model Experience of change and movement are explained through mental events that present virtually instantaneous movement and change Torrenco challenges the common belief in the perception of presentness and proposes an error theory based on narrative cognition The experience of succession is elucidated through the concept of an overarching phenomenology arguing against the tendency to overstate the phenomenal continuity of experience Finally the experience of the passage of time is approached through the non-representationalist theory of the phenomenal modifier and the book concludes by discussing the surprising consequences of applying the experiential model defended to the scientific image of our existence in time as a sequence of physical events
