Lost Temple Of Java:

The Lost Temple of Java Phil Grabsky, 1999 Borobudur in Central Java is the world's largest Buddhist temple. For over 1000 years the awe-inspiring structure lay deserted in the jungle. No one knows exactly who built it or when why it was suddenly abandoned just before completion and why did it remain hidden for so long. This book like Raffles seeks to solve the mystery of Borobudur. This book is a real surprise a fantastic account of the infamous Raffles and his discovery of the great temple in Java.

The Lost Temple of Java, 1998 Borobudur in Central Java is unique. In the shape of a pyramid with four square terraces leading to three circular ones this extraordinary building is covered with 3 miles of carvings.

A Heritage of Ruins William R. Chapman, 2013-07-31 The ancient ruins of Southeast Asia have long sparked curiosity and romance in the world's imagination. They appear in accounts of nineteenth century French explorers as props for Indiana Jones adventures and more recently as the scene of Lady Lara Croft's fantastical battle with the forces of evil. They have been featured in National Geographic magazine and serve as backdrops for popular television travel and reality shows. Now William Chapman's expansive new study explores the varied roles these monumental remains have played in the histories of Southeast Asia's modern nations. Based on more than fifteen years of travel research and visits to hundreds of ancient sites *A Heritage of Ruins* shows the close connection between ruins conservation and both colonialism and nation building. It also demonstrates the profound impact of European derived ideas of historic and aesthetic significance on ancient ruins and how these continue to color the management and presentation of sites in Southeast Asia today. Angkor Pagan Bagan Borobudur and Ayutthaya lie at the center of this cultural and architectural tour but less visited sites including Laos's stunning Vat Phu the small temple platforms of Malaysia's Lembah Bujang Valley the candi of the Dieng Plateau in Java and the ruins of Mingun in Burma and Wiang Kum Kam near Chiang Mai in northern Thailand are also discussed. All share a relative isolation from modern urban centers of population sitting in park like settings serving as objects of tourism and as lynchpins for local and even national economies. Chapman argues that these sites also remain important to surrounding residents both as a means of income and as continuing sources of spiritual meaning. He examines the complexities of heritage efforts in the context of present day expectations by focusing on the roles of both outside and indigenous experts in conservation and management and on attempts by local populations to reclaim their patrimony and play a larger role in protection and interpretation. Tracing the history of interventions aimed at halting time's decay Chapman provides a chronicle of conservation efforts over a century and a half highlighting the significant part foreign expertise has played in the region and the ways that national programs have in recent years begun to break from earlier models. The book ends with suggestions for how Southeast Asian managers and officials might best protect their incomparable heritage of art and architecture and how this legacy might be preserved for future generations.

The Mini Adventures of a Young Raccoon and You! Glenn Thompson, 2022-09-27 A young raccoon named Loon was looking for something exciting to do. His mother said he could not

play outside and his father said he needed to use his head Loon thought for the longest of times and then he said I know I need to have a fantastic adventure with you So you have been selected and chosen to go on a series of adventures with the incredible and slightly absurd racoon called Loon These are the mad and spectacular adventures of a young racoon who knows the greatest of toys and games is a limitless imagination Now you are ready to enter the Loon s weird and wacky world as an explorer a spy a sheriff a diplomat a knight a secret agent a guardian of the world and much more A History of the World in 100 Objects Neil MacGregor,2011-10-06 This book takes a dramatically original approach to the history of humanity using objects which previous civilisations have left behind them often accidentally as prisms through which we can explore past worlds and the lives of the men and women who lived in them The book s range is enormous It begins with one of the earliest surviving objects made by human hands a chopping tool from the Olduvai gorge in Africa and ends with an object from the 21st century which represents the world we live in today Neil MacGregor s aim is not simply to describe these remarkable things but to show us their significance how a stone pillar tells us about a great Indian emperor preaching tolerance to his people how Spanish pieces of eight tell us about the beginning of a global currency or how an early Victorian tea set tells us about the impact of empire Each chapter immerses the reader in a past civilisation accompanied by an exceptionally well informed guide Seen through this lens history is a kaleidoscope shifting interconnected constantly surprising and shaping our world today in ways that most of us have never imagined An intellectual and visual feast it is one of the most engrossing and unusual history books published in years **Magicians of the Gods** Graham Hancock,2015-11-10 Graham Hancock s multi million bestseller Fingerprints of the Gods remains an astonishing deeply controversial wide ranging investigation of the mysteries of our past and the evidence for Earth s lost civilization Twenty years on Hancock returns with the sequel to his seminal work filled with completely new scientific and archaeological evidence which has only recently come to light Near the end of the last Ice Age 12 800 years ago a giant comet that had entered the solar system from deep space thousands of years earlier broke into multiple fragments Some of these struck the Earth causing a global cataclysm on a scale unseen since the extinction of the dinosaurs At least eight of the fragments hit the North American ice cap while further fragments hit the northern European ice cap The impacts from comet fragments a mile wide approaching at more than 60 000 miles an hour generated huge amounts of heat which instantly liquidized millions of square kilometers of ice destabilizing the Earth s crust and causing the global Deluge that is remembered in myths all around the world A second series of impacts equally devastating causing further cataclysmic flooding occurred 11 600 years ago the exact date that Plato gives for the destruction and submergence of Atlantis The evidence revealed in this book shows beyond reasonable doubt that an advanced civilization that flourished during the Ice Age was destroyed in the global cataclysms between 12 800 and 11 600 years ago But there were survivors known to later cultures by names such as the Sages the Magicians the Shining Ones and the Mystery Teachers of Heaven They travelled the world in their great ships

doing all in their power to keep the spark of civilization burning They settled at key locations Gobekli Tepe in Turkey Baalbek in the Lebanon Giza in Egypt ancient Sumer Mexico Peru and across the Pacific where a huge pyramid has recently been discovered in Indonesia Everywhere they went these Magicians of the Gods brought with them the memory of a time when mankind had fallen out of harmony with the universe and paid a heavy price A memory and a warning to the future For the comet that wrought such destruction between 12 800 and 11 600 years may not be done with us yet Astronomers believe that a 20 mile wide dark fragment of the original giant comet remains hidden within its debris stream and threatens the Earth An astronomical message encoded at Gobekli Tepe and in the Sphinx and the pyramids of Egypt warns that the Great Return will occur in our time *Lieutenant General Sir Samuel Auchmuty, 1756-1822* John D. human brain Shows how human writing in its original hieroglyphic form was a direct response to the divine sound patterns of sacred sites Explains how ancient hero myths from around the world relate to divine acoustic science and formed the source of religion The Earth resonates at an extremely low frequency Known as the Schumann Resonance this natural rhythm of the Earth precisely corresponds with the human brain s alpha wave frequencies the frequency at which we enter into and come out of sleep as well as the frequency of deep meditation inspiration and problem solving Sound experiments reveal that sacred sites and structures like stupas pyramids and cathedrals also resonate at these special frequencies when activated by chanting and singing Did our ancestors build their sacred sites according to the rhythms of the Earth Exploring the acoustic connections between the Earth the human brain and sacred spaces David Elkington shows how humanity maintained a direct line of communication with Mother Earth and the Divine through the construction of sacred sites such as Stonehenge Newgrange Machu Picchu Chartres Cathedral and the pyramids of both Egypt and Mexico He reveals how human writing in its original hieroglyphic form was a direct response to the divine sound patterns of sacred sites showing how for example recognizable hieroglyphs appear in sand patterns when the sacred frequencies of the Great Pyramid are activated Looking at ancient hero legends those about the bringers of important knowledge or language Elkington explains how these myths form the source of ancient religion and have a unique mythological resonance as do the sites associated with them The author then reveals how religion including Christianity is an ancient language of acoustic science given expression by the world s sacred sites and shows that power places played a profound role in the development of human civilization
