Predictive Sentencing Jan W de Keijser, Julian V Roberts, Jesper Ryberg, 2019-05-16 Predictive Sentencing addresses the role of risk assessment in contemporary sentencing practices Predictive sentencing has become so deeply ingrained in Western criminal justice decision making that despite early ethical discussions about selective incapacitation it currently attracts little critique Nor has it been subjected to a thorough normative and empirical scrutiny This is problematic since much current policy and practice concerning risk predictions is inconsistent with mainstream theories of punishment Moreover predictive sentencing exacerbates discrimination and disparity in sentencing Although structured risk assessments may have replaced gut feelings and have now been systematically implemented in Western justice systems the fundamental issues and questions that surround the use of risk assessment instruments at sentencing remain unresolved This volume critically evaluates these issues and will be of great interest to scholars of criminal justice and criminology

Assessing the Youthful Offender Robert D. Hoge, D.A. Andrews, 2013-06-29 Our society's preoccupation with crime and fear of crime appears to have shifted its focus to the juvenile offender Both electronic and print media continuously warn us that juvenile offenders are increasingly younger and more virulent The demographics of our population suggest that there will only be more juvenile offenders to fear in the near future All of these concerns arise in a social climate that is characterized by an ever increasing demand for stronger retributive measures against the offender The belief that only harsh justice will protect us from the ravages of juveniles has become dominant Increasingly perceptions and politics rather than scientific data dominate policy making with regard to youthful offenders In *Assessing the Youthful Offender* Issues and Techniques Robert D Hoge and D A Andrews make a restrained rational and ultimately persuasive argument for the use of standardized psychological assessments in the effective management of youth within juvenile justice systems They clarify how what we already know about the cause and management of youthful criminal activity can be incorporated into standardized testing and that the information obtained from testing can improve the administration of criminal justice Moreover this information is useful whatever the theoretical biases of those who administer the justice system The efficiency of policies of either retribution deterrence or rehabilitation is only enhanced by reliance on data

Dangerous Offenders Mark Brown, John Pratt, 2002-01-04 This highly controversial new book considers how the dangerous offender has become such a figure of collective anxiety for the citizens of rationalised Western societies The authors consider ideas of danger and social threat in historical perspective legal responses to violent criminals attempts to predict dangerous behaviour why particular groups such as women remain at risk from violent crime This inspired collection invites us to rethink the received wisdom on dangerous offenders and will be of interest to students and scholars in

the fields of criminology and the sociology of Risk The Contexts of Juvenile Justice Decision Making Michael J. Leiber, 2003-08-14 Explores the contexts of judges decision making in juvenile courts that incarcerate disproportionately more minorities than whites An in depth examination of the contextual nature of decision making and the causes of disproportionate minority confinement in four relatively homogenous juvenile courts in Iowa this book explores the subjective social psychological processes of juvenile court officers and the factors that influence those processes Iowa although a state with a predominantly white population has one of the highest minority incarceration rates for juveniles Michael J Leiber focuses on the relationships between adherence to correctional orientations such as retribution and rehabilitation and decision makers views concerning race crime family and respect for authority with judgments and differential outcomes for youth Quantitative and qualitative methodologies are used to determine the extent to which correctional ideologies and decision makers stereotyping of minorities are fueled by a wide range of contingencies the impact of case processing and outcomes of whites African Americans and Native Americans and how it varies by jurisdiction a must not only for researchers but also for policy makers and practitioners Criminal Justice Review This is a highly readable book that covers a topic of major importance in present day society As Leiber notes the role of decision makers attitudes is an important yet largely ignored variable and the qualitative portion of his study are an important contribution to the literature Randall G Sheldon University of Nevada at Las Vegas Supermax Sharon Shalev, 2013-05-13 This book examines the rise and proliferation of Supermaxes large prisons dedicated to holding prisoners in prolonged and strict solitary confinement in the United States since the late 1980s Drawing on unique access to two Supermax prisons and on in depth interviews with prison officials prison architects current and former prisoners mental health professionals penal legal and human rights experts it provides a holistic view of the theory practice and consequences of these prisons Given the historic uses of solitary confinement the book also traces continuities and discontinuities in its use on both sides of the Atlantic over the last two centuries It argues that rather than being an entirely new form of imprisonment Supermax prisons draw on principles of architecture surveillance and control which were set out in the early 19th century but which are now enhanced by the most advanced technologies available to current day prison planners and administrators It asks why a form of confinement which had been discredited in the past is now proposed as the best solution for dealing with difficult dangerous or disruptive prisoners and assesses the true costs of Supermax confinement Rethinking Risk Assessment John Monahan, 2001-03 Rethinking Risk Assessment tells the story of a pioneering investigation that challenges preconceptions about the frequency and nature of violence among persons with mental disorders and suggests an innovative approach to predicting its occurrence *Working with Women Offenders in the Community* Rosemary Sheehan, Gill McIvor, Chris Trotter, 2010-12-21 Though many more women offenders are supervised in the community than in custody much less is known about their needs and effective approaches to their supervision support and treatment Whilst there has been recent attention paid to responding to the

needs of women in prison negligible attention has been paid to women exiting prison or on community based orders and what is needed to work with them to reduce re offending or entry into prison Contributions to this book challenge policy makers and corrections systems to concentrate more on community provision for women offenders and resist popular calls for more punitive responses to all offenders women included Contributors come from a wide range of countries including Australia Canada UK and USA They argue that the criminogenic lens applied to women s offending must be gender responsive if systems are to be successful at addressing the disadvantage and risk associated with offending behaviour Working With Women Offenders in the Community builds on ideas presented in the editors previous book What Works With Women Offenders 2007 extending the focus particularly on women offenders in the community rather than in prison This book concentrates on women who have committed criminal offences and who may have been placed on probation or other community based court orders or who have been released from prison on parole It discusses the work done by professional workers including probation officers community corrections officers and specialist case managers in areas such as drug treatment housing mental health or employment programmes This book will be of interest to professional probation officers case managers drug treatment workers and others who work with women offenders It will also be essential reading for students of criminology social work psychology sociology and other disciplines who have an interest in women offenders

Past Richard S. Frase,Julian V. Roberts,2019 All modern sentencing systems in the US and beyond consider the offender s prior record to be an important determinant of the form and severity of punishment for subsequent offences Repeat offenders receive harsher punishments than first offenders and offenders with longer criminal records are punished more severely than those with shorter records Yet the vast literature on sentencing policy law and practice has generally overlooked the issue of prior convictions even though this is the most important sentencing factor after the seriousness of the crime In Paying for the Past Richard S Frase and Julian V Roberts provide a critical and systematic examination of current prior record enhancements under sentencing guidelines across the US Drawing on empirical data and analyses of guidelines from a number of jurisdictions they illustrate different approaches to prior record enhancements and the differing outcomes of those approaches Roberts and Frase demonstrate that most prior record enhancements generate a range of adverse outcomes at sentencing Further the pervasive justifications for prior record enhancement such as the repeat offender s assumed higher risk of reoffending or greater culpability are uncertain and have rarely been subjected to critical appraisal The punitive sentencing premiums for repeat offenders prescribed by US guidelines cannot be justified on grounds of prevention or retribution Shining a light on a neglected but critically important topic Paying for the Past examines the costs of prior record enhancements for repeat offenders and offers model guidelines to help reduce racial disparities and reallocate criminal justice resources for jurisdictions who use sentence enhancements *A Century of Social Work and Social Welfare at Penn*

The Black Child-Savers Geoff K. Ward, 2022-12-22 During the Progressive Era a rehabilitative agenda took hold of American juvenile justice materializing as a citizen and state building project and mirroring the unequal racial politics of American democracy itself Alongside this liberal manufactory of citizens a parallel structure was enacted a Jim Crow juvenile justice system that endured across the nation for most of the twentieth century In *The Black Child Savers* the first study of the rise and fall of Jim Crow juvenile justice Geoff Ward examines the origins and organization of this separate and unequal juvenile justice system Ward explores how generations of black child savers mobilized to challenge the threat to black youth and community interests and how this struggle grew aligned with a wider civil rights movement eventually forcing the formal integration of American juvenile justice Ward's book reveals nearly a century of struggle to build a more democratic model of juvenile justice an effort that succeeded in part but ultimately failed to deliver black youth and community to liberal rehabilitative ideals At once an inspiring story about the shifting boundaries of race citizenship and democracy in America and a crucial look at the nature of racial inequality *The Black Child Savers* is a stirring account of the stakes and meaning of social justice

general reader *The Juvenile Offender* Robert D. Hoge, 2012-12-06 This book provides a discussion of advances in our understanding of the juvenile offender. These derive from psychological and criminological theory and research on the phenomenon of youth crime and from efforts on the part of social science researchers and practitioners to develop and evaluate new approaches to prevention and treatment. The theoretical and empirical advances relate first to analyses of the nature and extent of youth crime. This is reflected for example in various descriptive and classification systems developed for characterizing juvenile offenders. Significant advances are also being made in understanding the risk factors associated with youthful criminal activity as well as the processes linking the risk factors with antisocial behaviors. This understanding is based on theory and research relating to the correlates and causes of delinquency. The advances in our understanding of the nature, correlates and causes of juvenile crime are accompanied by progress in analyzing the treatment of youth in juvenile justice systems and in developing and evaluating alternative approaches to treatment. These efforts include research on decision making within juvenile justice systems and the development of screening and assessment tools. This also includes efforts to develop and evaluate effective prevention and treatment programs for use with youths involved in criminal activity and those at risk for this activity.
