relationship between the two Thus no theory solely can describe the relation between media and society The available evidences shows the connection between media and society are contextual across time and place and heterogeneous across societies and media type The following six perspectives summarizes the nexus between media and society Firstly Media created the notion of mass society secondly as critical school thought based on Marxist view media are capitalist controlled for suppressing the poor Thirdly media are functioning or dysfunction institution of society Fourthly media is a social conscience which constructs reality Fifthly media technology effects change in society Lastly media transformed the human history to the new stage called Information society In a true pluralist environment media has power to serve as a public sphere to control powerful groups the problem is media could be dominated by other powerful groups and may serve as suppression tool Media fail to represent all cultures cultural groups and individuals from the processes and the contents of media production if it is dominated by the oppressors This marginalization is continuing in the new media virtual world too Thus the media and society relations always needs research and critical understanding as their power functions and dysfunctions societies across time and geography as a societal phenomenon are very dynamic
