Pharis, David M. Reid, 2012-12-06 R P PHARIS and D M REID The idea of a separate Encyclopaedia volume dealing with the interrelations of plant hormones with factors in the environment of the plant and its organs and tissues originated with N P KEFFORD and we are most appreciative of the help and advice provided by Prof KEFFORD in the formative stages of this volume We have thus interpreted environment very broadly to include not only factors external to the plant e g gravity light temperature wind mechanical wounding water organism s including pollen and magnetic and electric stimuli but internal factors as well e g nutrients both inorganic and photoassimilate direction and time In our definition of hormonal effect or hormonal involvement we have asked our authors to take a broad approach and to examine not only phenomena that are mediated by the known plant hormones but to discuss as well a wide variety of processes and events where hormonal involvement is implied through more indirect analyses and observations The volume

begins with environmental factors internal to the plant R J WEAVER and J O JOHNSON thus examine hormones and nutrients their inter relationship in movement accumulation and diversion As one studies a plant during its rapid growth phase and later as maturation and aging proceed it becomes apparent that time is an environmental cue of great significance one which may exert a major influence via hormonal messages

Enzyme Engineering Lemual B. Wingard, 2012-12-06 The Soviet Union has had an active research and development program in the study and application of soluble and immobilized enzymes since about 1970 Therefore it was a natural consequence that an international conference should be held in the Soviet Union to focus on some of the developments that may lead to new and exciting practical applications of enzymatic catalysts in a variety of areas especially carbohydrate conversions medicine energy transduction and photochemistry The International Federation of Institutes for Advanced Study with its goal of focusing international scientific and technological expertise on world problems also has been very active in the area of enzyme engineering with a major effort during 1972-1977 in several of the sub areas covered in this volume The conference was held June 20-24 1978 in the city of Tbilisi in the Georgian SSR of the USSR under the title The Future of Enzyme Engineering Development The participants expressed a high sense of gratitude to the State Committee for Science and Technology and especially to the Georgian Academy of Sciences for their hospitality The services of the Soviet linguists in providing simultaneous translation between Russian and English and the brass band that played for the departing participants at the Tbilisi airport helped to make both the scientific and cultural parts of the conference memorable

Oxidative Stress and Redox Regulation in Plants, 2009-10-09 The field of redox is rapidly changing specifically in relation to plants where redox reactions are exacerbated compared to non photosynthetic organisms The development of proteomics has allowed the identification of hundreds of molecular targets of these systems and the recent discovery of glutaredoxin's ability to bind iron sulfur centers ISCs and to participate in ISC assembly in other apoproteins has provided many new insights This volume presents new research on oxidative stress in plants ranging from the production of reactive oxygen species or reactive nitrogen species to their accumulation their involvement in signal transduction and their degradation while also covering the links among oxidative stress and biotic and abiotic stresses Cutting edge reviews written from a broad range of scientific perspectives For over 40 years series has enjoyed a reputation for excellence Contributors internationally recognized authorities in their respective fields

Evolution and Function of Heterostyly Spencer C.H. Barrett, 2013-04-17 A century of research on heterostylous plants has passed since the publication of Charles Darwin's book The Different Forms of Flowers on Plants of the Same Species in 1877 summarizing his extensive observations and experiments on these complex breeding systems involving genetic polymorphisms of floral sex organs Since then heterostylous plants have provided a rich source of material for evolutionary biologists and today they represent one of the classic research paradigms for approaches to the study of evolution and adaptation The present book is the first modern

and comprehensive account of the subject In 10 chapters it is concerned with the evolution genetics development morphology and adaptive significance of heterostyly Broad syntheses of research on heterostyly as well as new theoretical ideas and experimental data are included *Physiological Plant Ecology II* Otto L. Lange, 2012-12-06 O L LANGE P S NOBEL C B OSMOND and H ZIEGLER In the original series of the Encyclopedia of Plant Physiology plant water relations and photosynthesis were treated separately and the connection between phenomena was only considered in special chapters O STOCKER edited Volume III Pflanze und Wasser Water Relations of Plants in 1956 and 4 years later Volume V Parts I and 2 Die CO₂ Assimilation The Assimilation of Carbon Dioxide appeared edited by A PIRSON Until recently there has also been a tendency to cover these aspects of plant physiology separately in most text books Without doubt this separation is justifiable If one is specifically interested for example in photosynthetic electron transport in details of photophosphorylation or in carbon metabolism in the Calvin cycle it is not necessary to ask how these processes relate to the water relations of the plant Accordingly this separate coverage has been maintained in the New Series of the Encyclopedia of Plant Physiology The two volumes devoted exclusively to photosynthesis are Volume 5 Photosynthesis I edited by A TREBST and M AVRON and Volume 6 Photosynthesis II edited by M GIBBS and E LATZKO When considering carbon assimilation and plant water relations from an ecological point of view however we have to recognize that this separation is arbitrary Annual Review of Plant Physiology and Plant Molecular Biology Russell L.
