European Union's Africa Policies Ms Daniela Sicurelli, 2013-03-28 The European Union EU is a key partner for African regional organizations and a major promoter of economic and political integration in the region Several studies have interpreted the EU's role in Africa as either a self interested hegemonic actor or as a value oriented normative power In this volume Daniela Sicurelli challenges these views by taking a closer look at Europe's policies towards Sub Saharan Africa in the area of peacekeeping trade and development and environmental protection Using fresh empirical evidence including interviews with both European and African officials she argues that the EU is far from becoming a unitary player in Africa Lacking a clear strategy and coherent normative framework the EU should be considered a multi level actor where national and supranational institutions have different interests and push forward contrasting views of what role Europe should play in Africa The ability of single institutions to frame an issue as requiring either intergovernmental or supranational procedures appears crucial for shaping the content of European Africa policies An original contribution to the growing literature on the EU as an international actor this book is extremely useful to scholars researchers and policy makers demanding critical work in the field of EU Africa policy **Land Use Simulation for Europe** John Stillwell, Henk J. Scholten, 2012-12-06 Land use

change is driven by a variety of forces including spatial policies formulated at supra national national regional and local levels The main focus of this book is to contextualise explain and illustrate a new methodology for simulating land use change in different parts of Europe It considers some of the more important causal factors and identifies state of the art approaches to modelling human and environmental systems and for evaluating and visualising alternative scenarios The last part of the

volume presents material from two case studies one from The Netherlands and one from Portugal of the implementation of a new simulation model called EuroScanner Audience This work will be of interest to researchers and practioners whose work involves geography simulation and modelling environmental planning spatial decision making the methodology of social sciences and economics **Simulations of Decision-Making as Active Learning Tools** Peter Bursens,Vincent

Donche,David Gijbels,Pieter Spooren,2018-03-05 This volume brings together both political and educational scientists While educational research literature has so far not systematically addressed the tool of simulations of decision making political scientists have hardly used insights from research on assessment or on motivation and interest of students Almost all political science publications on simulations merely discuss how to implement the tool in class and fall short of providing evidence of the effects on student outcomes such as increased interest and performance Combining the two disciplines is mutually enriching Political science benefits from state of the art educational science measuring and testing of the claims made by the proponents of simulations while educational sciences adds the systematic analysis of simulations of decision making to their list of empirical objects which also adds insights to the theories on the affective component of student learning It is the explicit aim of the volume to address how simulating decision making environments fosters learning Implications for research and practice regarding student learning are addressed in all chapters *Climate Technology Strategies 2* Pantelis

Capros,Panagiotis Georgakopoulos,Denise van Regemorter,Stef Proost,Tobias F.N. Schmidt,Henrike Koschel,Klaus Conrad,E.Lakis Vouyoukas,2012-12-06 Climate technology becomes more and more relevant in international environmental policy negotiations At the Kyoto conference binding emission reduction targets have been established for several regions of the world The major challenge is how to realize these reduction goals with minimum costs without generating new distributional and social difficulties The book analyses the macroeconomic structural and distributional impacts of greenhouse gas mitigation strategies for the EU and the member states Teaching European Union Politics Viviane

Gravey,Christopher Huggins,2024-01-18 Why do we teach EU politics What should EU politics students learn What are the practical approaches and techniques to teaching EU politics In response to these questions Teaching European Union Politics analyses the interdisciplinary nature of teaching this broad subject and reflects on a wide range of educational approaches It both advances the pedagogy and practice of teaching EU politics and provides practical support for those looking to adopt innovative and learner oriented techniques Political Simulation in the Age of AI Robert Beisler,2024-08-19 In the age of

artificial intelligence political decision making processes are facing an unprecedented transformation Policy simulations once used as tools for education and strategy development have evolved into powerful tools that have the potential to profoundly influence realpolitik But while these technologies offer new ways of analysing and forecasting they also raise pressing questions Can simulations truly capture the complexity of real world politics What influence do they have on democratic decision making And above all do they pose a threat to democracy In this book the author sheds light on the fascinating but

also worrying development of political simulations in the context of artificial intelligence With a critical eye he examines how these technologies could simplify political processes favour technocratic solutions and place power in the hands of a small group of experts In doing so he highlights the risks for transparency citizen participation and ultimately for democracy itself Political simulation in the age of AI a threat to democracy is a work for anyone who wants to understand and help shape the future of politics It analyses the opportunities and risks associated with the integration of AI into political processes and calls for the responsible use of these technologies in order to preserve democratic values Controlling Global Warming

Christoph Böhringer, Michael Finus, Carsten Vogt, 2002-01-01 Global warming is widely considered to be one of the most serious environmental problems for current and future generations **OECD Review of Agricultural Policies:**

Switzerland 2015 OECD, 2015-03-27 This report examines agricultural policies in Switzerland and makes a series of recommendations concerning regulation reducing trade barriers reducing direct payments to farmers implementing regional policies and addressing sustainability **Experiencing the European Union** Marco Brunazzo, Pierpaolo

Settembri, 2013-06-03 T00:00:00+02:00 The EU is a complex political and institutional machine with distinct procedures language and codes Its functioning is based on negotiations among a variety of actors at different levels local regional national supranational inter institutional intra institutional etc as well as in informal and non legislative contexts For this reason the EU can be difficult to understand Negotiation roleplaying simulations can shed light on the genuine dynamics of the system and are thus becoming an essential element in teaching and training on EU matters This book is an introduction and a guide to the EU decision making process and its institutional settings an essential tool for effective negotiators in the European arena and an instrument for teachers at any level offering a series of suggestions on how to design successful simulation games **Agricultural Trade Liberalization** Marcos Sawaya Jank, Inter-American Development Bank, 2004
