This collection of essays explores the questions of what counted as knowledge in Victorian Britain who defined knowledge and the knowledgeable by what means and by what criteria During the Victorian period the structure of knowledge took on a new and recognizably modern form and the disciplines we now take for granted took shape The ways in which knowledge was tested also took on a new form with the rise of written examinations New institutions of knowledge were created museums were important at the start of the period universities had become prominent by the end Victorians needed to make sense of the sheer scale of new information to popularize it and at the same time to exclude ignorance and error a role carried out by encyclopaedias and popular publications By studying the Victorian organization of knowledge in its institutional social and intellectual settings these essays contribute to our wider consideration of the complex and much debated concept of knowledge The Routledge Companion to English Studies Constant Leung, Jo Lewkowicz, 2024-07-31

The Formation of College English Thomas P. Miller, 1997 In the middle of the eighteenth century English literature composition and rhetoric were introduced almost simultaneously into colleges throughout the British cultural provinces Professorships of rhetoric and belles lettres were established just as print was reaching a growing reading public and efforts were being made to standardize educated taste and usage The provinces saw English studies as a means to upward social mobility through cultural assimilation In the educational centers of England however the introduction of English represented a literacy crisis brought on by provincial institutions that had failed to maintain classical texts and learned languages Today as rhetoric and composition have become reestablished in the humanities in American colleges English studies are being broadly transformed by cultural studies community literacies and political controversies Once again English departments that are primarily departments of literature see these basic writing courses as a sign of a literacy crisis that is undermining the classics of literature The Formation of College English reexamines the civic concerns of rhetoric and the politics that have shaped and continue to shape college English

Literature, Politics, and the English Avant-Garde Paul Peppis,2000-02-10 Accounts of the historical avant garde and of high modernism often celebrate the former for its revolutionary aesthetics or denigrate the latter for its proto fascist politics In Literature Politics and the English Avant Garde Paul Peppis shows how neither interpretation explains the writings of avant gardists in early twentieth century England Peppis reads texts by writers such as Ford Madox Ford Wyndham Lewis Dora Marsden and Ezra Pound alongside English political discourse between the death of Victoria and the end of the Great War He traces the impact of nation and empire on the avant garde arguing that Vorticism England s foremost avant garde movement used nationalism to advance literature and avant garde literature to advance empire Peppis s study demonstrates that these ambitions were enabled by a period conception of nationality as an essence and construct By recovering these neglected aspects of avant garde politics Peppis s book opens important avenues for assessing modernist politics after the war

Thomas P. Miller,2014-03-18 Thomas P Miller defines college English studies as literacy studies and examines how it has evolved in tandem with broader developments in literacy and the literate He maps out four corners of English departments literature language studies teacher education and writing studies Miller identifies their development with broader changes in the technologies and economies of literacy that have redefined what students write and read which careers they enter and how literature represents their experiences and aspirations Miller locates the origins of college English studies in the colonial transition from a religious to an oratorical conception of literature A belletristic model of literature emerged in the

nineteenth century in response to the spread of the penny press and state mandated schooling Since literary studies became a common school subject professors of literature have distanced themselves from teachers of literacy In the Progressive era that distinction came to structure scholarly organizations such as the MLA while NCTE was established to develop more broadly based teacher coalitions In the twentieth century New Criticism came to provide the operating assumptions for the rise of English departments until those assumptions became critically overloaded with the crash of majors and jobs that began in 1970s and continues today For models that will help the discipline respond to such challenges Miller looks to comprehensive departments of English that value studies of teaching writing and language as well as literature According to Miller departments in more broadly based institutions have the potential to redress the historical alienation of English departments from their institutional base in work with literacy Such departments have a potentially quite expansive articulation apparatus Many are engaged with writing at work in public life with schools and public agencies with access issues and with media ethnic and cultural studies With the privatization of higher education such pragmatic engagements become vital to sustaining a civic vision of English studies and the humanities generally
