Politics Of Human Science:

The Politics of Method in the Human Sciences George Steinmetz, 2005-05-16 Collection of new essays on the past present and future of positivism in the various social sciences *Feminist Politics and Human Nature (Philosophy and Society)* Alison M. Jaggar, 1988-10-24 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com *The Rhetoric of the Human Sciences* John S. Nelson, Allan Megill, Deirdre N. McCloskey, 1987

Opening with an overview of the renewal of interest in rhetoric for inquiries of all kinds this volume addresses rhetoric in individual disciplines mathematics anthropology psychology economics sociology political science and history Drawing from recent literary theory it suggests the contribution of the humanities to the rhetoric of inquiry and explores communications beyond the academy particularly in women's issues religion and law The final essays speak from the field of communication studies where the study of rhetoric usually makes its home **Inventing Human Science** Christopher Fox, Roy

Porter, Robert Wokler, 2023-11-15 The human sciences including psychology anthropology and social theory are widely held to have been born during the eighteenth century This first full length English language study of the Enlightenment sciences of humans explores the sources context and effects of this major intellectual development The book argues that the most fundamental inspiration for the Enlightenment was the scientific revolution of the seventeenth century Natural philosophers from Copernicus to Newton had created a magisterial science of nature based on the realization that the physical world operated according to orderly discoverable laws Eighteenth century thinkers sought to cap this achievement with a science of human nature Belief in the existence of laws governing human will and emotion social change and politics economics and medicine suffused the writings of such disparate figures as Hume Kant and Adam Smith and formed the basis of the new sciences A work of remarkable cross disciplinary scholarship this volume illuminates the origins of the human sciences and offers a new view of the Enlightenment that highlights the period's subtle social theory awareness of ambiguity and sympathy for historical and cultural difference The human sciences including psychology anthropology and social theory are widely held to have been born during the eighteenth century This first full length English language study of the Enlightenment sciences of humans explores the sources context *The Historic Turn in the Human Sciences* Terrence J. McDonald, 1996

Eleven essays that probe the historical project in a wide range of disciplines **Historicism and the Human Sciences in Victorian Britain** Mark Bevir, 2017-03-10 This book studies the rise and nature of historicist approaches to life race character language political economy and empire Arguing that Victorians understood life and society as developing historically in a way that made history central to public culture it will appeal to those interested in Victorian Britain historiography and intellectual history *Philosophical Papers: Volume 2, Philosophy and the Human Sciences* Charles Taylor, 1985-03-28 A selection of published papers is presented here in two volumes structured to indicate the direction and essential unity of the work **The Flight from Reality in the Human Sciences** Ian Shapiro, 2009-02-09 In this captivating

yet troubling book Ian Shapiro offers a searing indictment of many influential practices in the social sciences and humanities today Perhaps best known for his critique of rational choice theory Shapiro expands his purview here In discipline after discipline he argues scholars have fallen prey to inward looking myopia that results from and perpetuates a flight from reality In the method driven academic culture we inhabit argues Shapiro researchers too often make display and refinement of their techniques the principal scholarly activity The result is that they lose sight of the objects of their study Pet theories and methodological blinders lead unwelcome facts to be ignored sometimes not even perceived The targets of Shapiro s critique include the law and economics movement overzealous formal and statistical modeling various reductive theories of human behavior misguided conceptual analysis in political theory and the Cambridge school of intellectual history As an alternative to all of these Shapiro makes a compelling case for problem driven social research rooted in a realist philosophy of science and an antireductionist view of social explanation In the lucid if biting prose for which Shapiro is renowned he explains why this requires greater critical attention to how problems are specified than is usually undertaken He illustrates what is at stake for the study of power democracy law and ideology as well as in normative debates over rights justice freedom virtue and community Shapiro answers many critics of his views along the way securing his position as one of the distinctive social and political theorists of our time

The Norton History of the Human Sciences Roger Smith,1997 Beginning with the Renaissance s rediscovery of Greek psychology political philosophy and ethics author Roger Smith recounts how the human sciences gradually organized themselves around a scientific conception of psychology and how this trend has continued to the present day in a circle of interactions between science and ordinary life influencing and influenced by popular culture Photos drawings *An Inquiry Into the Philosophical Foundations of the Human Sciences* Alfred Claassen,2007 Textbook

Myth and the Human Sciences Angus Nicholls,2014-12-05 This is the first book length critical analysis in any language of Hans Blumenberg s theory of myth Blumenberg can be regarded as the most important German theorist of myth of the second half of the twentieth century and his *Work on Myth* 1979 has resonated across disciplines ranging from literary theory via philosophy religious studies and anthropology to the history and philosophy of science Nicholls introduces Anglophone readers to Blumenberg s biography and to his philosophical contexts He elucidates Blumenberg s theory of myth by relating it to three important developments in late nineteenth and early twentieth century German philosophy hermeneutics phenomenology and philosophical anthropology while also comparing Blumenberg s ideas with those of other prominent theorists of myth such as Vico Hume Schelling Max M ller Frazer Sorel Freud Cassirer Heidegger Horkheimer and Adorno According to Nicholls Blumenberg s theory of myth can only be understood in relation to the human sciences since it emerges from a speculative hypothesis concerning the emergence of the earliest human beings For Blumenberg myth was originally a cultural adaptation that constituted the human attempt to deal with anxieties concerning the threatening forces of nature by anthropomorphizing those forces into mythic images In the final two chapters Blumenberg s theory of myth is

placed within the post war political context of West Germany Through a consideration of Blumenberg s exchanges with Carl Schmitt as well as by analysing unpublished correspondence and parts of the original Work of Myth manuscript that Blumenberg held back from publication Nicholls shows that Blumenberg s theory of myth also amounted to a reckoning with the legacy of National Socialism

Shaping Human Science Disciplines Christian Fleck,Matthias Duller,Victor Karády,2018-09-01 This book presents an analysis of the institutional development of selected social science and humanities SSH disciplines in Argentina France Germany Hungary Italy the Netherlands Sweden and the United Kingdom Where most narratives of a scholarly past are presented as a succession of ideas research results and theories this collection highlights the structural shifts in the systems of higher education as well as institutions of research and innovation beyond the universities within which these disciplines have developed This institutional perspective will facilitate systematic comparisons between developments in various disciplines and countries Across eight country studies the book reveals remarkably different dynamics of disciplinary growth between countries as well as important interdisciplinary differences within countries In addition instances of institutional contractions and downturns and veritable breaks of continuity under authoritarian political regimes can be observed which are almost totally absent from narratives of individual disciplinary histories This important work will provide a valuable resource to scholars of disciplinary history the history of ideas the sociology of education and of scientific knowledge

The Making of the Human Sciences in China Howard Chiang,2019-05-07 This volume provides a history of how the human has been constituted as a subject of scientific inquiry in China from the seventeenth century to the present Organized around four themes Parameters of Human Life Formations of the Human Subject Disciplining Knowledge and Deciphering Health it scrutinizes the development of scientific knowledge and technical interest in human organization within an evolving Chinese society Spanning the Ming Qing Republican and contemporary periods its twenty four original synthetic chapters ground the mutual construction of China and the human in concrete historical contexts As a state of the field survey a definitive textbook for teaching and an authoritative reference that guides future research this book pushes Sinology comparative cultural studies and the history of science in new directions

Rationality, Relativism and the Human Sciences Joseph Margolis,A.S. Krausz,R. Burian,2012-12-06 The Greater Philadelphia Philosophy Consortium was launched in the early eighties It began during a particularly lean period in the American economy But its success is linked as much to the need to be in touch with the rapidly changing currents of the philosophical climate as with the need to insure an adequately stocked professional community in the Philadelphia area faced perhaps permanently with the threat of increasing attrition The member schools of the Consortium now include Bryn Mawr College the University of Pennsylvania Temple University and Villanova University that is the schools of the area that offer advanced degrees in philosophy The philosophy faculties of these schools form the core of the Consortium which offers graduate students the instructional and library facilities of each member school The Consortium is also supported by the

associated faculties of other regional schools that do not offer advanced degrees notably those at Drexel University Haverford College La Salle University and Swarthmore College both philosophers and members of other departments as well as interested and professionally qualified persons from the entire region The affiliated and core professionals now number several hundreds and the Consortium's various ventures have been received most enthusiastically by the academic community At this moment the Consortium is planning its fifth year of what it calls the Conferences on the Philosophy of the Human Studies

Introduction to the Human Sciences Wilhelm Dilthey, 1988 As a contribution to the issue of the methodologies of the humanities and social sciences the Introduction works to address issues of the human sciences and their place in relations to natural sciences

THE CASE STUDY OF POLITICAL SCIENCE Dr. Lakshimibai Somalingappa, 2018-07-05 Jean Bodin 1530-1596 a French political scholar settled the clarification Political Science Political science is a branch of humanism The examination of Political science is of outstanding centrality and imperativeness in the present day General town Political Science is the examination of the state As showed up by Garner Political science begins and completes with the state It might be depicted as the examination of man in the midst of the time spent addressing himself

Romanticism, Hermeneutics and the Crisis of the Human Sciences Scott Masson, 2016-03-31 First published in 2004 This study begins by surveying the field of modern hermeneutics Noting its repeated crisis of self-legitimation it traces these to circular beliefs bequeathed by Romanticism that human nature is self-begetting and can thus be known intimately and autonomously After providing a historical overview of how human nature had been understood the focus shifts to the attack in Coleridge's *Biographia Literaria* on Wordsworth's 1802 Preface to *Lyrical Ballads* and to a reading of some key Romantic texts It reads Coleridge's famous definition of the imagination as an attack on Romantic hermeneutics roots in the traditional view that man has been created in *Imago Dei* This title will be of interest to students of literature
