Politics Of Pactmaking Hungary's Negotiated Transition To Democracy In Comparative Perspective:

The Politics of Pact-Making J. Schieman, 2015-12-11 Contributing to the literature on democratic transitions and with a focus on institutional bargaining in this fascinating book the Hungarian case is contrasted with those of Poland South Africa and China to explore the contours of what bargaining strategies affect outcomes The result is an increased understanding of how actors and their interaction can make peaceful transition possible

The Transition to Democracy in Hungary Dae Soon Kim, 2013-07-18 Unlike in other countries of Eastern Europe where the opposition to communism came in the form of single mass movements led by charismatic leaders such as Václav Havel and Lech Wałęsa in Hungary the opposition was very fragmented brought together and made effective only by the authoritative significant but relatively unknown Róbert Góncz who subsequently became Hungary's first post communist president This book charts the political career of Róbert Góncz outlining the outstanding contribution he made to Hungary's transition to democracy Drawing on a wide range of sources including archives and interviews with Góncz himself and others it shows how Góncz unlike Havel who was a playwright and whose political role was largely symbolic was a campaigning politician all his life consistently advocating social democratic but not communist values Imprisoned from 1956 for his participation in the 1956 uprising Góncz was a highly effective political operator in the transition period around 1989 and as president wielded real power effectively As politics in Hungary are again marred by deep division and fragmentation Góncz's success in bringing rival groups together is even more pronounced

Central and Southeast European Politics since 1989 Sabrina P. Ramet, 2010-02-18 The only textbook to provide a complete introduction to post 1989 Central and Southeast European politics this dynamic volume provides a comprehensive account of the collapse of communism and the massive transformation that the region has witnessed It brings together 23 leading specialists to trace the course of the dramatic changes accompanying democratization The text provides country by country coverage identifying common themes and enabling students to see which are shared throughout the area giving them a sense of its unity and comparability whilst strengthening understanding around its many different trajectories The dual thematic focus on democratization and Europeanization running through the text also helps to reinforce this learning process Each chapter contains a factual overview to give the reader context concerning the region which will be useful for specialists and newcomers to the subject alike

Hungary's Crisis of Democracy Peter Wilkin, 2016-08-26 This book examines the crisis of democracy that has arisen in Hungary since the election of the Fidesz government in 2010 After moving swiftly to transform the Hungarian constitution Fidesz created a new political system which has led its critics to argue that the era of democracy in Hungary is over US Senator John McCain has gone so far as to describe Hungary as an illiberal democracy on a path toward fascism The author argues that Fidesz has sought to challenge the capitalist and democratic transformation that shaped Hungary for 20 years after the fall of communism by increasing the power of the state over crucial aspects of the economy society and the political system In so doing Fidesz actions resemble those undertaken by

many authoritarian states that have emerged since the end of the Second World War all aiming to build up a national capitalism and protect their economies whilst undertaking nation building To make sense of this the author draws upon two traditions of thought world systems analysis which situates Hungary in the context of its incorporation in the modern capitalist world system after the fall of communism and anarchist social thought which provides a unique way of seeing the actions of states and political elites In so doing the book argues that the events unfolding in Hungary cannot be explained on the basis of Hungarian exceptionalism but must be situated in the broader political and economic context that has shaped the development of Hungary since 1990 The form of capitalism introduced in Hungary and across the region of East and Central Europe has systematically undermined the strong state and social security that had existed under communism and when added to the failure of the left and liberals in the region it has paved the way for far right and neo fascist political movements to emerge claiming the mantle of defenders of society from the market This represents a fundamental threat to the enlightenment traditions that have shaped dominant modern political ideologies and raises profound problems for both the EU and NATO

Magyars and Political Discourses in the New Millennium Melinda Kovács, 2014-11-20 In this book Melinda Kovács analyzes various areas of Hungarian political discourse newspapers party websites informational books on the EU and government produced brochures sent to all households in Hungary The inquiry is supported by an understanding of politics as achieving and negotiating change in discourse which is not to be equated with simple language use In addition to language discourse also encompasses the meanings shared by members of a political community along with the conventions of what is possible or plausible in politics In the case of Hungary at the start of the twenty first century it is quite plausible to promote ethno nationalism and it is quite possible to understand Hungarian political community in terms of historical references different from or devoid of communism and post communism An exploration of discourses generated between 1999 and 2013 reveals that while political developments in recent years have been a cause for legitimate concern Hungarian political discourse has been making these developments plausible

The Adventures of the Constituent Power Andrew Arato, 2017-11-30 Constitutions are made in almost all transformation of regimes What are the dangers and the hopes associated with such a process What can make constitution making legitimate The Adventures of the Constituent Power explores the democratic methods by which political communities make their basic law arguing that the most advanced method developed from Spain and South Africa The first part of this book focuses on history of the idea of constitution making before and during the democratic revolutions of the eighteenth century The second part traces the notion of the constituent power in recent regime transitions that were consciously post revolutionary from Spain to South Africa With the return of revolutions or revolutionary patterns of constitution making the book examines the use and potential failure of the new ideas available The third part then proceeds to consider the type of constitution that is likely to emerge from the post sovereign process

Judging Russia Alexei Trochev, 2008-04-28 This is a study of the actual role that the Russian Constitutional Court played in protecting fundamental rights and resolving legislative executive struggles and federalism disputes in both Yeltsin's and Putin's Russia Trochev argues that judicial empowerment is a non linear process with unintended consequences and that courts that depend on their reputation flourish only if an effective and capable state is there to support them This is because judges can rely only on the authoritativeness of their judgments unlike politicians and bureaucrats who have the material resources necessary to respond to judicial decisions Drawing upon systematic analysis of all decisions of the Russian Court published and unpublished and previously unavailable materials on their non implementation and resting on a combination of the approaches from comparative politics law and public administration this book shows how and why judges attempted to reform Russia's governance and fought to ensure compliance with their judgments Corporate Social Responsibility and the Shaping of Global Public Policy M. Galvan, R. Sil, 2007-03-19 This book examines how novel institutional forms emerge when actors creatively reinterpret and reconfigure imported or imposed institutional models using case studies from East Asia the Middle East Africa and Latin America
