Politics The International System:

System and Process in International Politics Morton A Kaplan, 2005 System and Process 1957 broke the mould in political science by combining systems game and cybernetic concepts in its theoretical formulations Since its publication serious research in international relations has needed to respond to the bold hypotheses that matched equilibrial rules with type of system Kaplan's life long interest in finding an objective basis for moral judgments had its scholarly origins in an appendix of this classical book which incorporated his understanding of philosophy and in particular the philosophy of science A second appendix on The Mechanisms of Regulation explored the cybernetic and recursive nature of knowing

Neoclassical Realist Theory of International Politics Norrin M. Ripsman, Jeffrey W. Taliaferro, Steven E. Lobell, 2016 Neoclassical realism is a major theoretical approach to the study of foreign policy In Neoclassical Realist Theory of International Relations Norrin M Ripsman Jeffrey W Taliaferro and Steven E Lobell argue that it can explain and predict a far broader range of political phenomena in international politics Neoclassical realism challenges other approaches including structural realism liberalism and constructivism

World Politics Jeffrey Haynes, Peter Hough, Shahin Malik, Lloyd Pettiford, 2013-09-13 From the war on terror to the global financial crisis traditional concepts of world politics are being challenged on a daily basis In these uncertain times the study of international relations and the forces that shape them have never been more important Written specifically for students who are approaching this subject for the first time World Politics is the most accessible coherent and up to date account of the field available It covers the historical backdrop to today's political situations the complex interactions of states and non state actors the role of political economy human security in all its forms and the ways in which culture religion and identity influence events World Politics takes a new approach that challenges traditional interpretations and will equip students with the knowledge and the confidence needed to tackle the big issues

World Politics and International Law Francis Anthony Boyle, 2013-07-22 This work tries to bridge the gap between international lawyers and those political scientists who write about international politics In the first part the author discusses the influence of Professor Morgenthau's realist school on the current thinking of political scientists and the abandonment of

this school by its originator in the last years of his life The author concludes that the best way to test the validity of different approaches is to discuss various international crises in the light of contrasting theories and to analyze each situation from both the legal and political points of view In particular he tries to ascertain to what extent vital national interests could be accommodated within an international legal framework or could require a distortion of international rules in order to achieve national objectives In the second part the author dissects the Entebbe raid where Israeli forces rescued a group of hostages being detained by hijackers at a Ugandan airport His analysis shows the deficiencies of the international system in dealing with such a complex issue where several contradictory principles of international law could be applied and were defended by various protagonists The third part starts with a parallel problem the Iranian hostages crisis where a group of U S officials found themselves in an unprecedented situation of being captured by a band of students A critical analysis of the handling of this problem by the Carter Administration is followed by vignettes of other crises faced by the Administration and by its successor the Reagan Administration This part is less analytical and more prescriptive The author is no longer satisfied with pointing out what went wrong instead he departs from the usual hands off policy of political scientists and tries to indicate how much better each situation could have been handled if the decision makers had been paying more attention to international law and international organizations The theme is slowly developed that in the long run national interest is better served not by practicing power politics and relying on the use of threat of force but by strengthening those international institutions that can provide a neutral environment for first slowing down a crisis and then finding an equitable solution acceptable to most of the parties in conflict The value of this book lies primarily in giving the reader a real insight into several important issues of today that are familiar to most people only from newspaper headlines and television news While not everybody can agree with all his criticisms of the mistakes of various governments there is an honest attempt by the author to present issues impartially and to let the blame fall where it may Being both an international lawyer and a political scientist the author has had the advantage of combining the methodology of these two social sciences into a rich tapestry with some startling shades and tones

International Politics Werner Levi, 1974 **States and the Global System** Inis L. Claude, 1988-06-18 **Ethics and International Politics** Luigi Bonanate, 1995 In this study of an issue that has moved to the forefront of international relations Luigi Bonanate challenges the realist argument that relations between states are essentially amoral and governed exclusively by considerations of power and self interest He argues instead for the possibility of a moral theory of international life and in doing so lays a foundation for making moral assessments of international politics **Social Theory of International Politics** Alexander Wendt, 1999-10-07 Develops a cultural theory of international politics which contrasts with the realist mainstream **China and the International System** Xiaoming Huang, 2013 This book considers the evolving relationship between China and the international system and the interaction between a China of profound change in its identity capability and influence and an international system that is itself

experiencing a process of far reaching transformation It develops an analytical framework that allows us to capture understand and explain a more dynamic pattern of agent structure interaction in China s relationship with the international system By demonstrating a more dynamic and mutually constitutive relationship between China and the international system the book explores the extent to which both transform themselves in the process and provides a fuller and more effective assessment of the evolving nature of the relationship In doing so it addresses key issues in the current literature on the relationship of China and the international system and helps close the gap in our knowledge of the conditions and consequences of change and stability in the international system as a result of the change in distributions of power capability and influence among nation states

Theory of International Politics Kenneth Neal Waltz, 1979 Principles of International Politics Bruce Bueno de Mesquita, 2000 In contrast to most current approaches to international politics this work views domestic politics and international relations as inseparable and the role of individual political leaders as key A core assumption is that political leaders and foreign policy decision makers are motivated to keep their jobs and that they select policies and allocate scarce resources so as to help them fulfill their personal political objectives

African Agency in International Politics William Brown, Sophie Harman, 2013-03-20 This book analyses the rapidly increasing role of African states leaders and other political actors in international politics in the 21st Century In contrast to the conventional approach of studying how external actors impacted on Africa s international relations this book seeks to open up a new approach focusing on the impact of African political actors on international politics It does this by analysing African agency the degree to which African political actors have room to manoeuvre within the international system and exert influence internationally and the uses they make of that room for manoeuvre Bringing together leading scholars from Africa and Europe to explore the role and conception of African Agency this book addresses a wide range of issues from relations with western and non western donors Africa s role in the UN and World Trade Organisation negotiations over climate change trade agreements with the European Union regional diplomatic strategies the character and extent of African state agency and agency within corporate social responsibility initiatives African Agency in International Politics will be of interest to scholars and students of Africa s international relations African politics development geography diplomacy trade the environment political science and security studies

The Closure of the International System Lora Anne Viola, 2020-07-09 As global governance appears to become more inclusive and democratic many scholars argue that international institutions act as motors of expansion and democratization The Closure of the International System challenges this view arguing that the history of the international system is a series of institutional closures in which institutions such as diplomacy international law and international organizations make rules to legitimate the inclusion of some actors and the exclusion of others While international institutions facilitate collective action and common goods Viola's closure thesis demonstrates how these gains are achieved by limiting access to rights and resources creating a stratified system of political equals and unequals The coexistence of equality and hierarchy is a constitutive feature of the international system and its institutions This tension is relevant today as multilateral institutions are challenged by disaffected citizens non Western powers and established great powers discontent with the distribution of political rights and authority
