Politics And Petroleum In Ecuador:

Politics and Petroleum in Ecuador John D. Martz, In 1972 Ecuador began to produce and export petroleum in the Amazon interior and the formulation and execution of the petroleum policy became central to the political life of the nation The nation s armed forces seized political power that same year and continued to rule until the reestablishment of democratic pluralist government in 1979 In this book John D Martz probes the differences and similarities between military authoritarianism and democratic pluralism through an analysis of the politics of petroleum in Ecuador The Ecuadorian experience provides an ideal laboratory to test the policymaking characteristics and the overall performances of the two regimes ideal types Martz uses a textured and detailed analysis of global oil companies and nationalist politics to trace the growth and evolution of Ecuador s petroleum industry The course of partisan and sectoral politics and the internal workings of military politics are also examined Against this interplay of politics and the nationalistic struggle against multinational pressures Martz compares policymaking under military and civilian government John D Martz is a professor of political science at Pennsylvania State University He is the author and editor of more than a dozen books on Latin American politics and was the editor of the Latin American Research Review from 1975 to 1980 **Military Rule and Transition in Ecuador, 1972-92** Anita Isaacs,2016-01-03 Interprets the Ecuadorian transition to civilian rule following a prolonged period of military dictatorship 1972 79 and assesses the difficulties posed by efforts to consolidate democracy during the decade that followed It focuses on civilian opposition to the policies of the regime *Latin American Nations In World Politics* Heraldó Muñoz,Joseph S Tulchin,David G Becker,2018-02-19 This book offers an up to date analysis of the foreign policies of Latin American Nations and its international positioning in world politics evaluating the impact of changes in the global community on the hemisphere and on individual states *Assembling Petroleum Production and Climate Change in Ecuador and Norway* Elisabeth Marta Tómmerbakk,2021-08-01 This book addresses some of the controversies and uncertainties associated with reducing the extensive exploitation of fossil fuels due to their role in global warming Elisabeth Marta T mmerbakk explores why a transition towards a post carbon society is so difficult to accomplish by examining how the relationship between petroleum production and climate change is politically framed and negotiated in contested cases This question is approached through a process oriented comparative case study of Lofoten located in the Norwegian Sea above the Arctic Circle and Yasuní ITT Ishpingo Tambococha and Tiputini located in the Ecuadorian Amazon regions that both belong to oil exporting countries with highly oil dependent economies T mmerbakk draws on rich empirical data that includes qualitative interviews with subjects in both countries and applies an Actor Network Theory framework to show that oil and climate are intricately entangled in knowledge and policy practices Overall *Assembling Petroleum Production and Climate Change in Ecuador and Norway* provides an in depth examination of how climate science and petroleum extraction are negotiated adapted assembled and coordinated with other national policies and political aims This book will be of great interest to students and scholars of

Resource Nationalism and Energy Policy David R. Mares, 2022-10-04 It is widely thought that state ownership of natural resources oil and natural gas in particular causes countries to fall under the sway of the resource curse In such cases governments allegedly display resource nationalism which destabilizes the economy society and politics In this book David R Mares dispels these beliefs and develops a powerful new account of the relationship between state resource ownership and energy policy Mares examines variations in energy policy across a wide range of countries underscoring the fact that in most of the world outside the United States subsoil natural resources are owned by the state He considers the history of Latin American oil and gas policies and provides an in depth analysis of Venezuela from 1989 to 2016 before during and after the presidency of Hugo Chavez Mares demonstrates that the key factors that influence energy policy are the inclusiveness of the political system the level of competitiveness within policy making and the characteristics of individual leaders Domestic politics not state ownership determines the effectiveness and efficiency of energy policies the resource curse is avoidable Drawing on these findings Mares reconceptualizes resource nationalism arguing that government intervention into resource extraction is legitimate as long as the benefits are shared through the provision of public goods Featuring a sophisticated grasp of both Latin American politics and energy policy this book sheds new light on why some governments are responsible stewards of natural resources while others appropriate national wealth for partisan or private benefit

Oil and Politics in Latin America George Philip, 1982-05-31 This book provides a study of the transformation of the Latin American oil system from one in which the international oil companies dominated to one which is dominated by the main state oil companies and an account of how some of the more important of the state companies have operated This comprehensive guide to the evolution of the Latin American oil system combines in one volume a synthesis of material from secondary sources and original research and thus provides an invaluable reference for all concerned with the history and economy of Latin America and with the development and functioning of the international oil industry

Indians, Oil, and Politics Allen Gerlach, 2003 An attorney and independent scholar Albuquerque based Gerlach lived in Peru and Ecuador for several years and taught at the Centro Andino in Quito He reviews Ecuador s history during the last half millennium in particular its evolution during the past 30 plus years following the discovery of oil in the Amazon in the 1960s and subsequent development of the country s oil industry Gerlach s study demonstrates the increasing interrelations between politics economics culture the environment finance and diplomacy in the country Annotation c 2003 Book News Inc Portland OR booknews com

Oil, Revolution, and Indigenous Citizenship in Ecuadorian Amazonia Flora Lu, Gabriela Valdivia, Néstor L. Silva, 2016-11-26 This book addresses the political ecology of the Ecuadorian petro state since the turn of the century and contextualizes state civil society relations in contemporary Ecuador to produce an analysis of oil and Revolution in twenty first century Latin America Ecuador s recent history is marked by changes in state citizen relations the election of political firebrand Rafael Correa a

new constitution recognizing the value of pluriculturality and nature's rights and new rules for distributing state oil revenues. One of the most emblematic projects at this time is the Correa administration's *Revoluci n Ciudadana*, an oil-funded project of social investment and infrastructural development that claims to blaze a responsible and responsive path towards wellbeing for all Ecuadorians. The contributors to this book examine the key interventions of the recent political revolution: the investment of oil revenues into public works in Amazonia and across Ecuador; an initiative to keep oil underground and the protection of the country's most marginalized peoples to illustrate how new forms of citizenship are required and forged. Through a focus on Amazonia and the Waorani, this book analyzes the burdens and opportunities created by oil-financed social and environmental change and how these alter life in Amazonian extraction sites and across Ecuador.

The Globalization of Contentious Politics Pamela Martin, 2014-06-23. This dissertation argues that Amazonian indigenous peoples organized via transnational networks due to the domestic blockages presented to them in their respective countries. Due to these blockages and the growing number of transnational political opportunity structures such as national and international non-governmental organizations, multi-lateral development banks and multinational corporations, indigenous peoples mobilized through transnational advocacy networks and eventually formed transnational social movement organizations. Through a comparative historical analysis of five Ecuadorian Amazonian indigenous organizations, this work illustrates the processes of transnational collective action and its outcomes.

Resource Radicals Thea Riofrancos, 2020-07-17. In 2007, the left came to power in Ecuador. In the years that followed, the twenty-first century socialist government and a coalition of grassroots activists came to blows over the extraction of natural resources. Each side declared the other a perversion of leftism and the principles of socioeconomic equality, popular empowerment and anti-imperialism. In *Resource Radicals*, Thea Riofrancos unpacks the conflict between these two leftisms: on the one hand, the administration's resource nationalism and focus on economic development; and on the other, the anti-extractivism of grassroots activists who condemned the government's disregard for nature and indigenous communities. In this archival and ethnographic study, Riofrancos expands the study of resource politics by decentering state resource policy and locating it in a field of political struggle populated by actors with conflicting visions of resource extraction. She demonstrates how Ecuador's commodity-dependent economy and history of indigenous uprisings offer a unique opportunity to understand development, democracy and the ecological foundations of
