Burying Mao Richard Baum, 2018-06-05 For almost two decades after Mao Zedong's death an epic no holds barred contest was waged in China between orthodox Marxists and reformers With Deng Xiaoping's strong support the reformers ultimately won but they and China paid a heavy price Here Richard Baum provides a lively comprehensive guide to the intricate theater of post Mao Chinese politics He tells the intriguing story of an escalating intergenerational clash of ideas and values between the aging revolutionaries of the Maoist era and their younger more pragmatic successors Baum deftly analyzes the anatomy of the reformers ultimate victory in his brilliant reconstruction of the twists and turns of the reform process China from Mao to Deng Bulletin of Concerned Asian Scholars, 1983 **Continuities between Mao Zedong's China and Deng Xiaoping's China** Julian Ostendorf, 2011-07-01 Essay from the year 2011 in the subject History Asia grade 2.0 University of Warwick Department of History course China since 1900 language English abstract Das Essay untersucht die politische Entwicklung Chinas seit Gründung der PRC unter Mao Zedong bis zur Öffnung Chinas und seiner Modernisierung unter Deng Xiaoping Dazu werden die Rolle des Staates bzw der Kommunistischen Partei die zentrale Frage der Wirtschaftspolitik sowie die Rolle Chinas in den internationalen Beziehungen und seine Strategie in einer sich ändernden weltpolitischen Lage untersucht Politics in China William A. Joseph, 2019-04-25 On October 1 2019 the People's Republic of China PRC will celebrate the 70th anniversary of its founding And what an eventful and tumultuous seven decades it has been During that time under the leadership of the Chinese Communist Party CCP China has been transformed from one of the world's poorest countries into one of its fastest growing economies and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence But in the late 1950s the PRC experienced the most deadly famine in human history caused largely by the actions and inactions of its leaders Not long after there was a collapse of government authority that pushed the country to the brink of and in some places actually into civil war and anarchy And in 1989 the CCP unleashed the army to brutally crush demonstrations by students and others calling for political reform China is now for the most part peaceful prospering and proud The CCP maintains a firm grip on power through a combination of harsh repression and popular support largely based on its recent record of promoting rapid

economic growth Yet the party and country face serious challenges on many fronts including a slowing economy environmental desecration pervasive corruption extreme inequalities ethnic unrest and a rising tide of social protest Politics in China provides an accessible yet authoritative introduction to how the world's most populous nation and rapidly rising global power is governed today The third edition has been extensively revised thoroughly updated and includes a new chapter on the internet and politics in China The book's chapters provide overviews of major periods in China's modern political history from the mid nineteenth century to the present examinations of key topics in contemporary Chinese politics and analyses of developments in four important areas located on China's geographic periphery Tibet Xinjiang Hong Kong and Taiwan

Heretics of China Nabil Alsabah, 2019-09-12 Why do political leaders often perform fatal miscalculations take ill considered actions and indulge in ludicrous wishful thinking This book seeks to shed light on these questions by conducting two related case studies from the vantage point of the science of human behavior psychology The first one analyzes the decision making behavior and leadership style of Mao Zedong a man who in the words of historian Maurice Meisner conceived and led the most popular revolution in world history only to squander its fruits by embarking on a series of catastrophic political projects that cost tens of millions of Chinese their lives The second case study follows the path of Mao's successor Deng Xiaoping who renounced his faith in Maoism and embraced a pragmatic decision making approach that paved the way for China's remarkable rise This book is the result of five years of research Despite being based on the author's PhD dissertation this work should be accessible to non experts The investigation begins in Chapter 1 with a historical overview of China's accelerating decline throughout the nineteenth century This introductory chapter depicts China's so called century of humiliation 1839 1949 It offers some context as to the repeated failures to achieve national rejuvenation over the decades The psychological analysis starts in Chapter 2 with a detailed discussion of Mao's restlessness The author will argue that Mao was locked in a never ending battle against recurring self doubts which left him with a constant need for reassurance a need that he attempted to satisfy by seeking to overcome ever more formidable political challenges This in turn condemned China to a state of uninterrupted mass political campaigns which greatly interfered with the nation's attempts at economic and social modernization Chapter 3 analyzes why Mao's colleagues went along with his utopian visions The discussion here will demonstrate that the decision making behavior of the Chinese leadership exhibited all the hallmarks of groupthink a modus operandi whereby the yearning to retain the approval of one's leader as well as one's colleagues outweighs the desire to draft effective policies Chapter 4 explores how and why Mao's principal goal in life eventually shifted from building socialism in China to preventing an imaginary capitalist restoration a shift that ultimately paved the way for the disastrous Cultural Revolution The author interprets this shift in Mao's narrative identity as a reaction to his repeated failure to advance the quest for modernization Chapter 5 centers on Deng's silent rebellion against Mao's decision making approach The discussion

here will showcase the power of self reflection a psychological exercise that subjects one's past behavioral and thought patterns to ruthless scrutiny so as to learn lessons for the future Having subsequently renounced his faith in Maoism and all other isms Deng espoused fact based and practice oriented decision making Yet this did not turn either him or the decision making apparatus over which he presided into dispassionate robots Beliefs and values as shown in Chapter 6 still colored how Deng and his colleagues interpreted complex developments in China These beliefs and values were shaped by the forces of personality the power of worldviews and the subjective manner by which different decision makers processed their past experiences As a result the senior leaders greatly differed in terms of their visions for advancing China's quest for modernization Chapter 7 concludes this book with a summary of the most important findings It also elaborates on the question of how the developed hypotheses can be validated Further this chapter provides an overview of the most pronounced behavioral characteristics of both Mao and Deng

The End of the Maoist Era: Chinese Politics During the Twilight of the Cultural Revolution, 1972-1976 Frederick C Teiwes, Warren Sun, 2014-12-18 This book launches an ambitious reexamination of the elite politics behind one of the most remarkable transformations in the late twentieth century As the first part of a new interpretation of the evolution of Chinese politics during the years 1972-82 it provides a detailed study of the end of the Maoist era demonstrating Mao's continuing dominance even as his ability to control events ebbed away The tensions within the gang of four the different treatment of

Zhou Enlai and Deng Xiaoping and the largely unexamined role of younger radicals are analyzed to reveal a view of the dynamic of elite politics that is at odds with accepted scholarship. The authors draw upon newly available documentary sources and extensive interviews with Chinese participants and historians to develop their challenging interpretation of one of the most poorly understood periods in the history of the People's Republic of China. **China Since the Cultural**

Revolution Jie Chen, Peng Deng, 1995 This book provides an alternative analytical approach to the study of China's political changes since the Cultural Revolution which treats those changes as a transition from totalitarianism to authoritarianism. While depicting important political economic events it focuses on the changes in such major sociopolitical factors as the people's attitude toward the regime, government policy, the ruling methods of the regime and the interrelationships among them. Based on the analyses of these factors, the book also predicts the future of the current Communist regime in terms of the challenges it will face and its ability to meet them. The Politics of China Roderick MacFarquhar, 2011-09-19

Thirty years ago China was emerging from one of the most traumatic periods in its history. The Chinese people had been ravaged by long years of domestic struggle, terrible famine and economic and political isolation. Today China has the world's second largest economy and is a major player in global diplomacy. This volume, written by some of the leading experts in the field, tracks China's extraordinary transformation from the establishment of the People's Republic of China in 1949 through the Great Leap Forward, the Cultural Revolution and the death of Chairman Mao to its dynamic rise as a superpower in the twenty-first century. The latest edition of the book includes a new introduction and a seventh chapter which focuses on the legacy of Deng Xiaoping, the godfather of China's transformation under his successors Jiang Zemin and Hu Jintao.
