present volume have sifted through many hundreds of sources to select the essential facts and figures on population social structure employment the economy public finance government structures and political parties from 1950 to the present day In addition they provide social and economic background for each of the countries covered to enable the data to be put in context A short final section lists sources of further information The resulting combination is both invaluable and fascinating whether it is used casually to check up a fact or two or systematically to make detailed comparisons between the most advanced political systems of the Western world

*Governmental Response to Environmental Challenges in Global Perspective* Joseph G. Jabbra,O. P. Dwivedi,1998 In our drive to improve human standards of living we have paradoxically paid scant attention to the need for clean air and water the impact of acid rain on agriculture lakes and rivers the effect of pollutants on the ozone layer the safe disposal of hazardous wastes and the relationship between population growth and the environment It seems that every time governments are faced with an apparent choice between economic development and the protection of the environment priority is always given to the former Short term plans dictated by canons of political survival and expediency always seem to take precedence over long term strategies with politicians and decision makers deftly relegating environmental concerns to the realm of rhetoric This book is an effort to better understand the problems faced by our global ecosystems It is also the result of the authors deep commitment to urge both citizens and their leaders the world over to work together for a better protection of the environment so that our planet may be saved for the present and for future generations      *Political Science Abstracts* ,1992-08-31 Political Science Abstracts is an annual supplement to the Political Science Government and Public Policy Series
