'The Furie of the Ordnance' Stephen Bull, 2008 Shows how new developments in guns and artillery played a decisive role in the English Civil War NEW LOW PRICE The English Civil War has frequently been depicted as a struggle between Cavaliers and Roundheads in which technology played little part The first hand sources now tell us that this romantic picture is deeply flawed revealing a reality of gunpowder artillery and a grinding struggle of siege and starvation As with naval warfare developments in gun technology drastically changed land warfare in the years leading up to 1642 The Civil War was itself shaped largely by the availability of munitions A failure to procure them in 1643 and 1644 combined with abortive attempts on London ultimately proved the downfall of the Royalists Moreover a final move away from fortified local garrisons reshaped both the nature of warfare in England and the country itself STEPHEN BULL is Curator of Military History and Archaeology Lancashire Museums
