The History of Emigration Canyon: Gateway to Salt Lake Valley Cynthia Furse, Jeffrey Carlstrom, 2019-11-28

Emigration Canyon is well known in Utah as the route by which pioneers in 1847 reached Great Salt Lake Valley to establish the state's first lasting Euro American settlements. Before and after 1847 the canyon had an interesting history which included the Donner Reed party, the Pony Express and Overland Stage, mining and sheep herding, a narrow gauge railroad, a major resort, a brewery and the transformation of recreation areas and cabin sites into year round residential neighborhoods. This well illustrated detailed history tells the story of a unique place but its counterparts can be found across the West and America wherever the development of wild and scenic areas has been shaped by the growth and needs of neighboring cities. In this second edition new illustrations and maps, new information and stories, a significantly expanded chapter on the Emigration Canyon Railroad and a new chapter on the modern history bring to life the story of a place and its people.

Eco-industrial Strategies Edward Cohen-Rosenthal, Judy Musnikow, 2017-09-29 Eco industrial development is born from the realisation that the places where we work waste too much and unnecessarily pollute the land, air and water. This book explores the key issues involved in developing eco parks and identifies the stakeholders and their roles in such projects.

Civil Society Contributions to Policy Innovation in the PR China A. Fulda, 2015-04-29 This book focuses on the question of whether and how civil society may contribute to policy innovation. As the focus of civil society research is often more on the constraints on civil society by the state and less on the agency and effects of civil society organisations, the authors provide a fresh and fruitful perspective. Corporate Environmental Governance in China Le Luo, Hongtao

Shen, Yankun Zhou, 2025-06-13 The book explores how diverse stakeholder groups, particularly community and regulatory stakeholders, shape corporate environmental practices. Focusing on one of the world's largest economies, this book provides an in depth analysis of stakeholder dynamics and their impact on corporate environmental performance and disclosure. Environmental governance has become a global imperative as environmental crises intensify and stakeholder expectations grow. The book examines the interplay between community advocacy and regulatory actions and particularly focuses on how community stakeholders drive corporate accountability by pressuring regulatory authorities to enforce stricter measures or provide financial incentives. The chapters include discussions on the role of public environmental awareness and concern in shaping corporate performance and disclosure practices. The book also highlights how regulatory influence mediates the relationship between community influence and corporate environmental outcomes, offering new insights into the interactive dynamics of stakeholder influence. This book will be of interest to policymakers, corporate managers and academics seeking to understand the nuanced relationships between businesses, governments and communities. It offers actionable recommendations for fostering effective environmental governance and sustainable corporate practices. *Digital Technology and Changing Roles in Managerial and Financial Accounting* Allam Hamdan, Bahaaeddin Alareeni, Reem
