Indexes to the Epilepsy Accessions of the Epilepsy Information System J. Kiffin Penry, 1978 **Substance Abuse and Psychopathology** Arthur Alterman, 2014-07-08 Substance misuse and abuse exist in almost every human society In our western civilization the bulk of attention has focused on those individuals who specifically seek treatment or those who have become so disabled by these problems that they require treatment These individuals usually qualify for a psychiatric diagnosis of alcohol or other substance abuse However just as it has been recognized that primary substance abuse is frequently associated with other diagnosable psychiatric disorders such as sociopathy or attention deficit disorder residual type and that the origins of substance abuse are multivariate we have also begun to become aware that many other individuals in our society with psychiatric or other problems also suffer to varying degrees from substance abuse These problems may be considered secondary by various specialists or treatment personnel but nevertheless they are problems and what disorder is primary or secondary in a given individual may often be very difficult to determine in a meaningful fashion Thus within the past decade research studies have reported significant incidences of substance abuse or misuse in high school and college aged populations in medical populations and in individuals with other psychiatric disorders such as schizophrenia depression and the anxiety and personality disorders Yet to date little has been done to bring together and systematize this widely scattered data that describes the presence of substance abuse problems in various populations

Residual Effects of Abused Drugs on Behavior John William Spencer, John J. Boren, National Institute on Drug Abuse, 1990 **NIDA Research Monograph**, 1976 *The Effectiveness of Social Interventions for Homeless Substance Abusers* Gerald Stahler, Barry Stimmel, 1995 This resource is devoted exclusively to reporting the results of rigorous research concerning substance abuse treatment outcomes for homeless persons The Effectiveness of Social Interventions for Homeless Substance Abusers reveals that while dropout rates are high for this population it is essential to develop treatment programs that not only focus on the addiction but also address the tangible needs of the homeless notably housing income support and employment

Strategies for Research on the Interactions of Drugs of Abuse, 1986 *Controversies in Alcoholism and Substance Abuse* Barry Stimmel, 2022-04-29 First published in 1986 Controversies in Alcoholism and Substance Abuse

presents a collection of papers dealing with various aspects of alcohol and substance abuse. It covers crucial themes like 1 the Acquired Immune Deficiency Syndrome and heroin addiction 2 the effects of widespread cocaine use 3 social use of marijuana 4 early identification of and efficacy of treatment for alcoholism and 5 the effects of social drinking during pregnancy on the fetus. This book will be of interest to scholars and researchers of addiction studies, psychology, sociology of addiction, and specially those who want to know about the advances made in the 1980s in the study of alcohol and substance abuse.

Determinants of Substance Abuse Mark Galizio, Stephen A. Maisto, 1985-04-30. With the recent increase in the scope of drug and alcohol problems has come an awareness of the need for solutions. As data accumulates it is becoming more apparent that substance abuse problems are extremely complex and are influenced by a variety of biological, psychological, and environmental variables. Unfortunately it has proved difficult to go beyond this conclusion to a description of how these multiple factors work together to influence the development of and recovery from drug and alcohol dependence. The purpose of this book is to try to meet that objective by including in one volume theoretical analyses from a wide variety of drug researchers. In each case the author was asked to consider how the variables in their particular domain might contribute to the appearance of individual differences in both alcohol and drug related problems. The resulting volume is a valuable source for those wishing to take a more interdisciplinary approach to substance abuse issues. Preface.
