**Polyethnicity and National Unity in World History** William Hardy McNeill, 1986      **National Culture and the New Global System** Frederick Buell, 1994-09 The three worlds theory is perhaps still the basis for our dominant assumptions about geopolitical and geocultural order writes Frederick Buell but its hold on our imagination and faith is passing fast In its place a startlingly different model the notion that the world is somehow interconnected into a single system has emerged expressing the perception that global relationships constitute not three separate worlds but a single network In the wake of disillusionment with anticolonial nationalism and in response to a wide variety of economic political demographic and technological changes Buell argues we have come increasingly to view the world as complexly interconnected In National Culture and the New Global System he considers how the notion of national culture has been conceived and reconceived in the postwar period For much of the period the three world theory provided economic political and cultural models for mapping a world of nation states More recently new notions of interconnectedness have been developed ones that have had profound and sometimes startling effects on cultural production and theory Surveying recent cultural history and theory Buell shows how our understanding of cultural production relates closely to transformations in models of the world order

persuasive book that makes clear what damage is done when we let the old view of America alone in the world falsify our history Bender boldly challenges us to think beyond our borders

**Nations and Nationalism in a Global Era** Anthony Smith, 2013-05-28 In a world of transnational economics and mass communications ethnic conflict and nationalism have recently re emerged as major political forces Is this due to the advance of modernity Will a global culture supersede nationalism In fact the revolution of modernity has revitalized ethnic memories and communities as people look for stability and meaning in an age of unprecedented change and return to their ethnic heritages Ethnic nationalism challenges but also reinforces the national state By comparison supra national ideals seem vague and pale and the dream of a cosmopolitan global culture is utopian For all its shortcomings Anthony Smith argues the nation and its nationalism is likely to remain the only realistic and widespread popular ideal of community

Remapping Memory Jonathan Boyarin, 1994 The essays in this book focus on contested memories in relation to time and space Within the context of several profound cultural and political conflicts in the contemporary world the contributors analyze historical self configurations of human groups and the construction by these groups of the spaces they shape and that shape them What emerges is a view of the state as a highly contingent artifact of groups vying for legitimacy whether through their own sense of insiderhood their control of positions within hierarchies or their control of geographical territories Boyarin s lead essay shows how the supposedly objective categories of space and time are in fact specific products of European modernity Each case study in turn addresses the re constitution of space time and memory in relation to an event either of historical significance like the dropping of the atomic bomb on Hiroshima or of cultural importance like the Indian preoccupation with reincarnation These ethnographic studies explore fundamental questions about the nature of memory the limits of politics and the complex links between them By focusing on personal and collective identity as the site where constructions of memory and dimensionality are tested shaped and effected the authors offer a new way of understanding how the politics of space time and memory are negotiated to bring people to terms with their history

*Power in the Global Age* Ulrich Beck, 2014-10-15

This brilliant new book by one of Europe's leading social thinkers throws light on the global power games being played out between global business nation states and movements rooted in civil society Beck offers an illuminating account of the changing nature of power in the global age and assesses the influence of the ever expanding counter powers The author puts forward the provocative thesis that in an age of global crises and risks a politics of golden handcuffs the creation of a dense network of transnational interdependencies is exactly what is needed in order to regain national autonomy not least in relation to a highly mobile world economy It is imperative that the maxim of nation based realpolitik that national interests have necessarily to be pursued by national means be replaced by the maxim of cosmopolitan realpolitik The more cosmopolitan our political structures and activities Beck suggests the more successful they will be in promoting national interests and the greater our individual power in this global age will be
