Music, Dance and Franco-Italian Cultural Exchange, c.1700 Don Fader, 2021 This study stems from discoveries in a trove of documents belonging to Charles Henri de Lorraine prince de Vaudemont who served as governor of Milan under the Spanish crown from 1698 to 1706 These documents together with a mass of other sources letters diaries treatises libretti scores offer a vivid new picture of musical life in Paris and Milan as well as exchanges between France and Italy The book is both a patronage study and an examination of the contributions by and the difficulties facing musicians and dancers who worked across national and cultural boundaries Music Dance and Franco Italian Cultural Exchange c 1700 follows the careers of the prince and the French violinist and composer Michel Pignolet de Montéclair In the context of a renewed fascination with Italian music in the 1690s Montéclair made a name for himself in Paris as a pedagogue and composer who understood both national styles and blended them in a way that was successful on French terms Vaudemont hired Montéclair to direct a French violin band and to compose dance music for a series of new operas that observers declared the best in Italy but are virtually unknown today These productions involved collaborations among a mixed company of French and

Italian musicians dancers composers and librettists modeled on the practice of Turinese court operas The book is an account of the contributions of these figures to the cultural life of Paris Milan and other northern Italian states and to the creative mixing of musical styles operatic conventions and dance technique in France and Italy through the 1720s and beyond The Courtly Consort Suite in German-Speaking Europe, 1650-1706 Michael Robertson, 2017-07-05 Dance music at the courts of seventeenth century Germany is a genre that is still largely unknown Dr Michael Robertson sets out to redress the balance and study the ensemble dance suites that were played at the German courts between the end of the Thirty Years War and the early years of the eighteenth century At many German courts during this time it was fashionable to emulate everything that was French As part of this process German musicians visited Paris throughout the second half of the seventeenth century and brought French courtly music back with them on their return For the last two decades of the century this meant the works of Jean Baptiste Lully and his music and its influence spread rapidly through the courts of Europe Extracts from Lully's dramatic stage works were circulated in both published editions and manuscript These extracts are considered in some detail especially in terms of their relationship to the suite The nobility also played their part in this process French musicians and German players with specialist knowledge were often hired to coach their German colleagues in the art of playing in the French manner the *französischer Art* The book examines the dissemination of dance music instrumentation and performance practice and the differences between the French and Italian styles It also studies the courtly suites before the advent of Lullism and the differences between the suites of court composers and town musicians With the possible exception of Georg Muffat's two *Florilegium* collections of suites much of the dance music of the German Lullists is largely unknown court composers such as Cousser Erlebach Johann Fischer and Johann Caspar Ferdinand Fischer all wrote fine collections of ensemble suites and these are examined in detail Examples from these suites some published for the first time are given throughout the book in order to demonstrate the music's quality and show that its neglect is completely unjustified *Power and Ceremony in European History* Anna Kalinowska, Jonathan Spangler, 2021-09-09 From oaths and hand kissing to coronations and baptisms *Power and Ceremony in European History* considers the governing practices courtly rituals and expressions of power prevalent in Europe and the Ottoman Empire from the medieval age to the modern era Bringing together political and art historical approaches to the study of power this book reveals how ceremonies and rituals far from simply being ostentatious displays of wealth served as a primary means of communication between different participants in political and courtly life It explores how ceremonial culture changed over time and in different regions to provide readers with a nuanced comparative understanding of rituals and ceremonies since the middle ages showing how such performances were integral to the evolution of the state in Europe This collection of essays is of immense value to both historians and art historians interested in representations of power and the political culture of Europe from 1450 onwards New Perspectives on Handel's Music David Vickers, 2022 Much like a baroque *dramma per musica* this book is divided into a three

Disclosing Horizons Nicholas Temple, 2006-11-22 This study examines the influence of perspective on architecture highlighting how critical historical changes in the representation and perception of space continue to inform the way architects design Since its earliest developments perspective was conceived as an exemplary form of representation that served as an ideal model of how everyday existence could be measured and ultimately judged Temple argues that underlying the symbolic and epistemological meanings of perspective there prevails a deeply embedded redemptive view of the world that is deemed perfectible Temple explores this idea through a genealogical investigation of the cultural and philosophical contexts of perspective throughout history highlighting how these developments influenced architectural thought This broad historical enquiry is accompanied by a series of case studies of modern or contemporary buildings each demonstrating a particular affinity with the accompanying historical model of perspective
