An Introduction to Polymer Chemistry D. Margerison, G. C. East, 2013-10-22 An Introduction to Polymer Chemistry focuses on the fundamental chemistry of synthetic organic polymers of high molecular weight This book explains the basic principles of polymer chemistry from significant methods of molecular weight determination to the simpler mechanisms of polymerization The osmotic light scattering and viscosity methods of molecular weight determination are fully discussed together with the kinetics of selected examples of condensation and free radical addition polymerization The main features of ionic polymerization are also elaborated This text however does not cover the thermodynamics of polymer solutions or the methods of structure determination This publication is a good reference to university and technical college students researching on polymer chemistry

Organic Polymer Chemistry K. J. Saunders, 2013-03-09 This book deals with the organic chemistry of polymers which find technological use as adhesives fibres paints plastics and rubbers For the most part only polymers which are of commercial significance are considered and the primary aim of the book is to relate theoretical aspects to industrial practice The book is mainly intended for use by students in technical institutions and universities who are specializing in polymer science and by graduates who require an introduction to this field Several excellent books have recently appeared dealing with the physical chemistry of polymers but the organic chemistry of polymers has not received so much attention In recognition of this situation and because the two aspects of polymer chemistry are often taught separately this book deals specifically with organic chemistry and topics of physical chemistry have been omitted Also in this way the book has been kept to a reasonable size This is not to say that integration of the two areas of polymer science is undesirable on the contrary it is of the utmost importance that the inter relationship should be appreciated I wish to record my thanks to my colleagues with whom I have had many helpful discussions particularly Mrs S L Radchenko I also thank Miss E Friesen for obtaining many books and articles on my behalf and Mr H Harms for

encouragement and assistance I am also grateful to Mrs M Stevens who skilfully prepared the manuscript Department of Chemical and Metallurgical Technology Ryerson Polytechnical Institute K J S **Polymer Chemistry** Malcolm P.
