## **Polymers In Concrete:**

Polymers in Concrete Y. Ohama, 2003-09-02 Increasing attention is being given to the use of concrete polymer composites as high performance and multi functional materials in the construction industry as well as in mechanical electrical and chemical engineering Particular interest is being given to these materials in Japan and other East Asian countries This book forms the proceedings of the 1st International Conference on Polymer Modified Concrete and Mortars

**Polymers in Concrete** Satish Chandra, Yoshihiko Ohama, 2020-08-11 This broad based introductory reference provides excellent discussions regarding the hydration of Portland cement durability problems in concrete mechanisms of concrete deterioration and interaction of polymers in concrete It also covers properties of concrete with added polymers and practical applications of polymers in concrete The historic background of polymers in building materials is examined and a comprehensive comparison of natural vs synthetic polymers is provided and conveniently summarized in a tabular format

Guide for the Use of Polymers in Concrete ACI Committee 548, Polymers in Concrete, 1992 This Guide presents information on how to use polymers in concrete to improve some characteristics of the hardened concrete Recommendations are included for polymer impregnated concrete PIC polymer concrete PC polymer portland cement concrete PPCC and safety considerations for the use of polymers in concrete Information is provided on types of materials and their storage handling and use as well as concrete formulations equipment to be used construction procedures and applications A bibliography of major references covering polymers in concrete and a glossary of terms are appended

**Handbook of Polymer-Modified Concrete and Mortars** Yoshihiko Ohama, 1995-12-31 Mortar and concrete made with portland cement has been a popular construction material in the world for the past 170 years or more However cement mortar and concrete have some disadvantages such as delayed hardening low tensile strength large drying shrinkage and low chemical resistance To reduce these disadvantages polymers have been utilized as an additive Polymer modified or polymer cement mortar PCM and concrete PCC are the materials which are made by partially replacing the cement hydrate binders of conventional cement mortar or concrete with polymers This book deals with the principles of polymer modification for cement composites the process technology properties and applications of the polymer modified mortar and concrete and special polymer modified systems such as M DF cement antiwashout underwater concrete polymer ferrocement and artificial I wood The polymeric admixtures or cement modifiers include latexes or emulsions redispersible polymer powders water soluble polymers liquid resins and monomers This book describes the current knowledge and information of polymer modified mortars and concretes and discusses or reviews the following items in detail

- 1 Principles of polymer modification for cement composites
- 2 Process technology of polymer modified mortars and concretes
- 3 Properties of polymer modified mortars and concretes
- 4 Applications of polymer modified mortars and concretes
- 5 Special polymer modified systems such as MDF cements antiwashout underwater concretes polymer ferrocements and artificial woods
