Polysaccharides Topics In Structure And Morphology:

Polysaccharides, Topics in Structure and Morphology E. D. T. Atkins, Edward David Thomas Atkins, 1985

Polysaccharides Severian Dumitriu, 2004-11-30 Completely revised and expanded to reflect the latest advancements in the field Polysaccharides Structural Diversity and Functional Versatility Second Edition outlines fundamental concepts in the structure function chemistry and stability of polysaccharides and reveals new analytical techniques and applications currently impacting the cosmetic medicinal chemical and biochemical industries The authoritative book discusses polysaccharides utilized in medical applications such as polysaccharide based hydrogels polysialic acids proteoglycans glycolipids and anticoagulant polysaccharides renewable resources for the production of various industrial chemicals and engineering plastics polysaccharides and more

Carbohydrate Chemistry and Biochemistry Michael

Sinnott, 2016-02-01 This fully updated and expanded second edition of a highly popular text book focuses on the structure and mechanism in carbohydrate chemistry and biochemistry Carbohydrates play important roles in biological systems as energy sources as structural materials and as informational structures when they are often attached to proteins or lipids Their chemical reactivity and conformational behaviour is governed by mechanistic and stereochemical rules which apply as much to enzymic as to non enzymic reactivity The same principles of reactivity and conformation govern changes brought about in the process industries such as pulp paper and food Extensively referenced with citations and a detailed index the book contains everything the reader needs to know to start a carbohydrate research project with one of the real strengths being the treatment and integration of the important physical chemical principles and methods though lead references only are given to the finer points of carbohydrate synthesis The book is suitable for both researchers who are new to the subject and those more established as well as a readership from diverse backgrounds and interests including chemists biochemists food scientists and technologists involved with the processing of polysaccharides in the paper textile cosmetics biofuels and other industries

Biomaterials David Byrom, 1991-06-18 Biomaterials are produced from biological material and are used for their physical characteristics This book looks at the range of biomaterials and their applications which range from the use of polysaccharides as thickening agents to the use of proteins as fibres and adhesives

Biopolymer Chemistry Olav

Smidsrød, Størker Moe, 2008-10 The book contains a description of the chemical structure of biological macromolecules their size and shapes conformation and how the structure and the conformation determine the physical properties of such molecules This book discusses the relationships between the chemical and physical properties of such molecules and their technological and bio medical properties It is designed for second or third year bachelor s students in chemistry or physics and for first year students in master s programmes in biochemistry biotechnology glycobiology and bio nanotechnology The book will be an asset for programmes for polymer chemistry and technology Professor Emeritus Olav Smidsrød Dr techn is a central figure at the Department of Biotechnology Norwegian University of Science and Technology where he also was the

director of the Norwegian Biopolymer Laboratory for 20 years Professor Smidsr d has published 200 scientific papers in international journals and was an editorial board member for three journals He holds 15 patents dealing with the production and bio medical uses of biopolymers He was granted knighthood to the order of St Olav and holds many academic distinctions for his research work Associate Professor St rker Moe Dr ing works at the Department of Chemical Engineering at the Norwegian University of Science and Technology where he is an expert in industrial wood chemistry He has published numerous papers in a wide range of topics related to wood chemistry such as cellulose chemistry and hemicellulose behaviour in pulping processes and lignin chemistry

Water and Biological Macromolecules Westhof,1993-08-16
Water and Biological Macromolecules presents an excellent description of the structural aspects of water molecules around biological macromolecules Topics discussed include the properties of water in solid and liquid states proteins nucleic acids polysaccharides and lipids and theoretical approaches for understanding the macroscopic observations and integrating microscopic descriptions The nature and roles of hydration forces in macromolecular complexation and cell cell interactions are explained in addition to phenomena such as entropy enthalpy compensation and the thermodynamic treatment of water bridging Water and Biological Macromolecules will be a valuable reference for biophysicists biochemists and macromolecular biologists

Pseudomonas Infection and Alginates Peter Gacesa,Nicholas J. Russell,2012-12-06 The concept of this book arose out of an international workshop which we organized and held at the University of Wales Conference Centre at Gregynog The workshop was the first occasion on which researchers from all the different disciplines concerned with the extracellular virulence factors of mucoid strains of Pseudomonas aeruginosa in relation to cystic fibrosis CF had met to discuss this multifaceted problem It was deemed a particularly timely moment to gather together experts for the exchange of facts ideas and hypotheses No formal abstracts were presented and no proceedings were published But during the succeeding months the organizers were persuaded by a number of participants that a wider audience should benefit from what had proved to be such a fruitful cross fertilization of expertise Thus we moved from being workshop organizers to book editors sure in the knowledge that at least we had a willing and enthusiastic set of contributors It should be stressed however that this book is not a transcript of that workshop Not all those participants are authors and some new names have been added Instead we have focused on alginate as an extracellular virulence factor of P aeruginosa in CF pulmonary infections Recent advances in the biochemistry and molecular genetics of alginate bio synthesis as well as in our understanding of the basic defect in CF and isolation of the gene mean that the book is even more timely than when first planned

The History of Cyclodextrins Grégorio Crini,Sophie Fourmentin,Eric Lichtfouse,2020-09-29 This book presents the historical development of Cyclodextrins by scientists who have made outstanding contribution to the field Cyclodextrins are safe cage like molecules that have found major applications in many industrial sectors such as medicine food agriculture environment and chemistry

Thermal Properties of Green Polymers and Biocomposites Tatsuko Hatakeyama,Hyo Hatakeyama,2006-01-27 From the

reviews This very well written new book is recommended to academic and industrial researchers and specialists interested in green polymers and mainly in their thermal properties This new and opportune book covers some important properties of green polymers and bio composites D Feldman Concordia University Montreal Canada Polysaccharides Edward David Thomas Atkins,1985 Carbohydrates ,2012-12-02 The series Methods in Plant Biochemistry provides an authoritative reference on current techniques in the various fields of plant biochemical research Each volume in the series will under the expert guidance of a guest editor deal with a particular group of plant compounds Each will describe the historical background and current most useful methods of analysis The volumes include detailed discussions of the protocols and suitability of each technique Case treatments diagrams chemical structures reference data and properties will be featured along with a full list of references to the specialist literature Conceived as a practical companion to The Biochemistry of Plants edited by P K Stumpf and E E Conn no plant biochemical laboratory can afford to be without this comprehensive and up to date reference source Aquaculture Zainal Muchlisin,2012-01-27 This book provides an understanding on a large variety of aquaculture related topics The book is organized in four sections The first section discusses fish nutrition second section is considers the application of genetic in aquaculture section three takes a look at current techniques for controlling lipid oxidation and melanosis in Aquaculture products The last section is focused on culture techniques and management which is the larger part of the book The book chapters are written by leading experts in their respective areas Therefore I am quite confident that this book will be equally useful for students and professionals in aquaculture and biotechnology

Novel Biodegradable Microbial Polymers E.A. Dawes,2012-12-06 The NATO Advanced Research Workshop from which this book derives was conceived during Biotec 88 the Second Spanish Conference on Biotechnology held at Barcelona in June 1988 The President of the Conference Dr Ricardo Guerrero had arranged sessions on bacterial polymers which included lectures by five invited participants who together with Dr Guerrero became the Organizing Committee for a projected meeting that would focus attention upon the increasing international importance of novel biodegradable polymers The proposal found favour with the NATO Science Committee and with Dr R Clinton Fuller and Dr Robert W Lenz as the co Directors Dr Edwin A Dawes as the Proceedings Editor and Dr Hans G Schlegel Dr Alexander J B Zehnder and Dr Ricardo Guerrero as members of the Organizing Committee the meeting quickly took shape To Dr Guerrero we owe the happy choice of Sitges for the venue a pleasant coastal resort 36 kilometres from Barcelona which proved ideal The sessions were held at the Palau de Maricel in appropriately impressive surroundings and invaluable local support was provided by Mr Jordi Mas Castella and by Ms Merce Piqueras Much of the preparatory work fell upon the broad shoulders of Mr Edward Knee whose efforts are deeply appreciated The Organizing Committee hopes that this Workshop will prove to be the first of a series which will aim to keep abreast of a rapidly expanding and exciting area of research that is highly relevant to environmental and industrial interests National Library of Medicine Current Catalog National Library of Medicine (U.S.),1988 *Annual*

Reports on NMR Spectroscopy, 1993-06-29 Annual Reports on NMR Spectroscopy Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **Conformation of Carbohydrates** V. S. R. Rao, 2019-08-22 This text will give the reader a firm understanding of all aspects of carbohydrate conformation by describing and explaining the importance of interactions between carbohydrates and interactions of carbohydrates with proteins nucleic acids or any other macromolecule The authors have gathered a wealth of information on carbohydrate structures different methods of conformational analysis the role of carbohydrates as recognition molecules in biological systems and their industrial applications Whether you are a student teacher or a basic researcher this text book is a one stop source of current information on carbohydrate conformation and the potential use of conformational properties in industry and also of their crucial role in important biological events such as cell cell interaction cell adhesion cellular signaling mechanism Chitin Neal S. Gupta, 2010-11-30 There are several books on properties of chitin and associated biomolecules and their biochemical significance However the present volume deals with a wide variety of biogeochemical and organic geochemical aspects of this vital macromolecule written by leading authors and experts in the field Each chapter is carefully peer reviewed and is an updated account of recent research in isotopic nanostructural biochemical microstructural geochemical paleontological and experimental aspects of chitin formation distribution and preservation in the environment and earth history Biochemistry David E. Metzler, Carol M. Metzler, 2001-03-23 *Biochemistry The Chemical Reactions of Living Cells* is a well integrated up to date reference for basic biochemistry associated chemistry and underlying biological phenomena Biochemistry is a comprehensive account of the chemical basis of life describing the amazingly complex structures of the compounds that make up cells the forces that hold them together and the chemical reactions that allow for recognition signaling and movement This book contains information on the human body its genome and the action of muscles eyes and the brain It also features thousands of literature references that provide introduction to current research as well as historical background twice the number of chapters of the first edition and each chapter contains boxes of information on topics of general interest Publisher description *Seafoods* Cesarettin Alasalvar, Tony Taylor, 2013-03-09 This book was developed mainly from the selected presentations and contributions made during the 3rd Biennial European Conference on Fish Processing in Grimsby UK 29th June 1st July 1999 which was sponsored by the Society of Chemical Industry University of Lincoln and North East Lincolnshire Council The book is divided into three sections preceded by an introductory chapter providing an overview of seafood quality technology and nutraceutical applications The first section Chaps 2 10 describes a range of aspects of seafood quality from the impact of slaughter procedures practical evaluation texture measuring fish content protein functionality histamine toxicity and flavour the second section Chaps 11 13 covers value added waste products automation in fish processing and water treatment the final section Chaps 14 16 discusses food and health applications of marine nutraceuticals functional foods Contributing to this volume are researchers from different countries who are well recognised

in their respective areas of expertise providing a diverse and global perspective of the issue of seafood quality technology and nutraceutical applications
