**Chemical News and Journal of Industrial Science** ,1895

**On the Origin of the Right to Copy** Ronan Deazley,2004-07-31 Taking as its point of departure the lapse of the Licensing Act 1662 in 1695 this book examines the lead up to the passage of the Statute of Anne 1709 and charts the movement of copyright law throughout the eighteenth century culminating in the House of Lords decision in *Donaldson v Becket* 1774 The established reading of copyright s development throughout this period from the 1709 Act to the pronouncement in *Donaldson* is that it was transformed from a publisher s right to an author s right that is

legislation initially designed to regulate the marketplace of the bookseller and publisher evolved into an instrument that functioned to recognise the proprietary inevitability of an author's intellectual labours. The historical narrative which unfolds within this book presents a challenge to that accepted orthodoxy. The traditional analysis of the development of copyright in eighteenth century Britain is revealed as exhibiting the character of long standing myth and the centrality of the modern proprietary author as the *raison d'être* of the copyright regime is displaced.

*Environmental Jurisdiction in the Law of the Sea* Victor Alencar Mayer Feitosa Ventura, 2020-07-28 This book assesses the environmental jurisdiction of coastal states over the seabed within and beyond 200 nautical miles from the baselines, thus mapping out coastal states' competencies to regulate activities impacting the marine environment of the sea floor. In addition, it offers revealing insights into the domestic legal and policy framework of a particular State in this regard. As Brazil intends to exploit mineral resources farther away offshore, technologically backed by the recognised expertise of its state-owned oil company Petrobras, questions arise as to the adequacy of the country's domestic legal framework to sustainably manage the immenseness of the Brazilian Blue Amazon. This book critically evaluates the compatibility of Brazil's national policies and legislation with the Law of the Sea, as well as the country's legal and institutional preparedness to face the challenges of managing approximately 4.5 million km<sup>2</sup> of maritime spaces under national jurisdiction.
