Poole Harbours:

The Ecology of Poole Harbour V.J. May, John Humphreys, 2005-08-24 Poole Harbour's unique combination of physical characteristics provide for a rich and productive ecological community recognised for its internationally significant bird populations and as a haven for the naturalisation of exotic species. But the Harbour is also exceptional in the extent to which it represents in microcosm the world wide tensions between environment and development. The contrasts are sometimes startling: the narrow Harbour entrance separates an unspoilt natural environment of considerable importance from an urban landscape where property competes with Manhattan and Hong Kong Island in the world wide table of real estate values. The Harbour serves as a port, fishing ground, a receiver of effluent and increasingly as a playground for the affluent. It also lies above Europe's largest on shore oil field. *The Ecology of Poole Harbour* brings together for the first time expert contributions in such a way as to provide a picture of the ecology of the Harbour system as a whole. It covers all the major habitats from reed beds and salt marshes to the extensive mudflats and unseen sub tidal regions while also examining in some detail a wide range of ecological phenomena and issues. First expert overview of ecology of Poole Harbour as a whole

Public Bills Great Britain. Parliament. House of Lords, 1905 *Harbour Ecology* John Humphreys, Alice E. Hall, 2022-11-15 Poole Harbour is protected and recognised nationally and internationally for its ecological importance. However it has also been classified as polluted and eutrophic. These twin designations, protected yet polluted, exemplify the condition of many estuaries making Poole Harbour an ideal subject for elucidating the circumstances behind this apparent paradox. The outcome of a conference entitled *Spotlight on Poole Harbour Environment Economics* organised by the Poole Harbour Study Group, this book comprises four main parts. Part I Background provides a broad introduction to the harbour in terms of its pre historical and historical significance for human communities and gives a conceptual overview of its modern character and uses. Part II Ecology contains chapters ranging from plankton to marine mammals. The subsequent parts focus on industries dependent on the biological and chemical ecological services of the estuary. Part III Fisheries covers recreational and commercial fishing and aquaculture, examining economic value and key shellfish species. Part IV Water Quality addresses those industries that require the harbour to remediate various effluents as well as some of the environmental consequences and noteworthy efforts to reduce such impacts. Part V Conclusion by the editors examines certain general shortcomings of environmental legislation and regulation manifest in the case of Poole Harbour. A central concern throughout is the question of sustainable development in coastal and marine contexts making this wide ranging study relevant well beyond the bounds of its primary geographical focus.
