welcomed by smaller nations of the region More pertinently the book addresses complexities and nuances of China's soft power instruments given the psycho cultural and geopsychological peculiarities of the South Asian region For this it focuses on how the Sino Pakistan axis constitutes a potential challenge to India's leadership role and influence in South Asia

Handbook of Energy Politics Jennifer I. Considine, Keun-Wook Paik, 2018 Starting with the fundamentals of the global energy industry *Handbook of Energy Politics* goes on to cover the evolution of capital and financial markets in the energy industry the effects of technology environmental issues and global warming and geopolitics The book concludes by considering the future including the lessons learned from history where we are most likely to be heading and what steps we can take to mitigate potential energy risks This Handbook will be an invaluable resource for upper level graduates and postgraduate scholars

The Palgrave Handbook of Managing Fossil Fuels and Energy Transitions Geoffrey Wood, Keith Baker, 2019-11-12 This Handbook is the first volume to comprehensively analyse and problem solve how to manage the decline of fossil fuels as the world tackles climate change and shifts towards a low carbon energy transition The overall findings are straight forward and unsurprising although fossil fuels have powered the industrialisation of many nations and improved the lives of hundreds of millions of people another century dominated by fossil fuels would be disastrous Fossil fuels and associated greenhouse gas emissions must be reduced to a level that avoids rising temperatures and rising risks in support of a just and sustainable energy transition Divided into four sections and 25 contributions from global leading experts the chapters span a wide range of energy technologies and sources including fossil fuels carbon

mitigation options renewables low carbon energy energy storage electric vehicles and energy sectors electricity heat and transport They cover varied legal jurisdictions and multiple governance approaches encompassing multi and inter disciplinary technological environmental social economic political legal and policy perspectives with timely case studies from Africa Asia Australia Europe North America South America and the Pacific Providing an insightful contribution to the literature and a much needed synthesis of the field as a whole this book will have great appeal to decision makers practitioners students and scholars in the field of energy transition studies seeking a comprehensive understanding of the opportunities and challenges in managing the decline of fossil fuels *China's Energy Efficiency and Conservation* Bin Su, Elspeth Thomson, 2016-04-07 This Brief identifies various aspects of energy challenges faced by the Chinese central local governments and also provides an opportunity to study how best to achieve green growth and a low carbon transition in a developing country like China The progress of China's carbon mitigation policies also has significant impacts on the on going international climate change negotiations Therefore both policy makers and decision makers in China and other countries can benefit from studying the challenges and opportunities in China's energy development Modern China's Foreign Policy Werner Levi, 1953-01-01 Modern China's Foreign Policy was first published in 1953 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions What are China's objectives in world affairs and what course will she pursue to achieve her goals These are the questions of vital concern to the Western democracies questions that can be approached intelligently only from a knowledge of how China's foreign policy has developed In this illuminating and carefully documented book Professor Levi analyzes China's attitudes and actions toward the rest of the world and clarifies many motivations behind her behavior past and present He traces the development of her foreign relations from the beginning of the modern era of Chinese contacts with Westerners a little more than hundred years ago The emphasis however is on the twentieth century and particularly on the years since the peace settlements of World War I The complex balance of relationships between China and the United States on the one hand and China and the Soviet Union on the other since the end of World War II is discussed in detail Communist doctrine notwithstanding its apparent rigidity is shown to be a conveniently adjustable tool capable of adaptation to the needs and strategies of present day China An integral part of the account is the attempt to single out and interpret the internal forces cultural social and economic that have influenced and shaped China's external policies Thus it is shown that the determinants of China's foreign policy have often been pressures and complexities within the country and that an understanding of the Chinese people and their traditions is essential to nations in their dealings with China *The Koreas between China and Japan* Lee Guen, Victor Teo, 2014-07-24 Most discussions pertaining to the nuclear proliferation and reunification issues on the Korean Peninsula privilege the position and role played by the United States In the first volume of its kind this collection of essays presents the challenges faced by the

Koreas against the context of the changing relations between China and Japan Strategically nestled between these political giants the Korean Peninsula has traditionally been seen as a sphere of influence by Tokyo and Beijing Regardless of the escalating difficulties in recent Sino Japanese relations this volume argues that avoiding all out conflict and ensuring a nuclear free Korean Peninsula are certainly strategic goals that both China and Japan still share Neither China nor Japan wishes to be dragged into a war started by North Korean belligerence South Korean aspirations or American adventurism However despite alternating between political pressure and diplomatic efforts Japan and China have found it extremely difficult to guide the tone and direction of politics in intra Korea affairs Conversely both South and North Korea have been extremely adept at fending off any perceived attempts to influence their domestic and foreign policies Pyongyang and Seoul have shown remarkable political gumption and diplomatic skill not only resisting Great Power influences but even managing to advance their political agendas in this very tempestuous neighbourhood One fundamental question this volume addresses is whether the developments on the Korean Peninsula could and should be considered independently from developments in Sino Japanese relations Through addressing different dimensions of the interaction between the Koreas China and Japan in the 21st Century this volume makes a valuable contribution to study of the international relations of Northeast Asia

China and the International System Xiaoming Huang, 2013 This book considers the evolving relationship between China and the international system and the interaction between a China of profound change in its identity capability and influence and an international system that is itself experiencing a process of far reaching transformation It develops an analytical framework that allows us to capture understand and explain a more dynamic pattern of agent structure interaction in China's relationship with the international system By demonstrating a more dynamic and mutually constitutive relationship between China and the international system the book explores the extent to which both transform themselves in the process and provides a fuller and more effective

assessment of the evolving nature of the relationship. Wind and Solar Energy Transition in China Marius Korsnes, 2019-09-25 This book explores the mobilisation of China's wind and solar industries and examines the implications of this development to energy generation and distribution innovation and governance. Unlike other publications that focus mainly on the formal policy landscape and statistics of industry development, this book delves deeper into the ways in which the wind and solar industries have evolved through negotiations made by the involved stakeholders and how these industries play into larger Chinese development and policymaking interests. Overall, it sheds new light on the strategic development of China's renewable energy industry, the flexible governance methods employed, and the internal struggles which Chinese local, regional, and central policymakers and state-owned and private enterprises have faced. This book will be of great relevance to students and scholars of renewable energy technologies, energy policy, and sustainability transitions, as well as policymakers with a specific interest in China.

Violence, Discourse, and Politics in China's Uyghur Region Pablo A. Rodríguez-Merino, 2022-12-30 This book investigates how Uyghur-related violent conflict and Uyghur ethnic minority identity, religion, and the Xinjiang region more broadly became constituted as a terrorism problem for the Chinese state. Building on securitization theory, Critical Terrorism Studies (CTS), and the scholarly definitional debate on terrorism, it develops the concept of terroristization as a critical analytical framework for the study of historical processes of threat construction. Investigating the violent events reported in Xinjiang since the early 1980s, the evolving discursive patterns used by the Chinese state to make sense of violent incidents, and the crackdown policies that the official terrorism discourse has legitimized, the book demonstrates how the securitization and later terroristization of Xinjiang and the Uyghurs is the result of a discursive and political choice of the Chinese state. The author reveals the contingent and unstable nature of such construction and how it problematizes the inevitability of the rationale behind China's war on terror, that has prescribed a brutal crackdown as the most viable approach to governing the tensions that have historically characterized China's rule over the Turkic Muslim ethnic minorities in Xinjiang. This book will be of

interest to scholars and students of the politics of contemporary China security and ethnic minority issues International Relations and Security as well as those adopting discursive approaches to the study of security notably those within the critical security and terrorism studies fields **Perceptions of China and White House Decision-Making, 1941-1963**
