## **Regime Unchanged:**

*Evaluating Policy Regimes* Ralph Bryant, Peter Hooper, Catherine L. Mann, 2010-12-01 Economists have long debated the theoretical merits for an individual nation and for a multi nation world economy of alternative approaches to the conduct of economic policy Yet theory alone cannot resolve the important issues at stake Only after the robustness of policy regimes has been carefully examined with empirical evidence will policymakers and economists be able to reach more of a consensus This pathbreaking volume takes major steps forward in meeting the need for a combination of theoretical and empirical evaluations of alternative policy regimes Bringing together individuals and groups doing pioneering research on macroeconomic interaction it explores what approach to monetary policy would lead to superior performance by individual national economies and the world economy as a whole Many parts of the book use the analytical techniques of stochastic simulation an evaluation procedure increasingly employed at the frontier of empirical economic analysis The book provides a summary of the key issues involved in evaluating policy regimes and clarifies the relationships among those issues The authors examine the stabilization properties of alternative monetary policy regimes and analyze how well various regime types perform in the face of unexpected shocks to national economies Among their conclusions they find that some simplified regimes for monetary policy are markedly less promising than others for achieving the stabilization objectives commonly sought by policymakers *Evaluating Policy Regimes* is another major installment in a continuing world wide research project sponsored by the Brookings Institution to improve empirical knowledge about the interdependence of national economies

*When Democracy Breaks* Archon Fung, David Moss, Odd Arne Westad, 2024-02-02 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations Democracy is often described in two opposite ways as either wonderfully resilient or dangerously fragile Both characterizations can be correct depending on the context When Democracy Breaks aims to deepen our understanding of what separates democratic resilience from democratic fragility by focusing on the latter The volume s collaborators experts in the history and politics of the societies covered in their chapters explore eleven episodes of democratic breakdown from ancient Athens to Weimar Germany to present day Russia Turkey and Venezuela Strikingly in every case various forms of democratic erosion long

preceded the final democratic breakdown Although no single causal factor emerges as decisive linking together all of the episodes some important commonalities including extreme political polarization explicitly anti democratic political actors and significant political violence stand out across the cases Moreover the notion of democratic culture while admittedly difficult to define and even more difficult to measure may play a role in all of them Throughout the volume the contributors show again and again that the written rules of democracy are insufficient to protect against tyranny While each case of democratic decay is unique the patterns that emerge shed much light on the continuing struggle to sustain modern democracies and to assess and respond to the threats they face *Asia-Pacific Financial Deregulation* Gordon De Brouwer, Wisarn

Pupphavesa, 2002-03-11 Recent events in East Asia have highlighted the risks of volatility and contagion in a financially integrated world Countries in the region had been at the forefront of the movement towards increased integration but the crisis that struck Thailand in July 1997 and the rapidity with which it spread to other East Asian nations suggested that all was not well Weaknesses in domestic financial intermediation poor corporate governance and deficient government responses to large capital inflows all played a role in the build up of vulnerability Asia Pacific Financial Deregulation provides an insight into financial liberalisation and structural reform in the region generally and as illustrated by a number of countries OECD/G20 Base Erosion and Profit Shifting Project Harmful Tax Practices – 2018 Peer Review Reports on the Exchange of Information on Tax Rulings Inclusive Framework on BEPS: Action 5 OECD, 2019-12-23 BEPS Action 5 is one of the four BEPS minimum standards which all Inclusive Framework members have committed to implement One part of the Action 5 minimum standard is the transparency framework for compulsory spontaneous exchange of information on certain tax rulings which in the absence of transparency could give rise to BEPS concerns Over 135 jurisdictions have joined the Inclusive Framework and take part in the peer review to assess their compliance with the transparency framework

*Comparative Company Law* Andreas Cahn, David C. Donald, 2018-10-04 When comparing the laws of different jurisdictions one often sees only the forest or the trees This is particularly problematic in comparative company law where students hope both to understand the overall framework of the law and grasp its practical application This text's structure now in its second edition solves that dilemma Chapters open with discursive analyses of the law in each of Germany the UK and the US Delaware the ABA Model Business Corporation Act and federal securities laws and set out the high level governing framework particularly for the EU and its member states This analysis is succinct and pointed with numerous references to both the law and leading scholarship The whole text is arranged to highlight comparative aspects Diagrams are used where helpful Chapters close with edited judicial decisions from at least two of the jurisdictions discussed which allows fresh exploration of comparison in more detail and pointed questions to guide class discussion **Urban Futures** Timothy J. Dixon, Mark Tewdwr-Jones, 2023-10-17 This book explores the history and evolution of city visions placing them in the wider context of art culture science foresight and urban theory **Varieties of Liberalism in Central America** Forrest D.

Colburn, Arturo Cruz S., 2009-06-03 Why do some countries progress while others stagnate Why does adversity strengthen some countries and weaken others Indeed in this era of unprecedented movement of people goods and ideas just what constitutes a nation state Forrest Colburn and Arturo Cruz suggest how fundamental these questions are through an exploration of the evolution of Guatemala El Salvador Honduras Nicaragua and Costa Rica over the last quarter of a century a period of intriguing often confounding paradoxes in Central America's development Offering an elegant defense of empiricism Colburn and Cruz explore the roles of geography and political choice in constructing nations and states Countries are shown to be unique there are a daunting number of variables There is causality but not the kind that can be revealed in the laboratory or on the blackboard Liberalism today defined as democracy and unfettered markets may be in vogue but it has no inherent determinants Democracy and market economies when welded to the messy realities of individual countries are compatible with many different outcomes The world is more pluralistic in both causes and effects than either academic theories or political rhetoric suggest

River Restoration Stephen Darby, David Sear, 2008-02-28 River restoration projects are designed to recreate functional

characteristics within a context of physical stability They tend to focus on the development and application of geomorphic principles for river restoration design Due to different models obtaining different results on the same problem incomplete or absent data and climatic social cultural changes the designers and managers of such projects frequently face high levels of uncertainty This book will provide a systematic overview of the issues involved in minimizing and coping with uncertainty in river restoration projects A series of thematic sections will be used to define the various sources of uncertainty in restoration projects and how these show at different points in the life cycle design construction and post construction phases of restoration projects The structure of the book will offer a rational theoretical analysis of the problem while providing practical guidance in managing the different sources of uncertainty A wide range of case studies will be included from Europe North America and Australasia

*Regional Economic Outlook, October 2018, Asia Pacific* International Monetary Fund. Asia and Pacific Dept, 2018-10-12 Growth in the first half of 2018 was softer than in 2017 especially in advanced economies In contrast growth remained robust in emerging market economies and broadly in line with expectations After rising to 6.9 percent in 2017 growth in China continued to be strong into the first half of 2018 but has likely slowed since given the latest high frequency indicators including weakening investment growth In Japan after exceeding potential for two years growth dropped into negative territory in the first quarter of 2018 before rebounding sharply in the second quarter In India growth continues to recover steadily after the disruptions related to demonetization and the rollout of the goods and services tax in the last fiscal year 1 And in ASEAN 4 economies Indonesia Malaysia the Philippines Thailand growth generally lost momentum in the first half of 2018 except in Thailand

*Supreme Courts Under Pressure* Pablo Bravo-Hurtado, Cornelis Hendrik van Rhee, 2021-03-13 This book discusses civil litigation at the supreme courts of nine jurisdictions Argentina Austria Croatia England and Wales France Germany Italy Spain and the United States and focuses on the available instruments used to keep the caseload of these courts within acceptable limits Such instruments are necessary in order to allow supreme courts to fulfil their main duties that is the administration of justice in individual cases private function and providing for the uniformity and development of the law within their respective jurisdictions public function If the number of cases at the supreme court level is too high the result is undue delays which are mainly problematic with regard to the private function It may also put the quality of the court's judgments under pressure which can affect its public and private function alike Thus measures aimed at avoiding excessive caseloads need to take both functions into account Increasing the capacity of the court to handle larger numbers of cases may result in the court being unable to adequately fulfil its public function since large numbers of court decisions make it difficult to guarantee the uniformity of the law and its development Therefore a balanced approach is needed to safeguard capacity and quality As shown by the contributions gathered here the nature of reform in this area is not the same everywhere There are a variety of reasons for this heterogeneity ranging from different understandings of the caseload problem itself local conceptions regarding the purpose of the Supreme Court and strong

entitlements concerning the right to appeal to budgetary restrictions and extremely rigid legislation The book also shows that the implementation of similar solutions to case overload such as access filters may have different effects in different jurisdictions The conclusion might well be that the problem of overburdened courts is multifactorial and context dependent and that easy one size fits all solutions are hard to find and perhaps even harder to implement **The Design of**
