Regional Cohesion And Competition In The Age Of Globalization:

Regional Cohesion and Competition in the Age of Globalization Hirota Kōno, Peter Nijkamp, Jacques Poot, 2000 This text discusses issues including the impact and implications of European expansion as well as developments in the Asia Pacific region It also examines the driving forces backgrounds obstacles and opportunities for regions to become powerful global players The work contains much empirical material and is supported by a thorough investigation of the theory and methodology of policy strategies for the positioning of regions in the new global economy *Regional Competition* Peter

W.J. Batey, Peter Friedrich, 2013-03-14 Many parts of the world are currently experiencing the outcome of processes of economic integration globalization and transformation Technological advances in telecommunications and in transport facilities have opened up new possibilities for contracts and exchanges among regions External effects among regions have increased in importance As a result competition among regions has intensified Except some pioneering work by regional scientists and scholars of public finance and economics the phenomenon of regional competition has yet to attract the attention it warrants despite its importance for policy making The present volume is intended to remedy this neglect by providing high level contributions to the three main topics of the book the theory of regional competition methods of analysis of regional competition and policies of regional competition International Encyclopedia of Human Geography , 2009-07-16

The International Encyclopedia of Human Geography provides an authoritative and comprehensive source of information on the discipline of human geography and its constituent and related subject areas The encyclopedia includes over 1 000 detailed entries on philosophy and theory key concepts methods and practices biographies of notable geographers and geographical thought and praxis in different parts of the world This groundbreaking project covers every field of human geography and the discipline's relationships to other disciplines and is global in scope involving an international set of contributors Given its broad inclusive scope and unique online accessibility it is anticipated that the International Encyclopedia of Human Geography will become the major reference work for the discipline over the coming decades The Encyclopedia will be available in both limited edition print and online via ScienceDirect featuring extensive browsing searching and internal cross referencing between articles in the work plus dynamic linking to journal articles and abstract databases making navigation flexible and easy For more information pricing options and availability visit http://info.sciencedirect.com/content/books/ref_works coming Available online on ScienceDirect and in limited edition print format Broad interdisciplinary coverage across human geography Philosophy Methods People Social Cultural Political Economic Development Health Cartography Urban Historical Regional Comprehensive and unique the first of its kind in human geography Open Regional Labour Market and Socio-Economic Development. New Frontiers of Policy Evaluation in Regional Science Yoshiro Higano, Lily Kiminami, Kenichi Ishibashi, 2022-06-02 This book is especially valuable for its policy evaluation studies using both a

theoretical model for policies carried out at national and regional levels and for gathering policy evaluation studies in diverse disciplines by empirical study Policy analysis shown here employs theoretical models such as an international trade model an optimal tariff and spatial reorganization At the same time factors in well being are taken into consideration with land development changes in migration and local economies by natural disasters validation of efficiency for emission control methods the relationship between cyberspace and physical space in urban networks and NPOs investment activities The empirical research reported in this volume analyzes Japan China and Asian Pacific cities In the case of Japan studies focus on the finances of local governments the real estate industry the role of consumer cooperatives in a food system and agriculture and its productivity in hilly and mountainous areas As well the effects of industrial clusters in megacities and investment in high speed railways and prediction of human behavior during an earthquake are studied In China s case studies focus on food policy and the effect of ecology and environment on migration policy For Asia Pacific cities studies show performance rankings of super cities in the region The book defines the frontier of policy evaluation following a middle path between theoretical study and empirical study with regard to evaluation In addition the book contributes to an understanding of the relationship between the goals and targets of sustainable development This book is highly recommended for graduate students policymakers and researchers concerned with policy evaluation

Innovation Clusters and Interregional Competition Johannes Bröcker,Dirk Dohse,Rüdiger Soltwedel,2012-11-02 Empirical evidence about cluster building the emphasis of new growth theory on innovation the recent interest in economic geography and the high pressure on politicians to establish favourable conditions for attracting dynamic industries have triggered a wave of research during the last decade trying to understand more deeply why how and where clusters emerge and what factors determine their respective success or failure In this volume the world s leading experts contribute to our understanding of regional innovation cluster formation and the factors influencing regional productivity and innovative performance It provides a timely and comprehensive picture on innovation location networks and clusters as important means in an environment of intensifying interregional competition

Regions, Land Consumption and Sustainable Growth O. A. L. C. Atzema,Piet Rietveld,Daniel Shefer,2005-01-01 This book provides an in depth investigation of the role of the private and public sectors in land markets and regional economics and explores the reasons behind government intervention in the interests of sustainable growth The authors explore the subject of regional development and changing land use in a variety of different countries They examine broad themes such as urban structure infrastructure and eco structure and look in detail at issues including housing transport and technology clustering They also demonstrate that for a proper understanding of long term changes the broader institutional settings and policy regimes are of critical importance as it is within this framework that private and public actors interact It is therefore vital to search for institutional arrangements where conflicts of interest can be dealt with in a constructive way and where ecological values are taken into consideration The contributions in this book highlight these difficulties and offer practical

proposals to improve current practices Regional scientists geographers and development policymakers will welcome this rigorous exploration of the roles of the private and public sectors in the context of economic development The Economics of Disappearing Distance Börje Johansson, 2019-09-18 This title was first published in 2003 This book focuses on the role of tangible and intangible networks that affect spatial interdependencies in economic and social life It addresses the question is the effect of distance disappearing In examining this question the book considers the types of interaction that bring about globalisation of markets as well as social life in general and the distortion of distance patterns and changes in spatial interdependencies The contributions elaborate theory and methods by examining hierarchical fields of internal and external influence on regional change sources of productivity growth in a network of industries endogenous growth and development policies The book concludes with an assessment of plan evaluation methodologies for a changing and globalizing world characterized by new economic networks and networking arrangements Handbook of Research Methods and Applications in Urban Economies Peter Karl Kresl, Jaime Sobrino, 2013-01-01 I highly recommend students teachers and researchers to enjoy reading this set of excellent papers Boris Graizbord El Colegio de México Mexico It is obvious that cities have long been the focus of analysis by the scholars and practitioners whose writings published in the Kresl Sobrino Handbook of Research Methods and Applications in Urban Economies The depth and excellence of the numerous topics examined reflects effective networking between the scholars involved their analyses of approaches problems and potentials of cities on the numerous continents and the continuing role of the Global Urban Competitiveness Project in encouraging the development of methodologies and data helpful in understanding the hard and soft determinants of the growth and decline of cities Pierre Paul Proulx Université de Montréal Canada This collection of essays provides a rich assortment of methods used to investigate the complex economic social environmental demographic and political systems in cities throughout the world It gives researchers lecturers and students a useful taste of the different ways of studying these phenomena in diverse urban settings Ivan Turok University of Glasgow UK In this timely Handbook seventeen renowned contributors from Asia the Americas and Europe provide chapters that deal with some of the most intriguing and important aspects of research methodologies on cities and urban economies The Handbook comprises five parts methodology continental distinctions positioning cities planning for the future and urban structures The methodologies section includes interviews empirical and theoretical approaches whilst continental distinctions offers contributions on China North America Europe Latin America and South Africa Positioning treats cities in the international context and relates them to economic and administrative spaces whilst planning includes general strategic economic planning as well as the experience of individual cities Finally the structures section refers to contextual and situational aspects of urban development Providing a comprehensive study of urban development and competitiveness this Handbook will strongly appeal to students wishing to gain a deeper understanding of research methods in urban economics urban studies and planning *The Romanian Journal of European*
