Regional Development In China States Globalization And Inequality:

Regional Development in China Yehua Dennis Wei, 2000 Regional Development in China Yehua Dennis Wei, 2013-04-15 This study systematically examines uneven regional development in China focusing on three central agents the foreign investor the state and the region Wei's findings have important implications for theories of and policy towards Chinese regional development This book is a vital resource for those with an interest in transition economies **Regional Inequality in Transitional China** Felix Haifeng Liao, Yehua Dennis Wei, Li Huang, 2020-09-17 This book investigates uneven regional development in China with particular focus on the cases of Guangdong and Zhejiang provinces which have been at the forefront of debate since Chinese economic reform Rapid economic growth since the opening up of China has been accompanied by significant disparities in the regional distribution of income this book represents one of the most recent studies to present a picture of this inequality Built upon a multi scale and multi mechanism framework it provides systematic examination of both the patterns and mechanisms of regional development and inequality in provincial China emphasizing the effects of economic transition Approaching from a geographical perspective its authors consider the interplay between the local the state and the global forces in shaping the landscape of regional inequality in China Extensive empirical findings will prove useful to those researching other developing countries within the frontier of globalization and economic transition Regional Inequality in Transitional China will appeal to scholars and students of geography economics and Chinese studies more broadly *Globalizing Regional Development in East Asia* Henry Wai-chung Yeung, 2013-09-13 Significant historical and geographical differences account for the many processes and trajectories of regional development in East Asia These historical and geographical specificities in East Asia have prompted serious re examination of existing theories in regional development and in particular the new regionalism approach associated with such ideas as the learning region institutional thickness relational assets and regional innovation system This book brings together a group of leading researchers specializing in local and regional development in East Asian economies Through in depth empirical studies of specific regions and localities these authors offer fresh and innovative perspectives on how regions evolve and develop over time in the world's most dynamic macro regional economy In particular their work points to the critical importance of local and trans local processes in shaping regional development trajectories The book is timely given that the debate on the nature and dynamics of regional development in both academic and policy circles has now moved on From the earlier focus on endogenous regional assets such as localized networks of association and trust scholars and policymakers are now analyzing the complex relationship between economic globalization and regional change This high calibre collection makes a significant contribution to the literature on local and regional development in Asia and provides an important resource for researchers students and policy makers interested in East Asia This book was published as a special issue of Regional Studies *Innovation and Regional Development in China* Ingo Liefner, Yehua Dennis Wei, 2013-07-24 Although China is now the

factory of the world there is no reason to expect that it will always be content with manufacturing labor intensive goods for foreign corporations Scholars must now ask What is the current level of innovation in China And how can we face this challenge and renovate industrial production and innovation capacities in developed countries This edited volume investigates the unique characteristics of Chinese innovation and regional development China s policy framework and the role that transnational corporations play in China s increasing innovation activities This book contributes to the heated debate regarding pathways for technology progress and regional development in developing countries and identifies the ways in which local production networks respond to different configurations of external linkages Linking patterns of global and local production networks with the trajectories of technology development and regional development allows the authors to theorize and test whether and how particular configurations of production networks generate divergent long term local productivity growth and technological development outcomes Innovation and Regional Development in China will be of interest to geographers economists China specialists development specialists and scholars working on innovation and regional development in developing areas and transition countries

State Collaboration and Development Strategies in China Alexius Pereira,2003-09-02 This book looks at Singapore and China to examine governmental collaboration on a foreign direct investment oriented strategy Focusing on the unique collaborative venture the Suzhou Industrial Park project the author explores the economic political and social relationships between Singapore and China throughout the course of the scheme as well as discussing why certain strategies were adopted how they were implemented and their outcomes

China's Governmentalities Elaine Jeffreys,2009-09-10 Contributes to emerging studies of governmentality in non western and non liberal settings by showing how neoliberal discourses on governance development education the environment community religion and sexual health have been raised in other contexts This book opens discussions of governmentality to other worlds and the global politics of the present

Translocal China Tim Oakes,Louisa Schein,2006-08-21 Inter disciplinary in approach this collection of essays explores China s reform era development within the concept of translocality A key element of spatial change in today s China has been the unprecedented geographic mobility of millions of labour migrants tourists brides entrepreneurs and many others But translocality doesn t just mean people It is crucially constituted by the circulation of capital ideas images goods styles services and disease to name but a few With contributions from well respected China specialists the essays focus simultaneously on mobilities and localities drawing our attention to the multiplying forms of mobility in China whilst retaining the importance of localities in people s lives The book provides a clear path to understanding the importance of translocality as a concept along with concrete examples of its operation in China Unique in approach it is at once a study of the connections between location and culture politics economics bodies gender and technology

China's Embedded Activism Peter Ho,Richard Edmonds,2007-10-19 In recent years China has been remarkable in achieving extraordinary economic transformation yet without fundamental political change To many observers

this would seem to imply a weakness in Chinese civil society However though the idea of democracy as multitudes of citizens taking to the streets may be attractive it is simultaneously misleading as it disregards the nature of political change taking place in China today a gradual shift towards a polity adapted to a pluralist society At the same time one may wonder what the limited political space implies for the development of a social movement in China This book explores this question by focusing on one of the most active areas of Chinese civil society the environment China's Embedded Activism argues that China's semi authoritarian limitations on the freedom of association and speech coupled with increased social spaces for civic action has created a milieu in which activism occurs in an embedded fashion The semi authoritarian atmosphere is restrictive of but paradoxically also conducive to nationwide collective action with less risk of social instability and repression at the hand of the governing elite Rich in case studies about environmental civic organizations in China and written by a team of international experts on social movements NGOs democratization and civil society this book addresses a wide readership of students scholars and professionals interested in development geography and environment political change and contemporary Chinese society

Locating China Jing Wang, 2007-05-07 Taking a multidisciplinary approach this volume examines the relationship between space and the production of local popular culture in contemporary China The international team of contributors examine the inter relationship between the cultural imaginary of a given place and China's continuing drive towards urbanization This has led to the development of new spaces and places and new forms of spatial practices that destabilize old concepts of the local and locality Delivering ethnographic observations and theoretical speculations this work furthers our understanding of the link between spatial thinking and the production of consumer culture in China

China's Evolving Industrial Policies and Economic Restructuring Zheng Yongnian, Sarah Y. Tong, 2014-07-11 In the past three decades China has successfully transformed itself from an extremely poor economy to the world's second largest economy The country's phenomenal economic growth has been sustained primarily by its rapid and continuous industrialisation Currently industry accounts for nearly two fifth of China's gross domestic product and since 2009 China has been the world's largest exporter of manufactured products This book explores the question of how far this industrial growth has been the product of government policies It discusses how government policies and their priorities have developed and evolved examines how industrial policies are linked to policies in other areas such as trade technology and regional development and assesses how new policy initiatives are encouraging China's increasing success in new technology intensive industries It also demonstrates how China's industrial policies are linked to development of industrial clusters and regions

China's Thought Management Anne-Marie Brady, 2012-02-06 China's Thought Management argues that by re emphasizing and modernizing propaganda and thought work since 1989 the CCP has managed to overcome a succession of local and national level crises the Tiananmen Square protests of 1989 the impact of the collapse Socialism in the Eastern bloc SARS ethnic clashes in Tibet and Xinjiang to name but a few emerging re strengthened and as dominant in Chinese society as

ever The contributors to this book address such crucial issues as the new emphasis on economic propaganda the continued importance of the PLA propaganda system in China s overall propaganda work and political stability how the CCP uses Confucianism in its foreign and domestic propaganda and new approaches to mass persuasion such as campaigns of mass distraction Each chapter is a case study of the multiple ways in which the CCP has modified and adjusted its propaganda to reflect China s changed economic and political environment Challenging readers to reconceptualise mainstream understandings of the CCP s hold on power and the means the CCP government adopts to maintain its authority to rule this book will be invaluable reading for anyone interested in the Chinese media and Chinese politics

Choosing China's Leaders Chien-wen Kou,Xiaowei Zang,2013-10-08 Political elites are a key topic in contemporary China studies and have been investigated in relation to factional politics generation politics technocracy and crucially institutionalization The institutionalization of elite replacement began in China in the 1980s and quickly accelerated after the early 1990s as mechanisms emerged to regulate political elites entry and exit including age limits term limits and step by step promotion By examining the various processes of elite selection this book explores the role played by institutionalization in elite recruitment promotion and turnover in China While existing studies have developed our understanding of Chinese elite politics two key puzzles regarding institutionalisation remain Although institutionalisation is recognised as an important trend in Chinese politics there is as yet no theoretical framework to explain the forces that have brought about and sustained this Further it is unclear how the process of institutionalisation has impacted on factional politics and how factions would continue to operate within the parameters of formal politics Drawing on a wide range of studies this book looks at Politburo members senior People s Liberation Army officers provincial leaders heads of major central state owned enterprises and Youth League affiliates to provide a comprehensive understanding of elite recruitment and mobility in contemporary China This book will be of great interests to students and scholars of Chinese politics and government Chinese studies and Asian politics more broadly

New Mentalities of Government in China David Bray,Elaine Jeffreys,2016-01-13 China continues to transform apace flowing from the forces of deregulation privatization and globalization unleashed by economic reforms which began in late 1978 The dramatic scope of economic change in China is often counterposed to the apparent lack of political change as demonstrated by continued Chinese Communist Party CCP rule However the ongoing dominance of the CCP belies the fact that much has also changed in relation to practices of government including how authorities and citizens interact in the management of daily life New Mentalities of Government in China examines how the privatization and professionalization of public service provision is transforming the nature of government and everyday life in the People s Republic of China PRC The book addresses key theoretical questions on the nature of government in China and documents the emergence of a range of new mentalities of government in China Its chapters focus on areas such as clinical trials conceptualizing government consumer activity elite philanthropy lifestyle and beauty advice public health social work volunteering and urban and rural

planning Offering a topical examination of shifting modes of governance in contemporary China this book will appeal to scholars in the fields of anthropology history politics and sociology

China's Reforms and International Political Economy David Zweig,Zhimin Chen,2009-05-21 Written by an international team of experts this important and interesting text gives vital insights into China's likely development and international influence in the next decade

Small Town China Beatriz Carrillo Garcia,2011-04-19 While much has been written about rural migrant workers experiences in the big cities population movements into China's vast network of towns and small cities has been largely neglected This book presents a detailed case study of rural migrant workers experiences in a small town in a north China county The author explores the processes and institutions that enable or preclude the social inclusion of rural workers into the town's socio economic system Inclusion and exclusion are assessed through an examination of rural workers immersion into the urban labour market their access to welfare benefits and to social services such as housing education and health The book proposes that outside the larger cities there are alternative accounts of urban social change and of the integration of rural migrant workers It stresses the fact that the particular socio economic structure of towns where the state owned share of the economy has been smaller and where consequently social and private forces have been more active allowed for a more open inclusion of rural workers Though shortcomings are still observed the book suggests that China's transformation may not necessarily result in dysfunctional and socially polarized urban environments This book will be of interest to students and scholars of China's rural migrant workers bottom up urbanization and small town development social policy and more broadly on contemporary social change in China

Rural Policy Implementation in Contemporary China Anna Ahlers,2014-01-10 At the turn of the millennium the disparities between rural and urban livelihoods underdevelopment and administrative shortcomings in the Chinese countryside were increasingly seen as posing a manifest threat to social harmony and economic and political stability At that time the term three rural problems sannong wenti was coined which defined the main issues of rural life that needed to be targeted by government action agriculture nongye villages nongcun and farmers nongmin In turn with the launch of the 11th Five Year Plan in 2006 a pledge was made to shift the focus of developmental efforts to the long neglected countryside which is still home to half of the Chinese population This book presents an analysis of adaptive local policy implementation in China in the context of the Building of a New Socialist Countryside BNSC policy framework Based on intensive field work in four counties in Fujian Jiangxi Shaanxi and Zhejiang Provinces between 2008 and 2011 it offers detailed analyses of the form and impact of county governments strategic agency at certain stages and within certain fields of the implementation process for example the design of local BNSC programs the steering of project funding implementation and evaluation the establishment of model villages and the management of public participation Further this study illustrates that BNSC is far more than the empty slogan described by many observers when it was launched in 2005 2006 Instead it has already brought about considerable shifts in terms of the process and outcomes of rural policy implementation Altogether the

results of this research challenge existing paradigms by showing how against the background of contemporary approaches to rural development and recent reforms initiated by the central state local bureaucracies strategic agency can actually push forward effective albeit not necessarily optimal policy implementation to some extent which serves the interests of central authorities local implementors and rural residents By tying into the larger debates on China's state capacity and authoritarian adaptability this book enriches our understanding of the inner workings of the Chinese political system As such it will prove invaluable to students and scholars of Chinese politics public policy and development studies more generally

Negotiating Ethnicity in China Chih-yu Shih, 2003-08-29 This challenging study brings together anthropology and political science to examine how ethnic minorities are constructed by the state and how they respond to such constructions Disclosing endless mini negotiations between those acting in the name of the Chinese state and those carrying the images of ethnic minority this book provides an image of the framing of ethnicity by modern state building processes It will be of vital interest to scholars of political science anthropology and sociology and is essential reading to those engaged in studying Chinese society

International Aid and China's Environment Katherine Morton, 2006-05-17 Rapid economic growth in the world's most populous nation is leading to widespread soil erosion desertification deforestation and the depletion of vital natural resources The scale and severity of environmental problems in China now threaten the economic and social foundations of its modernization Using case studies Morton analyzes the relationship between international and local responses to environmental problems in China challenging the prevailing wisdom that weak compliance is the only constraint upon local environmental management in China It advances two interrelated discussions first it constructs a conceptual framework for understanding the key dimensions of environmental capacity This is broadly defined to encompass the financial institutional technological and social aspects of environmental management Second the book presents the results of an empirical inquiry into the implementation of donor funded environmental projects in both China's poorer and relatively developed regions By drawing upon extensive fieldwork it seeks to explain how and under what conditions international donors can strengthen China's environmental capacity especially at the local level It will be of interest to those studying Chinese politics environmental studies and international relations

Young Chinese in Urban China Alex

Cockain, 2012-08-21 This book examines the condition of being a young person in China and the way in which changes in various dimensions of urban life have affected Chinese youths' quests to understand themselves The author examines social factors such as changes in the physical construction of urban neighbourhoods changes in family life including reduced family size increasing rates of divorce and increased physical mobility of the family unit school life and mounting pressure to perform well in examinations and be a good student access to foreign and domestic media as well as access to the internet Drawing on the fields of social and cultural anthropology Alex Cockain shows that the process of self understanding in a changing spatial social and cultural world involves ongoing disjointed efforts to achieve a sense of security and belonging on

the one hand and a degree of increased autonomy in their relationships with for example parents and teachers on the other
This book will appeal to anyone interested in Chinese Society Social and Cultural Anthropology Asian Anthropology and
