Regional Worlds: Advancing the Geography of Regions Martin Jones, Anssi Paasi, 2017-10-02 A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of region This idea prioritises both the intellectual and the practical development of regional studies This book drives the discussion further It stresses the complex forms of agency advocacy involved in the production and reproduction of regional spaces and space of regionalism as well as the importance of geohistory and context The book moves beyond the territorial relational divide that has characterized debates on regions and regional borders since the 1990s The contributors answer key questions from different conceptual and concrete contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by various actors to maintain or transform the contested spatialities of societal power relations This book was based on a special issue of *Regional Studies*

Multi-Ethnic Societies Nicholas Tarling, Edmund Terence Gomez, 2008-03-03 The controversial work of Amy Chua argues that as rapid modernization industrialization technological change and globalization bring about fundamental changes in national ethnic and class identities especially in developing countries there is a danger that the laissez faire capitalist system will cause serious racial conflagration especially in societies where there is ethnic minority market dominance combined with ethno nationalist type politicians who mobilize support from ethnic majority communities by drawing attention to inequalities in wealth distribution This controversial work goes on to argue for an authoritarian political system with curbs against the corporate expansion of enterprises owned by ethnic minorities until parity in equity ownership among all communities is achieved This book tests the assumptions behind these arguments discussing ethnic communities identity economy society and state and the links between them in a range of countries in East Asia Southeast Asia and the Pacific and diaspora communities of Asian peoples in the West It demonstrates that identity transformation occurs as generations of minority communities succeed each other that old discourses of fixed origins which are assumed to bind ethnic communities into cohesive wholes do not apply that there are very extensive inter linkages in the daily activities of people of different ethnic and religious backgrounds that affirmative action type policies along racial lines can undermine overall societal cohesion and that there is no case for limiting democracy until economic equity is achieved This is a rich important book with huge implications for economic development and for states throughout the world as multi ethnic societies world wide become more extensive and more complicated **Dividing the Land** Edward T. Price, 1995-04-15 Many property lines drawn in

early America still survive today and continue to shape the landscape and character of the United States Surprisingly though no one until now has thoroughly examined the process by which land was divided into private property and distributed to settlers from the beginning of colonization to early nationhood In this unprecedented study Edward T Price covers most areas of the United States in which the initial division of land was controlled by colonial governments the original thirteen colonies and Maine Vermont Kentucky West Virginia Tennessee Louisiana and Texas By examining different land policies and the irregular pattern of property that resulted from them Price chronicles the many ways colonies managed land to promote settlement develop agriculture defend frontiers and attract investment His analysis reveals as much about land planning techniques carried to America from Europe as innovations spurred by the unique circumstances of the new world Price's analysis draws on his thorough survey of property records from the first land plans in Virginia in 1607 to empresario grants in Texas in the 1820s This breadth of data allows him to identify regional differences in allocating land assess the impact of

land planning by historical figures like William Penn of Pennsylvania and Lord Baltimore of Maryland and trace changes in patterns of land division and ownership through transfers of power among Britain the Netherlands France Spain Mexico and the Republic of Texas *Just Democracy* Philippe Van Parijs,2014-12-01 Philippe Van Parijs is one of the world s leading political philosophers In this book he argues that the purpose of democracy should be to promote justice we need not just democracy in the sense of unqualified democracy but a just democracy Machiavelli and Rawls must be brought together In a series of provocative and timely essays he explores what creating such a just democratic political system would involve in order to tackle such issues as intergenerational justice multiculturalism and linguistic diversity He illustrates his arguments with examples drawn from the European Union and his native Belgium *Calvinists Incorporated* Anne Kelly Knowles,1997-02 Bringing immigrants onstage as central players in the drama of rural capitalist transformation Anne Kelly Knowles traces a community of Welsh immigrants to Jackson and Gallia counties in southern Ohio After reconstructing the gradual process of community building Knowles focuses on the pivotal moment when the immigrants became involved with the industrialization of their new region as workers and investors in Welsh owned charcoal iron companies Setting the southern Ohio Welsh in the context of Welsh immigration as a whole from 1795 to 1850 Knowles explores how these strict Calvinists responded to the moral dilemmas posed by leaving their native land and experiencing economic success in the United States Knowles draws on a wide variety of sources including obituaries and community histories to reconstruct the personal histories of over 1 700 immigrants The resulting account will find appreciative readers not only among historical geographers but also among American economic historians and historians of religion *Historical Dictionary of Brussels* Paul F. The Minorities of Cyprus Nicholas Coureas, Marina Elia, Andrekos Varnava, 2009-05-27 This book examines the various minorities living in the island of Cyprus from the early modern late Venetian and early Ottoman period down to the present day It charts their history with special emphasis on their relations with the powers ruling Cyprus and with the two dominant Christian Greek and Muslim Turkish communities The theme running through the book is that despite being significant members of Cyprus society the three historical minorities Maronites Armenians and Latins were only included in society to a certain extent by the two major communities This was formalised in the post independence 1960 period when they were compelled to become members of either dominant community and thus they suffered internal exclusion by being regarded as religious sub groups of one of the two dominant communities rather than national minorities in their own right Within this general context the social legal and political roles customs culture and language of the various minorities are examined as they evolved through time and in response to internal and external developments affecting Cyprus in the political economic and global spheres They are discussed not as static entities but as evolving groups that have adapted with greater or lesser degrees of success to the radical and at times painful changes Cyprus has undergone especially over the last 150 years in all walks of life Finally the question of what the future holds for the minorities of the island in the light of Cyprus EU

membership and the prospect of reunification are also analysed This book is a product of the conference Minorities of Cyprus Past Present and Future which was held on 24 and 25 November 2007 at the European University Cyprus **Human**

Defending French in Flanders, 1873-1974 David J. Hensley, 2023-12-28 This book examines the efforts of the French speaking minority in Flanders Belgium to maintain a legal and social presence of the French language in Flemish public life Chronologically the study is bookended by two developments almost exactly a century apart In 1873 the first laws were passed which required the use of Dutch in some aspects of public administration in Flanders challenging the de facto use of French among the Flemish ruling class One hundred and one years later the last French daily newspaper in Flanders collapsed marking the end of a once vibrant French language public sphere in Flanders The author contends that the methods and arguments by which French speakers defended the role of French in Flemish public life changed along with the social and political situation of this minority As the Flemish movement grew over the course of the twentieth century French speakers appeals to the free choice of language lost traction and they put forward claims that they represented an ethnolinguistic minority who deserved protection for their mother tongue Providing new insights for scholars of European

history and in conversation with the literature on liberalism national identity and Francophonie this book demonstrates how the debate over the role of French in Flanders was at the center of Belgium's ethnolinguistic conflict the repercussions of which continue to be felt to this day *The Party Politics of Territorial Reforms in Europe* Emanuele Massetti, Simon Toubeau, 2020-07-24 The book analyses how political parties compete and strategise on the issue of territorial reform using case studies that include countries from both Western Belgium Germany Italy and Spain and Central Eastern Europe Poland Slovakia and Romania Each case study considers different drivers of decentralization such as territorial identities and the demands of regionalist parties for territorial autonomy or independence efficiency concerns related to issues of uneven economic development and economic competitiveness the pressure from supra national organizations especially the EU as well as different combinations of these drivers They also consider how the ideology and organisation of state wide parties and the institutional context in which they compete shape their responses to these drivers and their strategy towards the question of territorial reform This collection investigates the logic of the actions that guide political parties strategy to highlight trends that are apparent across the case studies This book was originally published as a special issue of West European Politics

The Belgian Army and Society from Independence to the Great War Mario Draper, 2018-02-13 This book explores Belgian state building through the prism of its army from independence to the First World War It argues that party politics which often ran along geographical linguistic and religious lines prevented both Flemings and Walloons from reconciling their regional identities into a unified concept of Belgian nationalism Equally it obstructed the army from satisfactorily preparing to uphold Belgium's imposed neutrality before 1914 Situated uneasily between the two powerhouses of nineteenth century Europe Belgium offers a unique insight into the concepts of citizenship and militarisation in a divided society in the era of fervent nationalism By examining the composition experience and image of the army's officer corps and rank and file as well as those of the auxiliary forces this book shows that although military and civilian society often stood aloof from one another the army as a national institution offered a fleeting glimpse into the dichotomy that was pre war Belgium

Urban Regimes and Strategies A. G. Papadopoulos, 1996-11-15 If a city based its planning decisions on the needs of an international bureaucracy rather than on the traditional needs of local residents and businesses how would that city change Alex G Papadopoulos addresses this question with a detailed study of how the nineteenth century quarters of Leopold and Nord Est in Brussels have been transformed materially and functionally since the European Communities decided to locate their administrative headquarters there in 1957 Drawing on game and rational choice theories spatial analysis and urban morphology studies Papadopoulos analyzes how the landscape of Brussels's center has evolved over the last three decades under the influence of successive coalitions of local and foreign elites He describes how international real estate developers form ephemeral flexible and specialized regimes of cooperation with governmental organizations at all levels and with special interest lobbies to carry out major urban projects while local neighborhood groups conservationists

and political factions such as the Green Party oppose them with qualitatively similar regimes of resistance **Culture, Identity and Nationalism** Timothy Baycroft, 2004 This study examines the evolution of national and regional cultural and political identities in that northern region of France which borders Belgium over the two centuries which followed the French Revolution During that time the region was transformed by the development of the industrial economy population shifts war and occupation and numerous changes of political regime Through an analysis of a wide range of issues including language regional and national political movements educational policy attitudes towards immigrants and the border the press trade unions and the church as well as the attitude of the French State the author questions traditional interpretations of the process of national assimilation in France At the same time he illustrates how the Franco Belgian border originally an arbitrary line through a culturally homogeneous region became not only a significant marker for the identity of the French Flemish but a real cultural division TIMOTHY BAYCROFT is lecturer in French history University of Sheffield
