New Developments in Quantitative Psychology Roger E. Millsap,L. Andries van der Ark,Daniel M. Bolt,Carol M. Woods,2014-02-04 The 77th Annual

International Meeting of the Psychometric Society IMPS brought together quantitative researchers who focus on methods relevant to psychology. The conference included workshops, invited talks by well-known scholars, and presentations of submitted papers and posters. It was hosted by the University of Nebraska Lincoln and took place between the 9th and 12th of July 2012. The chapters of this volume are based on presentations from the meeting and reflect the latest work in the field. Topics with a primarily measurement focus include studies of item response theory, computerized adaptive testing, cognitive diagnostic modeling, and psychological scaling. Additional psychometric topics relate to structural equation modeling, factor analysis, causal modeling, mediation, missing data methods, and longitudinal data analysis, among others. The papers in this volume will be especially useful for researchers, graduate students, and other quantitative researchers in the social sciences who use quantitative methods, particularly psychologists. Most readers will benefit from some prior knowledge of statistical methods in reading the chapters.

*Extreme Hydrology and Climate Variability* Assefa Melesse, Wossenu Abtew, Gabriel Senay, 2019-07-03. Extreme Hydrology and Climate Variability: Monitoring, Modelling, Adaptation, and Mitigation is a compilation of contributions by experts from around the world who discuss extreme hydrology topics from monitoring to modeling and management. With extreme climatic and hydrologic events becoming so frequent, this book is a critical source adding knowledge to the science of extreme hydrology. Topics covered include hydrometeorology, monitoring, climate variability, and trends; hydrological variability and trends; landscape dynamics; droughts; flood processes and extreme events; management, adaptation, and mitigation. Each of the book's chapters provides background and theoretical foundations, followed by approaches used and results of the applied studies. This book will be highly used by water resource managers and extreme event researchers who are interested in understanding the processes and teleconnectivity of large-scale climate dynamics and extreme events, predictability, simulation, and intervention measures. It presents datasets used and methods followed to support the findings, including allowing readers to follow these steps in their own research. It provides variable methodological approaches, thus giving the reader multiple hydrological modeling information to use in their work. It includes a variety of case

studies thus making the context of the book relatable to everyday working situations for those studying extreme hydrology Discusses extreme event management including adaption and mitigation Advanced Tools for Studying Soil Erosion Processes Hamid Reza Pourghasemi,Narges Kariminejad,2024-08-17 Advanced Tools for Studying Soil Erosion Processes Erosion Modelling Soil Redistribution Rates Advanced Analysis and Artificial Intelligence presents the most recent technologies and methods in quantifying soil erosion focusing on quantitative geomorphological assessment soil erosion interaction with natural and man made hazards using new methods and technologies that employ GIS remote sensing RS spatial modeling and machine learning tools as an effective plan for decision makers and land users Organized into three parts 1 Erosion processes and impacts 2 Advanced computing techniques to quantify soil erosion and 3 Methods of Soil Erosion this book will be an invaluable source material for researchers academicians graduate and undergraduate students and professionals in the field of geology specifically focused on geographic information systems and remote sensing Provides an overview of soil erosion and its interaction with natural hazards i e geological hydrological meteorological and biological Introduces advanced tools and technologies in soil erosion management Presents future soil erosion opportunities and challenges **Drought Policies: Case Studies on Mega-droughts for the High Level Experts and Leaders Panel on Water and Disasters (HELP)** Jerome Delli Priscolli ,Kenzo Hiroki ,2019-11-15 This book focuses on mega droughts of the past 20 years Twelve cases from both developed and developing countries are elaborated in the book Its intention is to draw lessons from the cases of extremely severe water shortages so that countries and stakeholders can be better prepared for extreme drought events in the future Several recurrent themes emerge from the diverse case studies and descriptions of programs For example most chapters discuss the necessity to move from reactive compensatory to preventive policies This theme has implications for use of insurance in developing countries e g is insurance encouraging investments to help countries avoid disasters or is it acting mostly in a humanitarian way to compensate for losses to help people Several authors point to the importance of risk assessment and to developing risk based policies for drought This raises statistical issues of how such assessments of uncertainty and risks are done and how they relate to actual occurrence of events Most chapters call for more inter sectoral policies policies which integrate water resources management approaches and to the necessity of raising public awareness of droughts in times of no drought The issue of structural versus nonstructural is clear in most cases While often cast as either or the message that emerges is more one of how do you integrate these approaches Finally a few chapters bring to light how prevention is needed for national security as well as water security In Focus a book series that showcases the latest accomplishments in water research Each book focuses on a specialist area with papers from top experts in the field It aims to be a vehicle for in depth understanding and inspire further conversations in the sector
