Brown, Michael Renner, Brian Halweil, 2014-04-08 This ninth annual edition of Vital Signs takes the world s pulse by compiling a wide ranging collection of trends that identify both problems and progress in the quest for a sustainable society It highlights both alarming situations and encouraging developments Part One is a comprehensive presentation of the key indicators in areas such as food agriculture energy atmosphere economics transport and the military Part Two provides in depth special feature articles on environmental features such as transgenic crops and paper recycling economic features such as environmental taxes and corporate mergers and social features such as tuberculosis prisons and women in politics **Decisions of the World Court relevant to the UN Convention on the Law of the Sea [electronic resource]** Barbara Kwiatkowska, 2002-05-07 This pioneering publication provides A Reference Guide to the significant

contributions of decisions of the World Court as the principal judicial organ of the United Nations and the world's most senior Court with the broadest material jurisdiction to the development of the law of the sea as a part of the global system of peace and security The Guide is dedicated to the Court's former President Stephen M Schwebel in appreciation of his belief that it is important for the Court to further explore its pre-eminently unique role throughout the Third Millennium Whereas the format of specific entries covered by this Reference Guide largely corresponds to the Parts and Annexes of the 1982 UN Law of the Sea Convention UNCLOS and the 1994 Part XI Agreement the heading of each entry also contains as appropriate references to the 1930 League of Nations Hague Draft the four 1958 UN Geneva Conventions and the 1995 UN Straddling Stocks Agreement as well as to the 1972 UN Stockholm the 1992 Rio UNCED and the 2002 Johannesburg instruments This will enable the reader to relate the Court's decisions to the respective UNCLOS provisions as originated from and as implemented by these global framework instruments at various stages of codification and progressive development of the law of the sea The entries cover principally Judgments and Orders including the related pleadings of the PCIJ and the ICJ and those decisions of Arbitral Tribunals and other third party fora as well as national courts which have been relied upon in the Court's jurisprudence In addition the recent decisions of the ITLOS and some other fora such as the Annex VII Southern Bluefin Tuna Singapore v Malaysia Barbados Trinidad and Tobago Guyana Suriname and the Mox Plant Arbitral Tribunals as well as references to treaties are also listed under specific entries as appropriate Tables of Cases and Treaties will importantly facilitate the use of A Reference Guide It has proven to be an indispensable tool for the Judges and governmental and other practitioners in furthering the coherent development of the law of the sea by international courts and tribunals on the one hand and for international community of academics in the adequate assessing of this development on the other hand

The Legitimacy of International Regimes Helmut Breitmeier, 2016-12-05 How legitimate are outcomes outputs and impacts of global environmental regimes Can non state actors contribute to improve the output and input oriented legitimacy of global environmental governance Helmut Breitmeier responds to these questions balancing the volume with both theoretical and empirical chapters The theoretical and conceptual chapters illustrate the relevance and meaning of legitimacy as well as the impact of non state actors on environmental governance They also describe various methodological issues involved with the coding of 23 environmental regimes The empirical chapters are based on the findings of the International Regimes Database IRD They explore whether problem solving in international regimes is effective and equitable and the influence of a regime's contribution to how states comply with international norms These chapters also analyze whether non state actors can improve the output and input oriented legitimacy of global governance systems **Global Environment Outlook 2000** United Nations Environment Programme (Unep), 2013-11-05 The continued poverty of the majority of the planet's inhabitants and excessive consumption by the minority are the two major causes of environmental degradation The present course is unsustainable and postponing action is no longer an option Inspired political leadership

and intense cooperation across all regions and sectors will be needed to put both existing and new policy instruments to work. From the Synthesis Global Environment Outlook 2000 GEO 2000 is a comprehensive and authoritative review and analysis of environmental conditions around the world. It is the flagship publication of the world's leading environmental organization, the United Nations Environment Programme (UNEP), and is based on information provided by more than 30 regional and international collaborating centres. The book presents a region by region analysis of the state of the world's environment, highlighting key global concerns and making recommendations for policy action. The regions covered include Africa, Asia, and the Pacific, Europe and Central Asia, Latin America and the Caribbean, North America, West Asia, and the Polar Areas. Chapter 1, Global Perspectives, describes the main drivers of environmental change, such as the economy, population growth, political organization, and regionalization, as well as potential impacts of recent global developments, including the growth of the consumer culture, trade, and international debt. Chapter 2, The State of the Environment, provides a global and region by region overview of the environment at the end of the second millennium. The chapter covers global issues such as ozone, climate change, El Niño, and nitrogen loading, and universal issues of land and food, forests, biodiversity, freshwater, marine, and coastal areas, atmosphere, and urban areas. Chapter 3, Policy Responses, reviews the broad range of policy instruments and responses being used to address environmental issues, including multilateral environmental agreements, and analyses the difficulties of compliance, implementation, and assessment. Chapter 4, Future Perspectives, looks at environmental issues that will require priority attention in the 21st century and some alternative policy options that could be used in the regions. Chapter 5, Outlook and Recommendations, makes recommendations for future action based on the environmental legacy left by past and present policy and management systems. GEO 2000 will be the benchmark reference and guide to the state of the global environment. Written in clear, non-technical language and supported throughout by informative graphics and tables, it is essential reading for all those involved in environmental policy making, implementation, and assessment, and for researchers and students of regional and global environmental issues. Global Environment Outlook 2000
United Nations Environment Programme, 1999. This volume provides a comprehensive and detailed analysis of the conditions of the global environment, highlighting key global concerns and making recommendations for policy action. **Vanishing**

Borders Hilary French, 2013-11-05. National governments are ill equipped for tackling transnational environmental problems from ozone depletion to soaring trade in commodities like timber and shrimp. As these issues climb higher on the political agenda, industrial and developing countries are on a collision course over climate change and water shortages. Goods, money, microbes, pollution, people, and ideas are crossing global boundaries evermore frequently. The implications for our future and for the health of the planet are profound. This text describes what we need to do to cope with the challenge. **Multilateral**
