Regreening The National Parks

Karen R. Jones

Regreening The National Parks:

Regreening the National Parks Michael Frome, 1992 What has happened to our national parks Overcrowding and commercialization are commonplace and with the increase in visitation has come not only congestion but crime Yet visitor enjoyment seems to be a higher priority of those who manage the parks than the protection and perpetuation of natural systems How could this have happened Michael Frome one of the most outspoken and highly regarded observers of our national parks here shows how the original mission of the National Park Service has been undermined by politicization and bureaucratization Regreening the National Parks tells how the Park Service has been transformed from a professional to a political agency and in the process has betrayed its own values by emphasizing recreation and short order wilderness served like fast food rather than the preservation of the nation's natural heritage Frome has drawn on both official documents and personal interviews to examine the policies and personalities behind the scenes at the National Park Service He cites instances of personnel being forbidden to criticize public policy in which they found a conflict with conservation principles and contends that as the Park Service has become more bureaucratic those for whom the environment deeply matters scarcely rise within its ranks In considering the environmental abuse rampant today Frome sees national parks as models of respect for nature and concludes his book with a ten point program toward realizing that ideal

Regreening the National Parks Michael Frome, 1992 Shows how the original mission of the National Park service has been undermined by commercialization and politicization in an argument that will evoke controversy as the service celebrates its seventy fifth anniversary

Reshaping Our National Parks and Their Guardians Kathy Mengak, 2012 This biography of the seventh director of the National Park Service brings to life one of the most colorful powerful and politically astute people to hold this position George B Hartzog Jr served during an exciting and volatile era in American history Appointed in 1964 by Secretary of the Interior Stewart Udall he benefited from a rare combination of circumstances that favored his vision which was congenial with both President Lyndon Johnson's Great Society and Udall's robust environmentalism Hartzog led the largest expansion of the National Park System in history and developed social programs that gave the Service new complexion During his nine year tenure the system grew by seventy two units totaling 27 million acres including not just national parks but historical and archaeological monuments and sites recreation areas seashores riverways memorials and cultural units celebrating minority experiences in America In addition Hartzog sought to make national parks relevant and responsive to the nation's changing needs

American Indians and National Parks Robert H. Keller, Michael F. Turek, 1999-05-01 Many national parks and monuments tell unique stories of the struggle between the rights of native peoples and the wants of the dominant society These stories involve our greatest parks Yosemite Yellowstone Mesa Verde Glacier the Grand Canyon Olympic Everglades as well as less celebrated parks elsewhere In *American Indians and National Parks* authors Robert Keller and Michael Turek relate these untold tales of conflict and collaboration *American Indians and National Parks* details specific

relationships between native peoples and national parks including land claims hunting rights craft sales cultural interpretation sacred sites disposition of cultural artifacts entrance fees dams tourism promotion water rights and assistance to tribal parks Beginning with a historical account of Yosemite and Yellowstone American Indians and National Parks reveals how the creation of the two oldest parks affected native peoples and set a pattern for the century to follow Keller and Turek examine the evolution of federal policies toward land preservation and explore provocative issues surrounding park Indian relations When has the National Park Service changed its policies and attitudes toward Indian tribes and why How have environmental organizations reacted when native demands such as those of the Havasupai over land claims in the Grand Canyon seem to threaten a national park How has the Park Service dealt with native claims to hunting and fishing rights in Glacier Olympic and the Everglades While investigating such questions the authors traveled extensively in national parks and conducted over 200 interviews with Native Americans environmentalists park rangers and politicians They meticulously researched materials in archives and libraries assembling a rich collection of case studies ranging from the 19th century to the present In American Indians and National Parks Keller and Turek tackle a significant and complicated subject for the first time presenting a balanced and detailed account of the Native American national park drama This book will prove to be an invaluable resource for policymakers conservationists historians park visitors and others who are concerned about preserving both cultural and natural resources *Our National Parks and the Search for Sustainability* Bob R.

O'Brien,2011-01-20 A study of the US National Park Service s efforts to allow for as many visitors as possible in the parks that are kept in as natural a state as possible Yosemite Valley in July of 1967 would have had to be seen to be believed There was never an empty campsite in the valley you had to create a space for yourself in a sea of cars tents and humanity The camp next to ours had fifty people in it with rugs hung between the trees incense burning and a stereo set going full volume Scenes such as this will probably never be repeated in Yosemite or any other national park yet the urgent problem remains of balancing the public s desire to visit the parks with the parks need to be protected from too many people and cars and too much development In this book longtime park visitor and professional geographer Bob O'Brien explores the National Park Service s attempt to achieve sustainability a balance that allows as many people as possible to visit a park that is kept in as natural a state as possible O'Brien details methods the NPS has used to walk the line between those who would preserve vast tracts of land for no use and those who would tap the Yellowstone geysers to generate electricity His case studies of six western crown jewel parks show how rangers and other NPS employees are coping with issues that impact these cherished public landscapes including visitation development and recreational use [Exploring Our National Parks and Sites](#) Russell

D. Butcher,1997-05-01 The essential guide to the land and history of the US national historical parks and sites It is the sequel to Exploring National Parks and Monuments *Science and Ecosystem Management in the National Parks* William L.

Halvorson,Gary E. Davis,2023-01-10 Our national parks are more than mere recreational destinations They are repositories

of the nation's biological diversity and contain some of the last ecosystem remnants needed as standards to set reasonable goals for sustainable development throughout the land. Nevertheless, public pressure for recreation has largely precluded adequate research and resource monitoring in national parks, and ignorance of ecosystem structure and function in parks has led to costly mistakes such as predator control and fire suppression that continue to threaten parks today. This volume demonstrates the value of ecological knowledge in protecting parks and shows how modest investments in knowledge of park ecosystems can pay handsome dividends. *Science and Ecosystem Management in the National Parks* presents twelve case studies of long-term research conducted in and around national parks that address major natural resource issues. These cases demonstrate how the use of longer time scales strongly influence our understanding of ecosystems and how interpretations of short-term patterns in nature often change when viewed in the context of long-term data sets. Most importantly, they show conclusively that scientific research significantly reduces uncertainty and improves resource management decisions. Chosen by scientists and senior park managers, the cases offer a broad range of topics including air quality at Grand Canyon, interaction between moose and wolf populations on Isle Royale, control of exotic species in Hawaiian parks, simulation of natural fire in the parks of the Sierra Nevada, and the impact of urban expansion on Saguaro National Monument. Because national parks are increasingly beset with conflicting views of their management, the need for knowledge of park ecosystems becomes even more critical, not only for the parks themselves but for what they can tell us about survival in the rest of our world. This book demonstrates to policymakers and managers that decisions based on knowledge of ecosystems are more enduring and cost-effective than decisions derived from uninformed consensus. It also provides scientists with models for designing research to meet threats to our most precious natural resources. If we can learn to save the parks, observe Halvorson and Davis, perhaps we can learn to save the world. National Parks, Alfred Runte, 1997-01-01. This third edition includes a new essay on recent environmental issues and concerns, especially as they center on Yellowstone National Park.

Parkscapes, Thomas R. H. Havens, 2010-11-30. Japan today protects one seventh of its land surface in parks, which are visited by well over a billion people each year. *Parkscapes* analyzes the origins, development, and distinctive features of these public spaces. Green zones were created by the government beginning in the late nineteenth century for state purposes but eventually evolved into sites of negotiation between bureaucrats and ordinary citizens who use them for demonstrations, riots, and shelters as well as recreation. Thomas Havens shows how revolutionary officials in the 1870s seized private properties and converted them into public parks for educating and managing citizens in the new emperor-sanctioned state. Rebuilding Tokyo and Yokohama after the earthquake and fires of 1923 spurred the spread of urban parklands both in the capital and other cities. According to Havens, the growth of suburbs, the national mobilization of World War II, and the post-1945 American occupation helped speed the creation of more urban parks, setting the stage for vast increases in public green spaces during

Japan's golden age of affluence from the 1960s through the 1980s. Since the 1990s the Japanese public has embraced a heightened ecological consciousness and become deeply involved in the design and management of both city and natural parks, realms once monopolized by government bureaucrats. As in other prosperous countries, public-private partnerships have increasingly become the norm in operating parks for public benefit, yet the heavy hand of officialdom is still felt throughout Japan's open lands. Based on extensive research in government documents, travel records, and accounts by frequent park visitors, *Parkscapes* is the first book in any language to examine the history of both urban and national parks of Japan. As an account of how Japan's experience of spatial modernity challenges current thinking about protection and use of the nonhuman environment globally, the book will appeal widely to readers of spatial and environmental history as well as those interested in modern Japan and its many inviting green spaces. Regreening the Built Environment Michael A. Richards, 2024-09-18. Now in its second volume, *Regreening the Built Environment* provides an overview of physical and social environmental challenges that the planet is facing and presents solutions that restore ecological processes, reclaim open space, foster social equity, and facilitate a green economy. Healing the planet requires a combination of strategies networked across multiple scales of development, including buildings, sites, communities, and regions. Case studies from a range of locations in the United States, Denmark, Vietnam, Germany, South Korea, Switzerland, France, and the United Kingdom, among others, demonstrate how existing gray infrastructure can be retrofitted with green infrastructure and low-impact development techniques. From this, the author shows how a building can be designed that creates greenspace or generates energy; likewise, a roadway can be a parkway, an alley can be a wildlife corridor, and a parking surface can be a garden. This new edition also includes case studies that have successfully reconnected communities that were fragmented by unjust planning practices and irresponsible patterns of development; resilient design solutions in response to natural disasters; passive design strategies that can make interior spaces more efficient and healthier; and expanded discussions on capturing carbon, renewable energy, agriculture waste, public transit, and adaptive reuse, including innovative ideas on how to reimagine the shopping mall in the era of e-commerce. The strategies presented in this book will stimulate discussions within the design profession and will be of great interest to students and practitioners of environmental studies, architecture, landscape architecture, and urban design.

The Environmental Case Judith A. Layzer, Sara R. Rinfret, 2023-06-05. Answers to environmental issues are not black and white. Debates around policy are often among those with fundamentally different values, and the way that problems and solutions are defined plays a central role in shaping how those values are translated into policy. *The Environmental Case* captures the real-world complexity of creating environmental policy, and this much-anticipated Sixth Edition contains 14 carefully constructed cases, including a new study of the Salton Sea crisis. Through her analysis, Sara Rinfret continues the work of Judith Layzer and explores the background, contributing factors, and outcomes of each case, giving readers insight into some of the most interesting and controversial issues in U.S. environmental policymaking. Biodiversity and

Human Rights: The International Rules for the Protection of Biodiversity Elli Louka, 2021-11-22 The author of this study proposes a fundamental review of biodiversity protection policies Instead of conservation preservation a shift to attention to ecosystem management with human rights and human dignity at the center is recommended This study prescribes a comprehensive system for the protection of biodiversity Human rights standards free trade in wildlife and regulated free access to plant genetic resources are proposed as the elements of this system Practitioners and scholars concerned with environmental issues human rights and sustainable development problems will find this work of great interest Published under the Transnational Publishers imprint

Petrified Forest National Park George M. Lubick, 1996-04 Yellowstone Yosemite the Grand Canyon a few American national parks enjoy amusement park status eclipsing many other beautiful and significant parks due to their heavy political support and spectacular sights Visitors to Petrified Forest National Park in northeastern Arizona can escape from the litter snack bars and crowds of the recreational parks to a 200 million year old ecosystem locked in stone Enhanced by the unrivaled colorful beauty of the adjacent Painted Desert Petrified Forest National Park has captivated visitors since the area was discovered by early explorers The history of the huge fossilized forest parallels that of Arizona It was discovered and looted by adventurers and largely ignored by the government until President Theodore Roosevelt made it a national monument in 1906 The forest's location along Route 66 brought a large number of visitors during the time it enjoyed only monument status but lack of funding for protection allowed much damage and theft of fossilized wood Petrified Forest National Park A Wilderness Bound in Time speeds the reader on an ancient ecological journey from the time of dinosaurs to the discovery of their Triassic fossils and on through a century of political maneuvering to create a place for the forest in American history George Lubick describes how a dedicated few understood the environmental importance as well as the unique beauty of the park's Triassic Chinle Formation and the Painted Desert Nearly a million people visit the Triassic annually this environmental history of the ancient forest is important for those who know the park as well as those interested in natural America Petrified Forest National Park is one of the few complete histories of any national park a well told balanced treatment of the environmental political and historical factors that shape America's natural history

A Symbol of Wilderness Mark W. T. Harvey, 2011-10-01 Harvey details the first major clash between conservationists and developers after World War II the successful fight to prevent the building of Echo Park Dam The dam on the Green River was intended to create a recreational lake in northwest Colorado and generate hydroelectric power but would have flooded picturesque Echo Park Valley and threatened Dinosaur National Monument straddling the Utah Colorado border near Wyoming

Wolf Mountains Karen R. Jones, 2002 This book documents the changing tenets of landscape preservation and species protection in preserves of the United States and Canada through a capacious study of canine history

BOOK JACKET **Still the Wild River Runs** Byron E. Pearson, 2002 Between 1963 and 1968 environmentalists were outraged when western water interests sought to construct two dams in

Grand Canyon as part of the Central Arizona Project The Sierra Club led a national campaign opposed to the project which most environmental historians credit with defeating the dams In the wake of its victory the Sierra Club has been lauded as the savior of Grand Canyon Byron Pearson now takes a closer look at history to show that the Sierra Club's ability to mobilize public opinion did not appreciably influence Congress where the issue was actually decided When Arizona congressman Stewart Udall became Interior Secretary in 1960 he promoted a plan to import water from the Pacific Northwest to California in order to placate that state's opposition to the CAP with its proposed dams When this support dissolved in the face of resistance from Washington senator Henry Jackson who chaired the Senate Interior Committee the pragmatic Udall sought passage of a bare bones CAP bill without the dams before he and Arizona senator Carl Hayden retired Despite this congressional deal making the Sierra Club received credit for blocking the dams and was propelled to the undisputed leadership of the environmental movement Using the myth that it had saved the Canyon the club transformed its image of power into real political influence after Congress passed the National Environmental Policy Act in 1970 giving environmental advocates access to the policy making process for the first time In revealing how the Sierra Club played a much lesser role in blocking the dams than they would have had the public believe Pearson contrasts the ways in which the controversy unfolded in the court of public opinion versus the actual political process He takes readers into congressional chambers and conference rooms reconstructing the legislative process to convey the full flavor of this political give and take Based on research in archives from all over the country Still the Wild River Runs will itself be a subject of controversy as it challenges long standing notions about the power of environmental lobbies By putting this chain of historical events in clearer perspective it can give citizens concerned with future causes a better understanding of the political process and what really moves it

With Distance in His Eyes Scott Raymond Einberger, 2018-04-16 One of America's most significant architects of conservation and the environment Stewart Udall comes to life in this environmental biography Perhaps no other public official or secretary of the interior has ever had as much success in environmental protection natural resource conservation and outdoor recreation opportunity creation as Udall A progressive Mormon born and raised in rural Arizona Udall served as the U S Secretary of the Interior under the presidential cabinets of John F Kennedy and Lyndon Baines Johnson from 1961 1969 During these eight years he established dozens of new national park units and national wildlife refuges wrote the Endangered Species Preservation Act lobbied for unpolluted water and offered ways to beautify urban spaces and bring the impoverished out of poverty Later in life he continued as an advocate for conservation and the environment specifically by proposing solutions to the challenges associated with global warming and the widespread use of oil What can we learn from this farsighted individual In a day and age of partisan politics poor congressional approval ratings and global warming and climate change this captivating biography offers a profound and historical record into Udall's life long devotion to environmental issues he cared about most deeply issues more relevant today than they were then Intimate moments include

Udall's learning of the Kennedy assassination his push for civil rights for African Americans his meeting in the U S S R with Nikita Khrushchev the first Kennedy cabinet member to do so and his warnings about global warming 50 years prior to Al Gore's Nobel Prize winning film
