The Reichmanns Anthony Bianco,1997 **Religion and Contemporary Management** Arthur J. Wolak,2016-11-21 Although few might think of Moses as a leader in the contemporary business and political sense Moses is not only among the most significant leaders in Western civilization but is also arguably the quintessential example of a powerful leader from whom much can be learned by anyone entering and occupying leadership positions Various types of leadership approaches are considered that have been advocated by scholars over the past century Moses example as described in the Bible is analyzed to assert why Moses approach makes for an appropriate and compelling form of leadership today While present leadership and management vocabulary might differ from the Hebrew Bible many of the notions advocated by modern leadership theorists appear to parallel major behaviors traits functions experiences and actions ascribed to Moses especially in the first five books of the Hebrew Bible Anyone can view Moses through the lens of a particular religion whether shared or not and still learn considerably from the experience One will find Moses depicted as heroic charismatic and certainly empathic Yet Moses also shows transactional transformational and visionary leadership qualities Hence Religion and Contemporary Management discerns why Moses represents such an important model of effective leadership for contemporary times

A History of Homebuilders from Early Modern to Modern Times William C. Baer,2024-11-30 A History of Homebuilders from Early Modern to Modern Times provides a diachronic account of homebuilders more than 500 years history in the Anglosphere nations of the U S Britain Canada and Australia The comparative absence of individual homebuilders histories in the literature despite builders importance in providing our dwellings and over 70% of our entire urban built environments is surprising Part One introduces homebuilders from several perspectives These are useful for evaluating the homebuilders whose histories are presented in Part Two and in providing a balanced understanding of homebuilders and the societal value of what they do The actual albeit brief histories of mainly large homebuilders for more than 500 years in Part II supply historians with some particulars of homebuilder attitudes practices ingenuity and resourcefulness in how they operated over the centuries with a modest trending to community building rather than just housebuilding Part Three specifically focuses on the following evolutionary changes in homebuilding

practices 1 increasing standardization of dwelling components 2 increasingly institutionalized sources of financial assistance and 3 changes in production scale Three technical appendices on dates of homebuilder firsts in practices in conceptualizing housing markets and some government regulations follow with a fourth appendix on homebuilders organizational changes over the centuries

Developing Alberta's Oil Sands Paul Anthony Chastko, 2004 Alberta's oil sands represent

a vast and untapped oil reserve that could reasonably supply all of Canada's energy needs for the next 475 years. With an estimated 300 billion barrels of recoverable oil at stake, the quest to develop this natural resource has been undertaken by many powerful actors both nationally and internationally. Using research that integrates the economic, political, scientific, and business factors that have been influential in discovering and developing the sands, this book provides a comprehensive history of the oil sands project and a window on the nature of the complex relationships between industry, government, and transnational players. This book is the first comprehensive volume that examines the origins and development of the oil sands industry over the last century.

City for Sale Chester Hartman, 2002-10-01 San Francisco is perhaps the most exhilarating of all American cities; its beauty, cultural and political avant-gardism, and history are legendary, while its idiosyncrasies make front-page news. In this revised edition of his highly regarded study of San Francisco's economic and political development since the mid-1950s, Chester Hartman gives a detailed account of how the city has been transformed by the expansion outward and upward of its downtown. His story is fueled by a wide range of players and an astonishing array of events, from police storming the International Hotel to citizens forcing the mid-air termination of a freeway. Throughout, Hartman raises a troubling question: can San Francisco's unique qualities survive the changes that have altered the city's skyline, neighborhoods, and economy? Hartman was directly involved in many of the events he chronicles and thus had access to sources that might otherwise have been unavailable. A former activist with the National Housing Law Project, San Franciscans for Affordable Housing, and other neighborhood organizations, he explains how corporate San Francisco obtained the necessary cooperation of city and federal governments in undertaking massive redevelopment. He illustrates the rationale that produced BART, a subway system that serves upper-income suburbs but few of the city's poor neighborhoods, and cites the environmental effects of unrestrained high-rise development, such as powerful wind tunnels and lack of sunshine. In describing the struggle to keep housing affordable in San Francisco and the seemingly intractable problem of homelessness, Hartman reveals the human face of the city's economic transformation.
