Anchorage Zone Reinforcement for Post-tensioned Concrete Girders John Edward Breen, 1994 Building Code Requirements for Structural Concrete (ACI 318-05) and Commentary (ACI 318R-05) ACI Committee 318, 2005 **PCI Post-tensioning Manual** Prestressed Concrete Institute, 1972 **Building Code Requirements for Structural Concrete (ACI 318-08) and Commentary** ACI Committee 318, American Concrete Institute, 2008

The quality and testing of materials used in construction are covered by reference to the appropriate ASTM standard specifications. Welding of reinforcement is covered by reference to the appropriate AWS standard. Uses of the Code include adoption by reference in general building codes and earlier editions have been widely used in this manner. The Code is written in a format that allows such reference without change to its language. Therefore background details or suggestions for carrying out the requirements or intent of the Code portion cannot be included. The Commentary is provided for this purpose. Some of the considerations of the committee in developing the Code portion are discussed within the Commentary with emphasis given to the explanation of new or revised provisions. Much of the research data referenced in preparing the Code is cited for the user desiring to study individual questions in greater detail. Other documents that provide suggestions for carrying out the requirements of the Code are also cited.
