Roberts, 2019-01-03 Can scientific explanation ever make reference to God or the supernatural The present consensus is no indeed a naturalistic stance is usually taken to be a distinguishing feature of modern science Some would go further still maintaining that the success of scientific explanation actually provides compelling evidence that there are no supernatural entities and that true science from the very beginning was opposed to religious thinking Science without God Rethinking the History of Scientific Naturalism shows that the history of Western science presents us with a more nuanced picture Beginning with the naturalists of ancient Greece and proceeding through the middle ages the scientific revolution and into the nineteenth century the contributors examine past ideas about nature and the supernatural Ranging over different scientific disciplines and historical periods they show how past thinkers often relied upon theological ideas and presuppositions in their systematic investigations of the world In addition to providing material that contributes to a history of nature and naturalism this collection challenges a number of widely held misconceptions about the history of scientific naturalism **Postcolonial Theory and the Arab-Israel Conflict** Philip Carl Salzman, Donna Robinson Divine, 2021-04-26 Postcolonial theory is one of the main frameworks for thinking about the world and acting to change the world Arising in academia and reshaping humanities and social sciences disciplines postcolonial theory argues that our ideas about foreigners the other particularly our negative ideas about them are determined not by a true will to understand but rather by our desire to conquer dominate and exploit them According to postcolonial theory the cause of poverty tyranny and misery in the world and of failed societies around the world is Euro American imperialism and colonialism Previously published as a special issue of Israel Affairs this work examines and challenges postcolonial theory In scholarly research based papers the specialist authors examine various facets of postcolonial theory and application First the theoretical assumption and formulations of postcolonial theory are scrutinized and found dubious Second the deleterious impact on academic disciplines of postcolonial theory is demonstrated Third the distorted postcolonial view of history its obsession with current events to the exclusion of the historical basis of events is exposed and corrected Fourth an examination of Middle Eastern culture challenges the assumption that these societies have been shaped entirely and victimized by Western intrusion Finally exploring the Arab Israel conflict the one sided case of postcolonial Arabism is explored and found to be faulty Radical History Review:

The Promise of Contemporary Primatology

Erin P. Riley,2019-08-19 This book argues for a contemporary primatology that recognizes humans as integral components in the ecologies of primates This contemporary primatology uses a broadened theoretical lens and methodological toolkit to study primate behavior and ecology in increasingly anthropogenic contexts and seeks points of intersection and spaces for collaborative exchange across the natural sciences social sciences and humanities The book begins by exploring the American tradition of anthropology providing historical and disciplinary context for the emergence of field primatology and how it became a part of this tradition It then examines how primatology transformed into a field dominated by evolutionary approaches and highlights how the increasingly anthropogenic environments in which primates live present opportunities to understand primate adaptability at work In doing so it explores how an extended evolutionary approach can help explain behavioral variation in these contemporary environments Focus is then given to the ethnoprimateological approach a contemporary approach that provides a pluralistic framework drawing from the natural and social sciences and humanities needed to study human primate coexistence in the Anthropocene Finally the book considers how such a crossing of disciplines can inform primate conservation in the future An important interdisciplinary reassessment this book will be of significant interest to primatologists biological anthropologists and scholars of anthropology more generally as well as evolutionary and conservation biologists

Envelopes of Sound Ronald J. Grele,1991-09-30 What is it that oral historians do Prior to the publication of Envelopes of

Sound oral history was regarded as an archival practice and interviews were considered the repositories of data. Envelopes shows that the interview is a series of dialectical relationships embedded in language social practice and historical imagination. It merges theory and method through the analysis of the basic structures of the interview. It incorporates new thinking on the nature of narrative and conversation and it covers new ground in examining fieldwork in a number of disciplines. While strongly theoretical it also has direct application in conducting oral history interviews. Ronald Grele is the dean of oral history in the United States and Envelopes of Sound is the volume by which others will continue to be judged. Its contributions to methods and to meaning are still the place to start a serious discussion whether with scholars or with high school students interviewing their grandparents. Paul M Buhle Director Oral History of the American Left New York University. Grele's early groundbreaking book on oral history remains a classic. It continues to challenge the practitioner to be more self-conscious of and attentive to the nuances of the oral history interview. Sherna Berger Gluck Director Oral History California State University Long Beach. What is it that oral historians do? Prior to the publication of Envelopes of Sound oral history was regarded as an archival practice and interviews were considered the repositories of data. Envelopes shows that the interview is a series of dialectical relationships embedded in language social practice and historical imagination. It calls upon oral historians to begin to step back to think seriously about what it is they do and to ask what kind of documentation it is that they produce and how they can make it better. This volume merges theory and method through the analysis of the basic structures of the interview. It incorporates new thinking on the nature of narrative and conversation and it covers new ground in examining fieldwork in a number of disciplines. While strongly theoretical it also has direct application in conducting oral history interviews. It moves from relatively easy and simple considerations to increasingly complex issues. Envelopes of Sound can be used by a variety of students in disciplines ranging from history and sociology to anthropology and contemporary literature and it can be used in a variety of ways to raise issues on a number of theoretical levels.

Ethnography George Spindler,Lorie Hammond,2012-10-12 This volume focuses on and exemplifies how ethnography a research tool devoted to looking at human interaction as a cultural process rather than individual psychology can shed light on educational processes framed by the complex internationalized societies in which we live today Part I offers theoretical chapters about ethnography and examples of innovative ethnography from particular perspectives In Part II the emphasis is on the application of ethnographic approaches to educational settings Each contribution not only takes the reader on a thoughtful and enlightening journey but raises issues that are important to both educators and ethnographers including the relationship of researcher to subject the meaning of participant in participant observation and ways to give voice to disenfranchised players and on the complex ways in which all parties experience identities such as race in the modern world Innovations in Educational Ethnography Theory Methods and Results is a product of both continuity and change It presents current writings from mentors in the field of ethnography and education as well of the work of their students and of educators engaged in cultural studies of their work In many ways it provides fresh new vistas on the old questions that have always guided ethnographic research and can be used as a survey both of what ethnography has been and what it is becoming This book is the work of many hands and provides excellent examples of trends in both basic and applied ethnography of education These two kinds of work augment and reinforce each other and also represent important current research directions in depth reflection on the process of ethnography itself and an application of its insights to teaching and learning in schools universities and communities No one philosophy guides the contributions to this volume nor were they chosen as exemplary of a particular approach yet foundational understandings and principles of ethnography shine through the work in both predictable and unexpected ways **Fictions of Feminist Ethnography** Kamala Visweswaran,1994

Theories Bridging Ethnography and Evaluation Melissa Rae Goodnight,Rodney Hopson,2024-11-29 Theories Bridging Ethnography and Evaluation the first of two volumes examines connections between ethnography and evaluation in educational spaces wrestling with pressing justice issues while elucidating three themes transformative intersectional and comparative for guiding contemporary inquiry committed to realizing equity **Confronting Margaret Mead** Lenora Foerstel,1994-07-28 The legendary Margaret Mead changed Americans views of themselves by relating information collected

from remote peoples to our society a society that she did not consider necessarily to be the pinnacle of human development. However, Mead and her followers have been criticized for promulgating sensationalized and inaccurate images of Melanesian societies including savagery, cannibalism, and wanton sexuality. This book deals with the consequences of such Western condescension. Destined to be highly controversial, this book for the first time brings a multicultural outlook to bear on Margaret Mead, scrutinizing her role and impact on Western anthropology, colonialism, and strategic and business interests in the South Pacific. The contributors, most of them avowedly activist supporters of the concept of a nuclear free and independent Pacific, include Warilea Iamo, Papua New Guinea's first anthropologist; John D. Waiko, Director of the New Guinea Institute of Applied Social and Economic Research; Nahau Rooney, the daughter of one of Mead's informants; and Susanna Ounei, a leader of a New Caledonian independence front. Author note: Lenora Foerstel is an instructor in Ethnohistory at the Maryland College of Art. She was a member of the 1953 American Museum of Natural History Expedition to Manus Island led by Dr. Margaret Mead. Angela Gilliam teaches at Evergreen State College in Olympia, Washington. She has served as adviser to the Papua New Guinea Permanent Mission to the United Nations on New Caledonia.
