Reinventing The Cuban Sugar Agroindustry:

Reinventing the Cuban Sugar Agroindustry Jorge F. Pérez-López, Jose Alvarez, 2005-01-01 The demise of the international socialist community led to a loss in preferential markets for Cuban sugar industry In response to the current crisis this volume gathers over a dozen recognized world experts on Cuban agroindustry to analyze specific topics and make recommendations that would reinvent the industry for effective transition to a free market environment *Reinventing the Cuban Sugar Agroindustry* Jorge F. Pérez-López, Jose Alvarez, 2005 One of the key issues that faces Cuban policymakers today and will continue to face them is what steps to take in order to ensure the future of the sugar industry In 2002 nearly one half of the country s cultivated land was occupied by the 156 fully functional sugar mills more than a dozen plants and refineries and the complex transportation infrastructure brought about by the commerce The loss of preferential markets for Cuban sugar that arose from the demise of the international socialist community constitutes a crisis that the Cuban government has only begun to address with a radical restructuring plan that would foresee the reduction of sugar land and the elimination of about 100 000 jobs for increased economic emphasis on tourism The radical premise of this volume is that there is a future in the twenty first century for a reinvented Cuban sugar agroindustry responsive to market signals organized around smaller and more agile production units producing raw sugar as well as high value added outputs and using some of the facilities to produce ethanol and generate electricity The editors have asked over a dozen recognized world experts on Cuban agroindustry to analyze specific topics and make recommendations that would not only reinvent an industry for effective transition to a free market environment but that has the potential to reinvigorate the Cuban economy providing employment opportunities and generating wealth for generations of Cubans to come **Reinventing the Cuban Sugar Agroindustry** Jorge F. Pérez-López, Jose Alvarez, 2005 The editors have gathered more than a dozen recognized world experts on the Cuban agroindustry to analyze specific topics and make recommendations which not only reinvent an industry for effective transition to a free market environment but also may reinvigorate the Cuban economy providing employment opportunities and generating wealth for generations of Cubans to come BOOK JACKET *Cuba* Jorge Salazar-Carrillo, 2017-09-29 This book is a study of Cuba s economic development under communism over the last fifty five years The authors find that Cuba s socioeconomic development has gone backward since the Cuban Revolution in 1959 The authors conclude that Fidel Castro s revolution has been an economic disaster for Cuba The book first outlines Cuba s economic position prior to the revolution It reviews Cuba s rankings with respect to Gross Domestic Product GDP per capita in the 1950s and examines the strength of pre Castro Cuba s foreign reserves and the health of its monetary system It also presents pre Castro Cuba s investments in health care and education and documents the island s development potential in the 1950s The last few chapters describe the precipitous decline in all of these areas of Cuba s economy under Castro Despite the socioeconomic catastrophe of the Castro years the authors envision a post Castro Cuba where this book can

provide a benchmark to measure the developmental success that the Cuban work ethic and entrepreneurial spirit can generate in a free market system

Cuba's Energy Future Jonathan Benjamin-Alvarado, 2010-11-01 Approaching an uncertain future without Fidel Castro and still reeling from a downturn at the end of the cold war Cuba must act decisively to improve its economy and living conditions One of the major challenges facing the impoverished island nation is securing access to energy resources that are sufficient to meet the needs of its revitalization and development goals What steps can Cuba take to achieve both short and long term energy sustainability and self sufficiency In this timely analysis Jonathan Benjamin Alvarado and his colleagues answer that question Cuba's Energy Future sets the geostrategic context within which Cuba is operating The book provides an overview of the evolving relations among Caribbean states and explains why Cuba and its longtime nemesis the United States should look for ways to cooperate on developing energy resources The possible role of oil companies is explored as is Cuba's energy relationship with Hugo Chavez's Venezuela The second section of Cuba's Energy Future features economic and technical appraisals economic projections and trends affecting Cuba's energy needs including oil and natural gas potential the country's antiquated electric power sector and the role of biofuels such as sugarcane ethanol The concluding section focuses on the conditions necessary for and the mutual benefits of greater cooperative engagement with the United States Contributors Juan A B Belt Chemonics International formerly USAID Jonathan Benjamin Alvarado University of Nebraska Omaha and University of Georgia Amy Myers Jaffe Rice University Jorge R Piñ Florida International University Ronald Soligo Rice University

Handbook of Contemporary Cuba Mauricio A. Font, Carlos Riobo, 2015-11-17 Cuban studies is a highly dynamic field shaped by the country's distinctive political and economic circumstances Mauricio A Font and Carlos Riobo offer an up to date and comprehensive survey offering the latest research available from a broad array of disciplines and perspectives The Handbook of Contemporary Cuba brings contributions from leading scholars from the United States Cuba Europe and other world regions and introduces the reader to the key literature in the field in relation to rapidly changing events on the island and in global political and economic affairs It also addresses timely developments in Cuban civil society and human rights The guide also

presents economic models and forecasts as well as analyses of the recent pivotal Sixth Congress of the Communist Party of Cuba For students scholars and experts in government it is a vital addition to any collection on Latin American studies or global politics That Infernal Little Cuban Republic Lars Schoultz,2011-02-01 Lars Schoultz offers a comprehensive chronicle of U S policy toward the Cuban Revolution Using a rich array of documents and firsthand interviews with U S and Cuban officials he tells the story of the attempts and failures of ten U S administrations to end the Cuban Revolution He concludes that despite the overwhelming advantage in size and power that the United States enjoys over its neighbor the Cubans historical insistence on their right to self determination has been a constant thorn in the side of American administrations influenced both U S domestic politics and foreign policy on a much larger stage and resulted in a freeze in diplomatic relations of unprecedented longevity **Embedding Agricultural Commodities** Willem van

Schendel,2016-06-17 Over the past 500 years westerners have turned into avid consumers of colonial products and various production systems in the Americas Africa and Asia have adapted to serve the new markets that opened up in the wake of the European encounter The effects of these transformations for the long term development of these societies are fiercely contested How can we use historical source material to pinpoint this social change This volume presents six different examples from countries in which commodities were embedded in existing production systems tobacco coffee sugar and indigo in Indonesia India and Cuba to shed light on this key process in human history To demonstrate the effectiveness of using different types of source material each contributor presents a micro study based on a different type of historical source a diary a petition a mail report a review a scientific study and a survey As a result the volume offers insights into how historians use their source material to construct narratives about the past and offers introductions to trajectories of agricultural commodity production as well as much new information about the social struggles surrounding them

Itineraries of Expertise Andra B. Chastain,Timothy W. Lorek,2020-03-10 *Itineraries of Expertise* contends that experts and expertise played fundamental roles in the Latin American Cold War While traditional Cold War histories of the region have examined diplomatic intelligence and military operations and more recent studies have probed the cultural dimensions of the conflict the experts who constitute the focus of this volume escaped these categories Although they often portrayed themselves as removed from politics their work contributed to the key geopolitical agendas of the day The paths traveled by the experts in this volume not only traversed Latin America and connected Latin America to the Global North they also stretch traditional chronologies of the Latin American Cold War to show how local experts in the early twentieth century laid the foundation for post World War II development projects and how Cold War knowledge of science technology and the environment continues to impact our world today These essays unite environmental history and the history of science and technology to argue for the importance of expertise in the Latin American Cold War **Ecological Crisis and Cultural Representation in Latin America** Mark Anderson,Zélia M. Bora,2016-10-04 Worldwide environmental crisis has become

increasingly visible over the last few decades as the full scope of anthropogenic climate change manifests itself and large scale natural resource extraction has expanded into formerly remote areas that seemed beyond the reach of industrialization. Scientists and popular culture alike have turned to the term Anthropocene to capture the global scale of environmental and even geological transformations that humans have carried out over the last two centuries. The chapters in *Ecological Crisis and Cultural Representation in Latin America* examine the dynamics and interplay between local cultures and the expansion of global capitalism in Latin America, emphasizing the role of art in bearing witness to and generating awareness of environmental and social crises but also its possibilities for formulating solutions. They take particular care to draw out the ways in which local environmental crises in Latin American nations are witnessed and imagined as part of a global system, focusing on the problems of time scale and complexity as key terms in conceiving the dimensions of crisis. At the same time, they question the notion of the Anthropocene as a species wide human historical project, making visible the coloniality of natural resource extraction in Latin America and its dire effects for local people, cultures and environments. Taking an ecocritical approach to Latin American cultural production including literature, film, performance and digital artwork, the chapters in this volume develop a notion of ecological crisis that captures not only its documentary sense in the representation of environmental destruction, the degradation of the *oikos*, but also the crisis in the modern worldview, logos, that the acknowledgment of crisis provokes. In this sense, crisis is also the promise of a turning point of the possibilities for change. Latin American representations of ecological crisis thus create the conditions for projects that decolonize environments, developing new sustainable ways of conceiving of and relating to our world or returning to old ones.

Contemporary Cuba Hope Bastian, Philip Brenner, John M. Kirk, William M. LeoGrande, 2023-08-15. This completely revised and updated edition of *Contemporary Cuba* focuses on Cuba since Raúl Castro stepped down as president in 2018. The book offers a comprehensive description and analysis of contemporary Cuban politics, economy, international relations and society. All but two of the twenty-seven articles were written expressly for this volume in a style accessible for a broad audience. Ideally suited for students and general readers seeking to understand this small yet still influential country, the book includes a substantive introduction setting the historical context as well as introductions to each topical section and a chronology of events since 2014. Pat[is]iorkovskiĭ, 2006-01-01. *Measuring Social and Economic Change in Rural Russia* is based upon nine household surveys in seven rural regions of Russia from 1991 to 2003.

including a four wave panel study over an eight year period The findings that O'Brien and Patsiorkovsky share in this important work are the only long term indicators of how ordinary people have learned to adapt to an economic system that was thrust upon them when the Soviet Union collapsed Three main themes are explored the relationship between formal and informal institutional change regional responses to reforms and the impact of household labor social networks and community involvement and physical capital on inequality in material social and psychological conditions This comprehensive study's conceptual and interdisciplinary approach will appeal to anyone interested in the transition of countries from socialist to market economies

Rural Transition in Azerbaijan Zvi Lerman, David Sedik, 2010-02-15 In 1995-96 the President of Azerbaijan Heydar Aliyev launched a program of agrarian reforms that caused a sweeping and irreversible shift from Soviet style collective agriculture to individual farming in his country These reforms led to an impressive recovery and substantial productivity improvements in agriculture The agrarian transition in Azerbaijan contrasts with that in Russia Ukraine and Kazakhstan where land privatization has been accompanied by policies encouraging the persistence of large corporate farms and where agricultural recovery has been much less impressive For this reason Azerbaijan is today viewed as one of the few examples of successful land reform in the former Soviet Union The impact of the Aliyev agrarian reforms went far beyond the recovery of agricultural production The new policies had a significant impact on rural poverty and they were instrumental in increasing the incomes of Azerbaijan's large rural population which relies on agriculture for a substantial part of the family budget To understand the successes and limitations of land reform *Rural Transition in Azerbaijan* evaluates the record of rural reforms focusing on policy change farm level performance and the impact of reforms on rural incomes and rural family well being issues that today are at the core of the agenda in many international organizations

Dragons with Clay Feet? Max Spoor, Nico Heerink, Futian Qu, 2007-02-16 *Dragons with Clay Feet* presents state of the art research on the impact of ongoing and anticipated economic policy and institutional reforms on agricultural development and sustainable rural resource in two East Asian transition and developing economies China and Vietnam The contributions to this volume focus on the regional and sectoral impact of transformational policies farm household decision making under a changing economic and institutional environment and potential trade offs between agricultural growth and sustainable land management in the two countries The analysis of household responses to economic policies and changing institution and their implications for agricultural production and sustainable resource use in East Asian transition economies is a relatively new research field This collection by a group of Chinese Vietnamese and international researchers reflect the rapid progress that is being made in this important research field

Russia's Agriculture in Transition Zvi Lerman, 2008-01-01 This book explores the development of factor markets in Russian agriculture during the transition to a market economy identifying the impact of existing constraints on agricultural growth

Portela, 2009-07-06 This accessible book offers a vivid geographic portrait of Cuba exploring the island's streetscapes sugar cane fields beaches and rural settlements its billboards government buildings and national landmarks The authors illuminate how natural and built landscapes have shaped Cuban identity *cubanidad* and vice versa They provide a unique perspective on Cuba's distinct historical periods and political economies from the colonial period through republicanism and today's socialist era Compelling topics include the legacies of slavery and the sugar industry the past and future of urban development and the impact of islandness on sociocultural processes **Socialist States and the Environment** Salvatore Engel-Di Mauro, 2021-07-20 More than thirty years after the collapse of the USSR the critique of state socialism is still used to deny alternatives to capitalism irrespective of global capitalist ecological and social devastation There is seemingly nothing worthwhile salvaging from decades of state socialist experiences As the climate crisis deepens Engel Di Mauro argues that we need to re-evaluate the environmental practices and policies of state socialism especially as they had more environmentally beneficial than destructive effects Rather than dismissing state socialism's heritage out of hand we should reclaim it for contemporary eco-socialist ends By means of a comparative and multiple scaled approach Engel Di Mauro points to highly diverse and environmentally constructive state socialist experiences Taking the reader from the USSR to China and Cuba this is a fiery and contentious look at what worked what didn't and how we can move towards an eco-socialist future
