Judson Dance Theater Ramsay Burt, 2006-09-27 The Judson Dance Theatre explores the work and legacy of one of the most influential of all dance companies which first performed at the Judson Memorial Church in downtown Manhattan in the early 1960s There a group of choreographers and dancers including future well known artists Twyla Tharp Carolee Schneemann Robert Morris Trisha Brown Yvonne Rainier and others created what came to be known as postmodern dance Taking their cues from the experiments of Merce Cunningham they took movements from everyday life walking running gymnastics to create dances that influenced not only future dance work but also minimalism in music and art as well as the wedding of dance and speech in solo performance pieces Judson s legacy has been explored primarily in the work of dance critic Sally Banes in a book published in the 1980s Although the dancers from the so called

Judson School continue to perform and create new works and their influence continues to grow from the US to Europe and beyond there has not been a book length study in the last two decades that discusses this work in a broader context of cultural trends Burt is a highly respected dance critic and historian who brings a unique new vision to his study of the Judson dancers and their work which will undoubtedly influence the discussion of these seminal figures for decades to come

Sensing Sound Nina Sun Eidsheim,2015-11-19 In *Sensing Sound* Nina Sun Eidsheim offers a vibrational theory of music that radically re envisions how we think about sound music and listening Eidsheim shows how sound music and listening are dynamic and contextually dependent rather than being fixed knowable and constant She uses twenty first century operas by Juliana Snapper Meredith Monk Christopher Cerrone and Alba Triana as case studies to challenge common assumptions about sound such as air being the default medium through which it travels and to demonstrate the importance a performance s location and reception play in its contingency By theorizing the voice as

an object of knowledge and rejecting the notion of an a priori definition of sound Eidsheim releases the voice from a constraining set of fixed concepts and meanings In Eidsheim s theory music consists of aural tactile spatial physical material and vibrational sensations This expanded definition of music as manifested through material and personal relations suggests that we are all connected to each other in and through sound Sensing Sound will appeal to readers interested in sound studies new musicology contemporary opera and performance studies Dionysus and Apollo after Nihilism Carlos A. Segovia, Sofya Shaikut Segovia, 2023-02-17 This book recovers Dionysus and Apollo as the twin conceptual personae of life s dual rhythm in an attempt to redesign contemporary theory through the reciprocal affirmation of event and form earth and world dance and philosophy It revisits Heidegger and L vi Strauss and combines them with Roy Wagner with the purpose of moving beyond Nietzsche s manifold legacy including post structuralism new materialism and speculative realism It asks whether merging philosophy and anthropology around issues of comparative ontologies may give us a chance to re become earthbound dwellers on a re worlded earth **PAJ** ,2005
