Treating the Body in Medicine and Religion John J. Fitzgerald,Ashley John Moyse,2019-05-09 Modern medicine has produced many wonderful technological breakthroughs that have extended the limits of the frail human body However much of the focus of this medical research has been on the physical often reducing the human being to a biological machine to be examined understood and controlled This book begins by asking whether the modern medical milieu has overly objectified the body unwittingly or not and whether current studies in bioethics are up to the task of restoring a fuller understanding of the human person In response various authors here suggest that a more theological religious approach would be helpful or perhaps even necessary Presenting specific perspectives from Judaism Christianity and Islam the book is divided into three parts Understanding the Body Respecting the Body and The Body at the End of Life A panel of expert contributors including philosophers physicians and theologians and scholars of religion answer key questions such as What is the relationship between body and soul What are our obligations toward human bodies How should medicine respond to suffering and death The resulting text is an interdisciplinary treatise on how medicine can best function in our societies Offering a new way to approach the medical humanities this book will be of keen interest to any scholars with an interest in contemporary religious perspectives on medicine and the body

The Great Physician's Rx for Heartburn and Acid Reflux Jordan Rubin,Joseph Brasco,

Medicine and Religion c.1300 Joseph Ziegler,1998-07-09 This book takes a fresh look at the cultural role of medicine among learned people around 1300 It was at this time that learned medicine came to be fully incorporated into the academic system and began to win greater social acceptance Joseph Ziegler argues that physicians and clerics did not

confine the role of medicine to its physical therapeutic function and that fusion rather than disjunction characterized the relationship between medicine and religion at that time Much of this argument relies on language analysis and on a close study of unedited manuscript sources By juxtaposing the spiritual writings and the medical output of two learned physicians Arnau de Vilanova c 1238 1311 and Galvano da Levanto fl 1300 Dr Ziegler shows that they saw a medical purpose namely to ensure the spiritual health of their audience and to reveal the mysteries of God and creation When entering the spiritual realm both brought to it a medical framework and extended their medical knowledge and curative activities from body to soul By examining preachers manuals and sermons the author suggests that a growing tendency emerged among clerics in general and preachers in particular to appropriate current medical knowledge for spiritual purposes and to substantiate their extensive use of medical metaphors analogies and exempla by citing specific medical authorities **The Publishers**
