Introduction to Saint Helena Gilad James, PhD, Saint Helena is an isolated volcanic island in the South Atlantic Ocean located approximately 1 200 miles west of the coast of Africa The island was discovered by the Portuguese in 1502 and was later occupied by the British in 1659 becoming an important British outpost during the 19th century Saint Helena is known for being the final resting place of the exiled Napoleon Bonaparte who was exiled on the island from 1815 until his death in 1821 Today the island is a British Overseas Territory with a population of approximately 4 000 inhabitants Despite its remote location Saint Helena has a rich history and culture The island's isolation has contributed to the development of a distinct culture and language known as Saint's English which is a mixture of English Portuguese and African dialects In addition to Napoleon's tomb the island is also home to a number of historic landmarks including the Jacob's Ladder staircase which has 699 steps and the 16th century Plantation House which serves as the residence of the island's governor Today Saint Helena's economy is largely dependent on tourism as visitors come to explore the island's natural beauty and rich history
