Second Hand Renaissance:

The Hidden Ireland - A Study of Gaelic Munster in the Eighteenth Century Daniel Corkery, 1979-12-01 Daniel Corkery's classic book *The Hidden Ireland* is a study of Irish language poetry and culture in eighteenth century Munster. The *Hidden Ireland* of the title is literary Ireland. Corkery's famous book is an attempt to reclaim Munster's Irish language poets from the hands of grammarians who read them only for their preposition and participle use and to restore them to their rightful place as vibrant and vital lyricists and visionaries. *The Hidden Ireland* an instant classic when first published in 1924 was listed as one of the top 50 most influential Irish books in *The Books That Define Ireland* by Tom Garvin and Bryan Fanning. *The Hidden Ireland* was revolutionary in its recognition of the contribution of Irish language poets to Irish culture a contribution that had previously been minimised or even erased in the Anglo Irish versions of history that preceded it. Corkery's groundbreaking study of Irish poetry and culture in eighteenth century Munster is widely acknowledged as having had a profound influence on the shaping of modern Anglo Irish literature in its foregrounding of the role of the Irish language in literature as a repository of Irishness and a specifically Irish worldview. Daniel Corkery's *The Hidden Ireland* 1924 arguing for an Irish cultural revival based on the Gaelic tradition of Munster in the eighteenth century became almost official dogma after 1924 and led to impassioned debate among Irish writers and academics for decades afterwards including Sean O Faolain and Frank O'Connor. Corkery's rebellious students Tom Garvin and Bryan Fanning *The Books That Define Ireland* 2014. *Sale-catalogues of Second-hand Books on Sale by Henry Sotheran & Co* Sotheran, Henry and Co, 1871. **The Chautauquan**, 1893. **College Writing Skills** Peder Jones, Jay Farness, 2002-10. *College Writing Skills* uses explanation, demonstration and practice to teach skills essential to success in college writing. For this course Peder Jones and Jay Farness have constructed a framework of rhetoric work in composing paragraphs and essays around disciplined study of sentences and words. The authors have sought in each section of the book to combine the most useful features of contemporary and traditional approaches to college English. Their overall aim is to enable the beginning college writer to compose clear and effective sentences, paragraphs and compositions. This new edition of *College Writing Skills* is a refinement of the four previous editions; it has been shaped by helpful comments from students and instructors who have used the course. Exercises have been updated and many minor changes for clarity have been made. Basic features of this text have not changed, however. As a hybrid of textbook and workbook, it continues to stress focused practice leading to directed independent composing activities; it emphasizes student writing rather than students reading about writing. This emphasis translates into more than 500 sets of exercises, more than 100 optional workshop activities and an Appendix covering special problems in the acquisition of English. The exercises in this textbook embody our belief that practice is crucial to improving one's writing skills. Accordingly, this text provides practice in forming ideas, in getting ideas out of one's head and onto paper, in experimenting with various sentence structures in order to achieve clarity in following models of correct grammar and

effective style and in making the writing process pay off through effective revision and editing A Collegiate Press book

Steele,2012-02-17 The discovery of a gradual acceleration in the moon's mean motion by Edmond Halley in the last decade of the seventeenth century led to a revival of interest in reports of astronomical observations from antiquity These observations provided the only means to study the moon's secular acceleration as this newly discovered acceleration became known This book contains the first detailed study of the use of ancient and medieval astronomical observations in order to investigate the moon's secular acceleration from its discovery by Halley to the establishment of the magnitude of the acceleration by Richard Dunthorne Tobias Mayer and J r me Lalande in the 1740s and 1750s Making extensive use of previously unstudied manuscripts this work shows how different astronomers used the same small body of preserved ancient observations in different ways in their work on the secular acceleration In addition this work looks at the wider context of the study of the moon's secular acceleration including its use in debates of biblical chronology whether the heavens were made up of ether and the use of astronomy in determining geographical longitude It also discusses wider issues of the perceptions and knowledge of ancient and medieval astronomy in the early modern period This book will be of interest to historians of astronomy astronomers and historians of the ancient world

Clothing and Identity in Early Modern Rome Camilla Annerfeldt, 2024-12-12 This is the first book length exploration of the clothes worn in early modern Rome and provides novel insights into the city of Rome during one of its most fascinating periods It also challenges the notion well established in dress historical research on the early modern period that one was supposed to dress solely according to one's social station as Camilla Annerfeldt explores in great depth this notion does not always seem to have been applicable to early modern Rome because of its very constitution Using a range of primary sources from the Roman archives as well as texts of early modern writers Clothing and Identity in Early Modern Rome presents a vivid account of the history of an early modern society which will be helpful to historians of fashion society politics material culture and art as well as everyone interested in the period when Rome was one of the dominant centres of Europe culturally socially and politically The Legacy of Rome
