

THE SECOND NUCLEAR AGE

Strategy, Danger, and the
New Power Politics

"The questions Mr. Bracken raises about the sustainability of current American foreign policy thinking are particularly timely.... We are once again in a world where nuclear weapons count."

Second Nuclear Age:

The Second Nuclear Age Colin S. Gray, 1999 The author takes issue with the complacent belief that a happy mixture of deterrence arms control and luck will enable humanity to cope adequately with weapons of mass destruction arguing that the risks are ever more serious The Second Nuclear Age Paul Bracken, 2012-11-13 Drawing on years of experience analyzing defense strategy the author advocates for renewed U S attention to nuclear weapons and discusses how their presence will transform the way crises develop and escalate *Deterrence in the Second Nuclear Age* Keith B. Payne, 2021-10-21 Keith Payne begins by asking Did we really learn how to deter predictably and reliably during the Cold War He answers cautiously in the negative pointing out that we know only that our policies toward the Soviet Union did not fail What we can be more certain of in Payne s view is that such policies will almost assuredly fail in the Second Nuclear Age a period in which direct nuclear threat between superpowers has been replaced by threats posed by regional rogue powers newly armed with chemical biological or nuclear weapons The fundamental problem with deterrence theory is that it posits a rational hence predictable opponent History frequently demonstrates the opposite Payne argues that as the one remaining superpower the United States needs to be more flexible in its approach to regional powers **Strategy in the Second Nuclear Age** Toshi Yoshihara, James R. Holmes, 2012-12-01 A second nuclear age has begun in the post Cold War world Created by the expansion of nuclear arsenals and new proliferation in Asia it has changed the familiar nuclear geometry of the Cold War Increasing potency of nuclear arsenals in China India and Pakistan the nuclear breakout in North Korea and the potential for more states to cross the nuclear weapons threshold from Iran to Japan suggest that the second nuclear age of many competing nuclear powers has the potential to be even less stable than the first Strategy in the Second Nuclear Age assembles a group of distinguished scholars to grapple with the matter of how the United States its allies and its friends must size up the strategies doctrines and force structures currently taking shape if they are to design responses that reinforce deterrence amid vastly more complex strategic circumstances By focusing sharply on strategy that is on how states use doomsday weaponry for political gain the book distinguishes itself from familiar net assessments emphasizing quantifiable factors like hardware technical characteristics and manpower While the emphasis varies from chapter to chapter contributors pay special heed to the logistical technological and social dimensions of strategy alongside the specifics of force structure and operations They never lose sight of the human factor the pivotal factor in diplomacy strategy and war *Strategic Stability in the Second Nuclear Age* Gregory D. Koblentz, 2022 Asia in the Second Nuclear Age Gaurav Kampani, 2017-11-15

The Second Nuclear Age Paul Bracken, 2012-11-13 A leading international security strategist offers a compelling new way to think about the unthinkable The cold war ended more than two decades ago and with its end came a reduction in the threat of nuclear weapons a luxury that we can no longer indulge It s not just the threat of Iran getting the bomb or North Korea doing something rash the whole complexion of global power politics is changing because of the reemergence of

nuclear weapons as a vital element of statecraft and power politics In short we have entered the second nuclear age In this provocative and agenda setting book Paul Bracken of Yale University argues that we need to pay renewed attention to nuclear weapons and how their presence will transform the way crises develop and escalate He draws on his years of experience analyzing defense strategy to make the case that the United States needs to start thinking seriously about these issues once again especially as new countries acquire nuclear capabilities He walks us through war game scenarios that are all too realistic to show how nuclear weapons are changing the calculus of power politics and he offers an incisive tour of the Middle East South Asia and East Asia to underscore how the United States must not allow itself to be unprepared for managing such crises Frank in its tone and farsighted in its analysis *The Second Nuclear Age* is the essential guide to the new rules of international politics **Strategic Asia 2013-14** Ashley J. Tellis, Abraham M. Denmark, Travis

Tanner, 2013-09-25 *The 2013 14 Strategic Asia* volume examines the role of nuclear weapons in the grand strategies of key Asian states and assesses the impact of these capabilities both established and latent on regional and international stability In each chapter a leading expert explores the historical strategic and political factors that drive a country's calculations vis a vis nuclear weapons and draws implications for American interests *Strategic Stability in the Second Nuclear Age* Gregory D. Koblentz, 2014-11-01

The world has entered a second nuclear age shaped by rising nuclear states and military technologies Gregory Koblentz argues that the United States should work with the other nuclear armed states to manage threats to nuclear stability in the near term and establish processes for multilateral arms control efforts over the longer term

The Second Nuclear Age Colin S. Gray, Lynne Rienner Publishers, 1999 **Special Issue**, 2003 *The Global Third Nuclear Age* Andrew Futter, Ludovica Castelli, Cameron Hunter, Olamide Samuel, Francesca Silvestri, Benjamin

Zala, 2025-01-17 This book provides an in depth examination of the technological geopolitical and normative pressures driving the world into a new more complex and potentially more dangerous Third Nuclear Age By adopting an innovative framework for analysis the book challenges the constrained focus of much of the existing literature by explaining that the pathways to nuclear security for different actors across the globe will vary considerably in this new context It argues that the Third Nuclear Age will be defined by friction and conflict between Nuclear Traditionalists Technological Transformers Hedgers and Balancers and Activists and Protestors as different interests and visions of the nuclear future clash The book draws on dozens of interviews and non English language sources to provide a global approach and looks at the security politics driving the political debate in 20 different countries across the globe This book will be of much interest to students of nuclear politics security studies and International Relations The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license *Fire In the East* Paul Bracken, 2010-12-14 On May 11 1998 India began testing nuclear weapons The world

will never be the same The Indian test of five atomic bombs and the Pakistani tests that answered a few weeks later marked

the end of the arms control system that has kept the world from nuclear war for half a century As Paul Bracken professor of management and political science at Yale University explains in this landmark study they signal the reemergence of something the world hasn't seen since the sixteenth century modern technologically adept military powers on the mainland of Asia In *Fire in the East* Professor Bracken reveals several alarming trends and secrets such as how close Israel actually came to a germ warfare attack during the Gulf War why globalization will spur the development of weapons of mass destruction how American interests are endangered by Asian nationalism and how to navigate what he names the second nuclear age *Fire in the East* is a provocative account of how the Western monopoly on modern arms is coming to an end and how it will forever transform America's role on the stage of international politics

Ensuring Strategic Stability in the Second Nuclear Age Robert Ewers, 2016 This research paper argues the United States must seek a balanced systems approach to ensure strategic stability in a nuclear multiplicity environment among its nuclear armed peers near peers and nonpeers The paper first analyzes what strategic stability meant during the Cold War and identifies common elements of strategic stability strategies In the second part the paper recalculates strategic stability for the 21st century The second part begins with asserting strategic stability remains a relevant strategy for the United States in the contemporary nuclear armed world Then the concept of stability is redefined among the three categories of nuclear actors the United States must balance in the second nuclear age nuclear armed peers near peers and nonpeers Finally using the common strategic stability elements identified in the first part of the paper and applying them systematically to the new stability framework the paper presents a balanced posture to ensure strategic stability during the second nuclear age Abstract

Indian Foreign Policy in a Unipolar World Harsh V. Pant, 2020-11-29 India's foreign policy out of the structural confines of the Cold War strategic framework has become more expansive in defining its priorities over the last few years With the rise of its economic and military capabilities and strategic interests India has shaped a diplomacy that is much more aggressive in the pursuit of those interests Tracing the trajectory of India's foreign policy in the 21st century this book examines the factors that have shaped the Indian response towards this emerging international security environment Including a new Afterword this updated volume looks at the major influences that have shaped India's foreign policy in recent years in the context of its engagements with strategically important regions across the globe and its relations with major global powers The volume will prove invaluable to those studying politics and international relations diplomatic and political history defence and military studies and South Asian studies

South Asia's Nuclear Security Bhumitra Chakma, 2014-12-17 South Asia is often viewed as a potential nuclear flashpoint and a probable source of nuclear terrorism But how valid are such perceptions This book seeks to address this question and assesses the region's nuclear security from two principal standpoints First it evaluates the robustness of the Indo Pakistani mutual deterrence by analysing the strength and weaknesses of the competing arguments regarding the issue It also analyses the causes and consequences of nuclear arms race between India and Pakistan the

nature of deterrence structure in the region and the challenges of confidence building and arms control between the two countries in order to assess the robustness of South Asia's nuclear deterrence. Second, it assesses the safety and security of the nuclear assets and nuclear infrastructure of India and Pakistan. The author holds that the debate on South Asia's nuclear security is largely misplaced because the optimists tend to overemphasise the stabilising effects of nuclear weapons and the pessimists are too alarmists. It is argued that while the risks of nuclear weapons are significant, it is unlikely that India and Pakistan will give up their nuclear arsenals in the foreseeable future. Therefore, what needs to happen is that while nuclear elimination should be the long-term goal, in the interim years the two countries need to pursue minimum deterrence policies to reduce the likelihood of deterrence failure and the possibility of obtaining fissile materials by non-state actors.

The US Arsenal in the Second Nuclear Age Brian Brooks, 2008

Nuclear Deterrence in the Second Nuclear Age John Ashok Varadarajan, 2000

The New Nuclear Age Ankit Panda, 2025-01-31

The world is entering a new nuclear age. Nuclear weapons are returning to the fore of international statecraft in ways unseen since the Cold War. With major powers like Russia issuing threats of nuclear strikes, China and North Korea continuing to grow their arsenals, and new prospects for proliferation from the Middle East to East Asia, the world has been thrust into a new era of heightened nuclear risk. In this incisive book, international security expert Ankit Panda explores the enduring and emerging factors that are contributing to this new nuclear age. From strained great power ties to complex multipolar dynamics and the precipitous decline of arms control, he shows how our coexistence with the bomb is becoming more complicated and perilous. The prospect of nuclear escalation is again shaping how political decision makers and military establishments around the world think and act. But unlike the peril of the Cold War, a greater number of nuclear players and a plethora of new technologies, including AI and exotic new weapons, make the search for stability far from straightforward. Managing the risks of a nuclear confrontation, he argues, will require new urgency and thinking to pull us back from the precipice of global catastrophe.

Deterring the Unthinkable Christopher M Stone, 2020-07-19

Since the end of the Cold War, thinking about space deterrence at the nuclear threshold has been virtually ignored as unrealistic and unthinkable. However, with the advent of a second nuclear age where multiple players are now finding renewed utility in thermonuclear weapons coupled with proliferated missile technology and space access, the former concepts of escalation control and recent concepts like space mission assurance and resilience may not be sufficient to deter nuclear threshold space deterrence scenarios propagated by rogue states. Using comparative analysis and theory testing methodology, this research will explore the history of United States posture and thoughts regarding space and nuclear deterrence with an alternative framework for space deterrence: a tiered, tailored framework. A more tailored approach based upon strategic, cultural, and behavioral analysis behind force postures of offensive space superiority and damage limitation capability enable a more flexible and survivable posture for Tier 1 space deterrence in the second nuclear age.
