State 1915 1953      **Fertility, Family Planning and Population Policy in China** Chiung-Fang Chang, Che-Fu Lee, Sherry L. McKibben, Dudley L. Poston, Carol S. Walther, 2005-12-16 China's one child population policy first initiated in 1979 has had an enormous effect on the country's development. By reducing its fertility in the past two decades to less than two children per woman and developing a family planning program focused heavily on sterilization and abortion, China has undergone a significant transition in status to a demographically developed country. Bringing together contributions from leading academics, this book looks at the impact of the government's strict control over planning and population growth on the family, the wider society, and the country's demography. The contributors examine developments such as family planning policy and contraceptive use, biological and social determinants of fertility patterns, of family and marriage, and China's future population trends. As such, it will be essential reading for academics, researchers, policy makers, and government officials with an interest in China's population policy.

**Family Planning in China** Karen Hardee-Cleaveland, Judith Banister, 1988      Nationalizing Sex Richard Togman, 2019-02-13 Government sponsored breeding programs, medals of motherhood, forced abortions, and surgical sterilization on park benches—all of these policies have come out of government efforts to nationalize sex and harness procreation as a tool of the state. Over 170 countries or 85% of governments worldwide have active policies designed to manipulate the fertility of their citizenry with the aim of influencing the rate of growth of their populations. While over 90% of least developed states are trying to combat population growth with policies designed to reduce fertility, over two thirds of all developed countries are actively crafting legislation to increase their populations. Despite over a hundred years of relative failure and innumerable studies questioning the viability and utility of government attempts to manipulate the fertility rate of the population as a whole, the majority of governments worldwide continue to uphold and develop such policies. What drives government to try to control how many children people will have? *Nationalizing Sex* traces why population emerged as an object of governance and how natalist policy has changed over time and place using case studies from France, Germany, Russia, India, and China. It analyzes the origins, growth, and development of fertility as a national and international political issue, the rise and fall of the narratives used to ascribe meaning to natality, and the global proliferation of oddly similar policies adopted by widely dissimilar states. As importantly, it explains why, after hundreds of years, countries continue to pursue natalist policy even though it has been such a widespread failure.

**Infertility around the Globe** Marcia Inhorn, Frank van Balen, 2002-05-30 This exceptional collection of essays breaks new ground by examining the global impact of infertility as a major reproductive health issue, one that has profoundly affected the lives of countless women and men. Based on original research by seventeen internationally acclaimed social scientists, it is the first book to investigate the use of

reproductive technologies in non Western countries Provocative and incisive it is the most substantial work to date on the subject of infertility With infertility as the lens through which a wide range of social issues is explored the contributors address a far reaching array of topics why infertility has been neglected in population studies how the deeply gendered nature of infertility sets the blame squarely on women s shoulders how infertility and its treatment transform family dynamics and relationships and the distribution of medical and marital power The chapters present informed and sophisticated investigations into cultural perceptions of infertility in numerous countries including China India the nations of sub Saharan Africa Vietnam Costa Rica Egypt Israel the United States and the nations of Europe Poised to become the quintessential reference on infertility from an international social science perspective Infertility around the Globe makes a powerful argument that involuntary childlessness is a complex phenomenon that has far reaching significance worldwide
