Castles, Battles, & Bombs Jurgen Brauer, Hubert van Tuyl, 2024-05-31 Castles Battles and Bombs reconsiders key episodes of military history from the point of view of economics with dramatically insightful results For example when looked at as a question of sheer cost the building of castles in the High Middle Ages seems almost inevitable though stunningly expensive a strong castle was far cheaper to maintain than a standing army The authors also reexamine the strategic bombing of Germany in World War II and provide new insights into France's decision to develop nuclear weapons Drawing on these examples and more Brauer and Van Tuyl suggest lessons for today's military from counterterrorist strategy and military manpower planning to the use of private military companies in Afghanistan and Iraq In bringing economics into assessments of military history the authors also bring illumination The authors turn their interdisciplinary lens on the mercenary arrangements of Renaissance Italy the wars of Marlborough Frederick the Great and Napoleon Grant's campaigns in the Civil War and the strategic bombings of World War II The results are invariably stimulating Martin Walker Wilson Quarterly This study is serious creative important As an economist I am happy to see economics so professionally applied to illuminate major decisions in the history of warfare Thomas C Schelling Winner of the 2005 Nobel Prize in Economics

A Savage War Williamson Murray, Wayne Wei-Siang Hsieh, 2018-05-22 How the Civil War changed the face of war The Civil War represented a momentous change in the character of war It combined the projection of military might across a continent on a scale never before seen with an unprecedented mass mobilization of peoples Yet despite the revolutionizing aspects of the Civil War its leaders faced the same uncertainties and vagaries of chance that have vexed combatants since the days of Thucydides and the Peloponnesian War A Savage War sheds critical new light on this defining chapter in military history In a masterful narrative that propels readers from the first shots fired at Fort Sumter to

the surrender of Robert E Lee's army at Appomattox Williamson Murray and Wayne Wei-siang Hsieh bring every aspect of the battlefield vividly to life They show how this new way of waging war was made possible by the powerful historical forces unleashed by the Industrial Revolution and the French Revolution yet how the war was far from being simply a story of the triumph of superior machines Despite the Union's material superiority a Union victory remained in doubt for most of the war Murray and Hsieh paint indelible portraits of Abraham Lincoln Ulysses S Grant William Tecumseh Sherman and other major figures whose leadership judgment and personal character played such decisive roles in the fate of a nation They also examine how the Army of the Potomac the Army of Northern Virginia and the other major armies developed entirely different cultures that influenced the war's outcome A military history of breathtaking sweep and scope A Savage War reveals how the Civil War ushered in the age of modern warfare

Americans have long been fascinated by the Civil War, marveling at the size of the battles, the leadership of the generals, and the courage of the soldiers. Since the war's start over 150 years ago, the battles have been subjected to endless debate among historians and the generals themselves. The Civil War was the deadliest conflict in American history, and had the two sides realized it would take 4 years and inflict over a million casualties, it might not have been fought. Since it did, however, historians and history buffs alike have been studying and analyzing the biggest battles ever since. The secession of the South was one of the seminal events in American history, but it also remains one of the most controversial. The election of Abraham Lincoln was the impetus for secession, but that was merely one of many events that led up to the formation of the Confederacy and the start of the Civil War. On December 20, a little more than a month after Lincoln had been elected the 16th president, a convention met in Charleston and passed the first ordinance of secession by one of the United States, declaring: "We the people of the State of South Carolina in convention assembled do declare and ordain that the Union now subsisting between South Carolina and other States under the name of the United States of America is hereby dissolved." In January 1861, Mississippi, Florida, Alabama, Georgia, Louisiana, and Kansas followed South Carolina's lead, and the Confederate States of America was formed. On February 4 in Montgomery, Alabama, with former Secretary of War Jefferson Davis inaugurated as its President, a few weeks later Texas joined. The Confederacy's hope of being let go in peace ended at 4:30 a.m. on the morning of April 12, 1861, when Confederate Brigadier General P. G. T. Beauregard ordered the first shots to be fired at the federal garrison defending Fort Sumter in the Charleston Harbor, effectively igniting the Civil War. For nearly 36 hours, Beauregard's Confederates unleashed a general bombardment from 43 guns and mortars positioned at various points across the Harbor. Unable to effectively reply or defend themselves, Major Robert Anderson raised the white flag early in the afternoon of April 13, bringing the first battle of the Civil War to a close. No casualties were suffered on either side during the dueling bombardments across Charleston Harbor, but ironically two U.S. Army soldiers were killed by an accidental explosion during the surrender ceremonies. After Fort Sumter, the Lincoln Administration pushed for a quick invasion of Virginia with the intent of defeating Confederate forces and marching toward the Confederate capitol of Richmond. Lincoln pressed Irvin McDowell to push forward. Despite the fact that McDowell knew his troops were inexperienced and unready, pressure from the Washington politicians forced him to launch a premature offensive against Confederate forces in Northern Virginia.
