The Logic of Metaphor Eric Steinhart, 2013-06-29 1 Metaphors and Logic Metaphors are among the most vigorous offspring of the creative mind but their vitality springs from the fact that they are logical organisms

in the ecology of language I aim to use logical techniques to analyze the meanings of metaphors My goal here is to show how contemporary formal semantics can be extended to handle metaphorical utterances What distinguishes this work is that it focuses intensely on the logical aspects of metaphors I stress the role of logic in the generation and interpretation of metaphors While I don't presuppose any formal training in logic some familiarity with philosophical logic the propositional calculus and the predicate calculus is helpful Since my theory makes great use of the notion of structure I refer to it as the structural theory of metaphor STM STM is a semantic theory of metaphor if STM is correct then metaphors are cognitively meaningful and are non-trivially logically linked with truth I aim to extend possible worlds semantics to handle metaphors I'll argue that some sentences in natural languages like English have multiple meanings Juliet is the sun has at least two meanings the literal meaning Juliet is the sun and the metaphorical meaning Juliet is the sun MET Each meaning is a function from possible worlds to truth values I deny that these functions are identical I deny that the metaphorical function is necessarily false or necessarily true
