Secondary and Functional Rhinoplasty Rodolphe Meyer, 1988

Secondary Rhinoplasty Rodolphe Meyer, 2012-12-06

Secondary Rhinoplasty begins with the basic anatomy of the nose that often predetermines which technique is possible and which is realistic. Each region of the nose and its particular anatomy is analyzed and explained as a specific unit and as part of the total aspect of management. Reconstruction of the nose biologic deteriorations, tumors, the effects of aging and associated congenital abnormalities are also dealt with. Nothing of substance has been left out and yet the primary value of this text is the presentation of the most optimal surgical methods of correction.

Mastering Advanced Rhinoplasty

Wolfgang Gubisch, 2017-11-10. This clearly structured and beautifully illustrated atlas which includes numerous high quality pre intra and postoperative pictures documents the techniques employed in order to deal with the problems typically encountered following a previous failed rhinoplasty. Each chapter also contains a description of the authors standard procedure for treating the problem in question and describes the precautions to be taken in order to avoid similar failures.

The techniques covered include extracorporeal and total septal reconstruction, reconstruction of the over resected tip, the sliding technique for reduction of the over projected tip, the use of alloplastic fascia or alternatively free diced cartilage for camouflaging or volume augmentation and saddle nose correction. Mastering Advanced Rhinoplasty will be of value to both novice and experienced practitioners seeking to achieve the best results for patients who frequently present with challenging problems.
