book examines the social origins career expectations and first jobs of 28 000 students in the elitist French secondary schools of the 1860s Using sophisticated statistical analysis as well as conventional historical sources the work concludes that schooling reached a wider audience than has been so far believed and that substantial social mobility occurred within the school system but that family background rather than educational factors directed students career aspirations and achievements It also argues that although education expanded in urban industrialized areas mobility did not increase in these areas A final chapter reconsiders nineteenth century thought concerning education in the light of findings about the social effects of schools

**Fundamental Change** Michael Fullan, 2007-12-29 ANDY HARGREAVES Department of Teacher Education Curriculum and Instruction Lynch School of Education Boston College MA U S A ANN LIEBERMAN Carnegie Foundation for the Advancement of Teaching Stanford U S A MICHAEL FULLAN Ontario Institute for Studies Education University of Toronto Canada DAVID HOPKINS Department for Education and Slalls London U K This set of four volumes on brings together evidence and insights on educational change issues from leading writers and researchers in the field from across the world Many of these writers whose chapters have been specially written for these books have been investigating helping initiate and implementing educational change for most or all of their lengthy careers Others are working on the cutting edge of theory and practice in educational change taking the field in new or even more challenging directions And some are more skeptical about the literature of educational change and the assumptions on which it rests They help us to approach projects of understanding or initiating educational change more deeply reflectively and realistically Educational change and reform have rarely had so much prominence within public policy in so many different places Educational change is ubiquitous It figures large in Presidential and Prime Ministerial speeches It is at or near the top of many National policy agendas Everywhere educational change is not only a policy priority but also major public news Yet action to bring about educational change usually exceeds people s understanding of how to do so effectively

**Diversity and Change** John Ahier, Ben Cosin, Margaret Hales, 2013-12-16 It is not only the UK education system which has recently undergone a process of change although it has certainly been one of the most dramatically affected Free market conceptions have played their part in these changes particularly throughout the European Union This collection therefore focuses on the economic and social contexts for education both in the UK and internationally and how these have had an impact on the education systems of different countries The authors write from a wide range of standpoints some supportive and some critical of the new paradigms but all focus on the traditions which have been subjected to ideological attacks and in the processes and outcomes

of those attacks
