Secondary Predication And Adverbial Modification The Typology Of Depictives:

Secondary Predication and Adverbial Modification Nikolaus Himmelmann, Eva Schultze-Berndt, 2005 This book approaches depictive secondary predication from a crosslinguistic perspective It maps out all the phenomena and brings together critical surveys and new contributions on their morphosyntactic and semantic properties Provided by publisher

Perspectives on Secondary Predication Marcel den Dikken, Hideki Kishimoto, 2024-07-01 The topic of secondary predication has attracted much attention especially in the generative literature The present volume distinguishes itself from previous volumes on this topic in that all chapters discuss current issues in the syntax and semantics of secondary predication in the languages of Europe including the Indo European languages English Dutch French and Spanish as well as Hungarian a Finno Ugric language and the languages of Asia including Japanese Chinese and Korean from formal linguistic perspectives This book brings to light important new results in and directions for research on secondary predication Adverbs Karin Pittner, Daniela Elsner, Fabian Barteld, 2015-09-15 Adverbs as a word class are notoriously difficult to define The volume deals with the delimitation of this category its internal structure the morphological make up of adverbs and their positions in syntactic structures A closer look at diachronic developments sheds light on the characteristics of adverbial word formation Taking into account adverbs in German English Dutch French and Italian the contributions to this volume provide new insights into the characteristics of this heterogeneous and multi faceted category and will be of interest to linguists working in the fields of morphology syntax and language change **A Grammar of Lopit** Jonathan Moodie, Rosey

Billington, 2020-09-25 In *A Grammar of Lopit* Jonathan Moodie and Rosey Billington provide the first detailed description of Lopit an Eastern Nilotic language traditionally spoken in the Lopit Mountains in South Sudan Drawing on extensive primary data the authors describe the phonology morphology and syntax of the Lopit language Their analyses offer new insights into phenomena characteristic of Nilo Saharan languages such as Advanced Tongue Root vowel distinctions tripartite number

marking and marked nominative case systems and they uncover patterns which are previously unattested within the Eastern Nilotic family such as a three way contrast in aspect number marking with the greater singular and two kinds of inclusory constructions This book offers a significant contribution to the descriptive and typological literature on African languages

The Oxford Handbook of Ergativity Jessica Coon,Diane Massam,Lisa deMena Travis,2017-07-13 This volume offers theoretical and descriptive perspectives on the issues pertaining to ergativity a grammatical patterning whereby direct objects are in some way treated like intransitive subjects to the exclusion of transitive subjects This pattern differs markedly from nominative accusative marking whereby transitive and intransitive subjects are treated as one grammatical class to the exclusion of direct objects While ergativity is sometimes referred to as a typological characteristic of languages research on the phenomenon has shown that languages do not fall clearly into one category or the other and that ergative characteristics are not consistent across languages Chapters in this volume look at approaches to ergativity within generative typological and functional paradigms as well as approaches to the core morphosyntactic building blocks of an ergative construction related constructions such as the anti passive related properties such as split ergativity and word order and extensions and permutations of ergativity including nominalizations and voice systems The volume also includes results from experimental investigations of ergativity a relatively new area of research A wide variety of languages are represented both in the theoretical chapters and in the 16 case studies that are more descriptive in nature attesting to both the pervasiveness and diversity of ergative patterns

Grammatical theory: From transformational grammar to constraint-based approaches (Fifth revised edition) Stefan Müller,2023-01-23 This book introduces formal grammar theories that play a role in current linguistic theorizing Phrase Structure Grammar Transformational Grammar Government Binding Generalized Phrase Structure Grammar Lexical Functional Grammar Categorical Grammar Head Driven Phrase Structure Grammar Construction Grammar Tree Adjoining Grammar The key assumptions are explained and it is shown how the respective theory treats arguments and adjuncts the active passive alternation local reorderings verb placement and fronting of constituents over long distances The analyses are explained with German as the object language The second part of the book compares these approaches with respect to their predictions regarding language acquisition and psycholinguistic plausibility The nativism hypothesis which assumes that humans possess genetically determined innate language specific knowledge is critically examined and alternative models of language acquisition are discussed The second part then addresses controversial issues of current theory building such as the question of flat or binary branching structures being more appropriate the question whether constructions should be treated on the phrasal or the lexical level and the question whether abstract non visible entities should play a role in syntactic analyses It is shown that the analyses suggested in the respective frameworks are often translatable into each other The book closes with a chapter showing how properties common to all languages or to certain classes of languages can be captured

Grammatical theory Stefan Müller,2018 This

book introduces formal grammar theories that play a role in current linguistic theorizing: Phrase Structure Grammar, Transformational Grammar, Government Binding, Generalized Phrase Structure Grammar, Lexical Functional Grammar, Categorical Grammar, Head Driven Phrase Structure Grammar, Construction Grammar, Tree Adjoining Grammar. The key assumptions are explained and it is shown how the respective theory treats arguments and adjuncts, the active/passive alternation, local reorderings, verb placement and fronting of constituents over long distances. The analyses are explained with German as the object language. The second part of the book compares these approaches with respect to their predictions regarding language acquisition and psycholinguistic plausibility. The nativism hypothesis which assumes that humans possess genetically determined innate language specific knowledge is critically examined and alternative models of language acquisition are discussed. The second part then addresses controversial issues of current theory building such as the question of flat or binary branching structures being more appropriate, the question whether constructions should be treated on the phrasal or the lexical level and the question whether abstract non-visible entities should play a role in syntactic analyses. It is shown that the analyses suggested in the respective frameworks are often translatable into each other. The book closes with a chapter showing how properties common to all languages or to certain classes of languages can be captured. With this critical yet fair reflection on various grammatical theories, Müller fills what has been a major gap in the literature.

Karen Lehmann, *Zeitschrift für Rezensionen zur germanistischen Sprachwissenschaft* 2012: Stefan Müller's recent introductory textbook *Grammatiktheorie* is an astonishingly comprehensive and insightful survey of the present state of syntactic theory for beginning students.

Wolfgang Sternefeld und Frank Richter, *Zeitschrift für Sprachwissenschaft* 2012: This is the kind of work that has been sought after for a while. The impartial and objective discussion offered by the author is particularly refreshing.

Werner Abraham, *Germanistik* 2012: Agreement Beyond the Verb Marina Chumakina, Oliver Bond, Steven Kaye, 2024-02-22. This book explores unusual patterns of agreement, one of the most intriguing and theoretically challenging aspects of human language. The chapters provide detailed treatments of a wide range of rare and complex agreement phenomena in seven typologically diverse languages.

New Perspectives in Mayan Linguistics Heriberto Avelino, 2010-08-11. *New Perspectives in Mayan Linguistics* is a collection of papers synthesizing the research on Mayan languages at the beginning of the 21st century. One of the most prominent features of the articles included in this book is the balance between the use of the most recent linguistic theories and the empirical data from which analyses are drawn. A definitive characteristic of the book is that all of the papers provide rich and new descriptive material gathered in the field by their respective authors. The findings reported in this book have implications for a deeper understanding not only of particular aspects of the individual grammars of the Mayan family but might have consequences for linguistic theory as well as for typological and universal generalizations. The volume brings together linguists of diverse areas of specialization: phonetics, phonology, syntax, semantics, epigraphy, lexicography and anthropological linguistics to discuss recent analyses and

data from a variety of Mayan languages For its broad scope summarizing the recent methodologies theoretical models and findings of research in Mayan languages the volume is of particular interest to the academic community at large including researchers teachers and students alike

Beyond Aspect Doris L. Payne,Shahar Shirtz,2015-12-15 Certain grammatical elements help hearers know how propositions are conceptually related Does a given proposition advance the foregrounded event line or not Initiate versus continue an event chain Indicate that one proposition belongs to a different mental space from the previous one Provide background information Studies in this volume show that African languages sometimes support but often refute the idea that perfective aspect or past tense marks the narrative event line Rather languages may employ clause level constructions conjunctions or connectives tonal melodies on verbs or subjects specialized auxiliaries special verb forms and even dependent clause and imperfective aspect forms Often correlation of such grammatical elements with the event line is a subcase of a more general function Analyses in this volume contribute to developing a typology of the expression of discourse functions a field of research which has so far been minimally addressed from a typological perspective

Multi-verb Constructions Alexandra Aikhenvald,Pieter Muysken,2010-12-17 One of the most complex topics in the study of the indigenous languages of the Americas and indeed in the study of any language set is the complex behaviour of multi verb constructions In many languages several verbs can co occur in a sentence forming a single predicate This book contains a first survey of such constructions in languages of North Middle and South America Though it is not a systematic typological survey the combined insights from the various chapters give a very rich perspective on this phenomenon involving a host of typologically diverse constructions including serial verb constructions auxiliaries co verbs phasal verbs incorporated verbs etc Aikhenvald s long introduction puts the chapters into a single perspective

Recent Trends and Findings in Latin Linguistics Concepción Cabrillana,2024-05-20 These volumes contain a selection of contributions first presented at the 21st International Colloquium on Latin Linguistics held in Santiago de Compostela 2022 They cover essential topics in Latin linguistics from a variety of theoretical and methodological approaches The first volume includes papers on Latin Syntax and Semantics Latin Syntax and Pragmatics Greek Latin language and Digital Linguistics The contributions report on the latest research into very relevant issues in specific areas such as definiteness casual syntax sentence structure word order etc in addition the most recent methodological advances using a variety of databases a key tool in contemporary research are presented The second volume includes papers on Semantics and Lexicography Etymology Discourse strategies and a special section devoted to the analysis of Conversation and Dialogue The contributions report on the latest research into highly relevant issues in specific areas such as nominal and adjectival lexicology from both a synchronic and a diachronic perspectives the use of Greek words as a vehicle for the expression of philosophical concepts the choice and rendering of various linguistic strategies in direct and indirect discourse etc A particularly innovative section deals with various aspects of conversational language in a number of text types as well as the use of different devices that

contribute to the expression of im politeness by participants in the speech act A knowledge of the work collected in these volumes is essential for all those involved in research in the field of Latin linguistics The Oxford Handbook of Construction Grammar Thomas Hoffmann, Graeme Trousdale, 2013-04-18 This Handbook is the first authoritative reference work solely dedicated to the theory method and applications of Construction Grammar and will be a resource that students and scholars alike can turn to for a representative overview of its many sub theories and applications *Contemporary Linguistic Parameters* Antonio Fabregas, Jaume Mateu, Michael Putnam, 2015-11-19 Parameters have lain at the core of linguistic research in the generative tradition for decades The theoretical questions they have raised are deep and broad this reference text investigates how contemporary linguistics has best tried to answer them This book looks at how parameters might be properly defined and what their locus might be lexical information functional heads the computational system the phonological branch of the grammar What kind of data forms trigger acquisition of a parameter Are parameters necessary or can we study languages without making reference to them The questions looked at are not just theoretical how can a theory of parameters be used to help understand second language acquisition and what contributions can it make to the study of language typology This is the right time to gather all this information dispersed in many different kinds of publications by single authors and groups into one comprehensive volume Semantics - Lexical Structures and Adjectives Claudia Maienborn, Klaus von Stechow, Paul Portner, 2019-02-19 Discover vital research on the lexical and cognitive meanings of words In this exciting book from a team of world class researchers in depth articles explain a wide range of topics including thematic roles sense relation ambiguity and comparison The authors focus on the cognitive and conceptual structure of words and their meaning extensions such as coercion metaphors and metonymies The book features highly cited material available in paperback for the first time since its publication and is an essential starting point for anyone interested in lexical semantics especially where it meets other cognitive and conceptual research Uralic Essive and the Expression of Impermanent State Casper de Groot, 2017-11-15 This volume is the first book length study into the essive a relatively unknown case marker like English as a child It focuses on the distribution of the essive in contemporary Uralic languages with special attention to the opposition between permanent and impermanent state The volume presents large sets of new data and insights into the use of the essive in nineteen Uralic languages on the basis of a typological linguistic questionnaire The typological variation is discussed within the linguistic domains of non verbal main predication secondary predication complementation and manner temporal and circumstantial adverbial phrases The descriptions and analyses are presented in such a way that they are accessible to linguists in general descriptive and theoretical linguists and specialists in Uralic and or linguistic typology The data and approach offer many starting points for further investigations within but also outside the Uralic language family **Reduplication at the Word Level** Haritini Kallergi, 2015-07-24 Contrary to earlier approaches this study suggests that Modern Greek MG is a language that exhibits reduplication in the form of Total Reduplication TR

The analysis addresses the morphosyntactic phonological semantic and pragmatic aspects of the types of TR in MG and the constraints and or preferences of speakers concerning their use The typology of TR focuses on four cross linguistically common meanings functions identified as the intensive the contrastive the distributive and the iterative Part of the analysis of these functional types is based on data that come from two experiments with native speakers the one confirms or refines earlier assumptions on to the relation of the above meanings functions with word classes and semantic features of words the other clarifies the idea of prosodic unity in TR and sheds light into various aspects of the relation of intonation with the interpretation of TR constructions Also the formal and lexical constraints on the use of TR are discussed with respect to the status of TR particularly the grammatical lexical opposition In general TR seems to be a borderline case between grammar and the lexicon and a heterogeneous category in that it involves grammatical pragmatic and lexical construction types However the constructions in question meet highly specific criteria for their status as TR types and the process is productive and considerably regularized rule governed in MG In this sense TR should not be merely taken as a strategy for emphasis but should be systematically represented in grammar textbooks

Noun Phrases in Australian Languages Dana Louagie, 2019-11-18 This book presents a first comprehensive typological analysis of noun phrases in Australian languages covering the domains of classification qualification quantification determination and constituency The analysis is based on a representative sample of 100 languages Among other points the results call into question the classic idea that Australian languages tend to lack phrasal structures in the nominal domain with over two thirds of the languages showing evidence for phrasehood Moreover it is argued that it may be more interesting to typologise languages on the basis of where and how they allow phrasal structure rather than on the basis of a yes no answer to the question of constituency The analysis also shows that a determiner slot can be identified in about half of the languages even though they generally lack classic determiner features like obligatory use in particular contexts or a restriction to one determiner per NP Special attention is given to elements which can be used both inside and beyond determiner slots demonstrating how part of speech and functional structure do not always align The book is of interest to researchers documenting Australian languages as well as to typologists and theorists

Symmetrical Voice and Linking in Western Austronesian Languages Sonja Riesberg, 2014-08-19 This book is an in depth study of the voice systems of Totoli Balinese Indonesian and Tagalog which shows that the symmetrical nature of these systems poses a problem to current linking theories It provides an analysis of symmetrical linking within two grammatical theories LFG RRG and develops a modified LFG linking mechanism that sheds light on the differences as well as the similarities of symmetrical and asymmetrical voice systems
