Justice, Dissent, and the Sublime Mark Canuel,2012-07 Read the Romantics from the perspective of both political theory and literary studies and consider

justice through the lens of the sublime In the past ten years theorists from Elaine Scarry to Roger Scruton have devoted renewed attention to the aesthetic of beauty Part of their discussions claim that beauty because it arises from a sense of proportion symmetry or reciprocity provides a model for justice Justice Dissent and the Sublime makes a significant departure from this mode of thinking Mark Canuel argues that the emphasis on beauty unwittingly reinforces in the name of justice the constraints of uniformity and conventionality He calls for a more flexible and inclusive connection between aesthetics and justice one founded on the Kantian concept of the sublime The sublime captures the roles that asymmetry complaint and disagreement play in a complete understanding of a just society a point the author maintains that was appreciated by a number of Romantic writers including Mary Shelley Canuel draws interesting connections between the debate about beauty and justice and issues in cosmopolitanism queer theory and animal studies

Exploring the Landscape of the Mind Stephen S. Clark,2017-04-19 This book is based on the premise that humankind is first and foremost the outcome of the process of biological evolution Recognition of this is fundamental to our understanding of who we are and how we behave All living things have evolved the physical and mental attributes that promote their prospects for survival they are good at doing the things that enable them to pass on their genes to succeeding generations and we are no exception Of course through the development of culture we have gained some freedom from our biological origins Nevertheless evolution has constructed the foundation upon which culture is built

The first part of the book *Ourselves Interacting with the World* presents an overview of the main capabilities that evolution has endowed us with and that enable us to interact with the environment in advantageous ways This includes our senses which act as windows on the world and also of great importance our emotions and ability to remember Our ability to think is perhaps the crowning achievement of our evolutionary journey and of course we must be able to act in a timely and effective manner The second part of the book *Living Together* traces the history of how we became social creatures To be truly human we had to be capable of sharing and cooperation We also needed to be able to control our aggressiveness and talent for deception We settled down making the transition from hunter gatherers to urban dwellers and agreed upon values and norms of behavior that enhanced our ability to get along Ultimately we came to see good and bad as a morality of right and wrong further augmenting group cohesiveness In the final part of the book *Challenges and Opportunities* attention turns to a consideration of the constraints and possibilities that must be considered in looking to the future These realities can be seen to play out in four social arenas the pursuit of fairness the seeking of justice the interplay of political beliefs and good government and ultimately a united society that is at the same time a true community Our quest for these things will be greatly aided by a deep knowledge and appreciation of our evolutionary past and the indelible imprint it has left upon us It may even lead us to that most elusive of all things happiness

Photographing Mussolini Alessandra Antola
Swan,2020-12-10 This pioneering book offers the first account of the work of the photographers both official and freelance who contributed to the forging of Mussolini's image It departs from the practice of using photographs purely for illustration and places them instead at the centre of the analysis Throughout the 1930s photographs of the Italian dictator Benito Mussolini were chosen with much care by the regime They were deployed to highlight those physical traits the piercing eyes protruding jaw shaved head that were meant to evoke the Duce's strength determination and innate sense of leadership in the mind of his contemporaries The chapters in this volume explore the photographic image in the socio political context of the time and shows how it was a significant contributor to the development of Italian mass culture between the two world wars

Seeing Things Stephen Pattison,2007 Gifford Lectures series 2007 *Seeing Things* is a highly original book that will have appeal across humanity departments including visual studies theology art history sociology anthropology and ethics The book considers in detail the experience of perceiving visual objects from high art to everyday artefacts It looks in particular at the

problems encountered with the ways we in Western culture look upon the world and things and encourages and argues for ways to look and visualise the world more critically broadly and widely Sight is one of the main ways we perceive and relate to the world and yet it is mostly assumed rather than actively reflected on Objects designated as art and the realm of aesthetics attract some active attention and reflection but most of the visible world is ignored in the context of what Pattison describes as our ordinary blindness TM The book argues that the range of things we choose to see and value is arbitrary and limited and the ways in which we relate to things and objects are mostly crude and un nuanced Pattison argues that it is desirable to consider more person like relationships with all manner of visibly perceived objects from classical sculptures to tennis rackets If we begin to apply this person like relationship with things we transgress the Western secular and religious practice and belief that maintains that the realm of the manufactured is dead TM and so can be treated by humans exactly as they wish without consideration Pattison argues that this person like relationship does not mean re animating or re sacramentalising the world rather he argues for observation and exploration of the actual phenomenology of the object
