Hostile armies may face each other for years striving for the victory which is decided in a single day This being so to remain in ignorance of the enemy s condition simply because one grudges the outlay of a hundred ounces of silver in honors and

emoluments is the height of inhumanity Sun Tzu on the utility of intelligence and spying Art of War Chapter 13 World War II

stood apart in many ways from every earlier war not least in the way that it reached to every corner of the planet and

involved a noticeable segment of humanity s collective resources Battles erupted not only on land and the sea s surface as

they had for centuries but also in the ocean depths and the windswept heights of the sky One of the war s most crucial

struggles happened in the realm of the unseen inside the human mind and amid the invisible flow of radio waves Every war is

a battle of wits as intelligence gathering tactics and strategies clash from the level of individual action up to the grand

overarching schemes of generals and statesmen Intelligence took on a freshly urgent aspect in World War II however as the

fate of offensives armies and nations came to hang on the struggle to decrypt vital enemy radio traffic and military

communications During the Second World War cryptography suddenly became a significant factor in warfare because of mid

20th century advances in communications technology With radios small and common enough to be fitted into most individual

vehicles and readily carried in a man portable form information and orders flowed from supreme headquarters to individual

squad leaders tanks and soldiers at the front and back again Complex radio networks connected armies to their other

elements almost like a nervous system making unprecedented tactical and strategic coordination between units hundreds of

miles apart not only possible but swift and in some cases efficient Decrypting these signals or protecting their contents from

enemy spying became one of the touchstones of victory or defeat Information warfare arrived well ahead of the modern

computer and satellite networks The Allies expended much more effort on decrypting Axis codes than the Axis spent

attempting to decipher theirs Standing on the offensive for much of the war the Germans felt less need for code breaking

than the Allies Though they found intelligence useful it had less value to the Wehrmacht s planners who needed only

moderate detail about enemy movements to plan a successful strategy while leaving tactics in the highly capable hands of

small unit leaders trained to take the initiative and react fluidly to the actual battlefield situation Despite the power of the

new technology and its metamorphic effects on warfare cryptography s story during World War II remained a very human

one Allied leaders initially undervalued the worth of such intelligence squandering many opportunities with a hidebound

rejection of the new Over time however they realized cryptography s potential and made full use of the intelligence it reaped
