www.esnips.com/web/forjts When this book was written it was hard to decide on what the title should be I finally reduced my choice to two titles the second one being used as the sub title THE VATICAN CIPHERS If I had not been so sensitive to the economic and social consequences of the Kennedy and Lincoln assassinations this would have been the actual title because more than anything else this is about the early invention of our languages Some of the most important discoveries include the following Religious names and words such as Christ Thomas crucifixion and others were used as roots to invent many of our modern day words but they were originally written phonetically and then hidden away when dictionaries standardized our spelling of words A technique was discovered showing how rootwords and rootnames were used to create other words and ideas and then those ideas and words were used to create detail in short stories especially myths and religious fables of the New Testament Since this technique was not known to exist it fell on me to invent a name for it I named it the ROOTWORD TECHNIQUE Finally I discovered that the alphabet was pictorial or hieroglyphic The wordsmiths who created our vocabulary used the letters as pictures as well as symbols for sounds Profit Pathology and Other Indecencies Michael Parenti, 2015-11-17 From market crisis to market boom from welfare to wealth care from homelessness to helplessness and an all out assault on the global environment these are just some of the indecencies of contemporary economic life that Profit Pathology takes on Here Michael Parenti investigates how class power is a central force in our political life and yet is subjected to little critical discernment He notes how big moneyed interests shift the rules of the game in their favor while unveiling the long march by reactionaries through the nation's institutions to undo all the gains of social democracy from the New Deal to the present Parenti also traces the exploitative economic forces that have operated through much of American history including the mass displacement and extermination of Native Americans and the enslavement of Africans Parenti is a master at demonstrating the impact of monomaniacal profit accumulation on social services especially health care and human values Here he takes us one step further showing how unrestrained capitalism ultimately endangers itself becoming a self devouring beast that threatens us all Finally he calls for a solution based on democratic diversity and public ownership because it works Iron Men and Tin Fish Anthony Newpower, 2006-08-30 From the American entry into World War II until September 1943 U S submarines experienced an abnormally high number of torpedo failures These failures resulted from three defects present in the primary torpedo of the day the Mark XIV These defects were a tendency to run deeper than the set depth the frequent premature detonation of the Mark 6 magnetic influence exploder and the failure of the contact exploder when hitting a target at the textbook ninety degree angle Ironically despite using a completely independent design the Germans experienced the same three defects The Germans however fixed their defects in six months while it took the Americans twenty two months Much of the delay on the American side resulted from the denial of senior leaders in the operational forces and in the Navy's Bureau of Ordnance BuOrd that the torpedo itself was defective Instead they blamed crews for poor marksmanship or lack of training In the end however the submarine force itself overcame the bureaucratic

inertia and correctly identified and fixed the three problems on their own proving once again the industry of the average American soldier or sailor From the American entry into World War II until September 1943 U S submarines experienced an abnormally high number of torpedo failures These failures resulted from three defects present in the primary torpedo of the day the Mark XIV These defects were a tendency to run deeper than the set depth the frequent premature detonation of the magnetic influence exploder and the failure of the contact exploder when hitting a target at the textbook 90 degree angle Ironically despite using a completely independent design the Germans experienced the same three defects The Germans however fixed their defects in six months while it took the Americans 22 months Much of the delay on the American side resulted from the denial of senior leaders in the operational forces and in the Navy s Bureau of Ordnance BuOrd that the torpedo itself was defective Instead they blamed crews for poor marksmanship or lack of training In the end however the submarine force itself overcame the bureaucratic inertia and correctly identified and fixed the three problems on their own proving once again the industry of the average American soldier or sailor Contrary to the interpretations of most submarine historians this book concludes that BuOrd did not sit idly by while torpedoes failed on patrol after patrol BuOrd acknowledged problems from early in the war but their processes and their tunnel vision prevented them from realizing that the weapon sent to the fleet was grossly defective One of World War II s forgotten heroes Admiral Lockwood drove the process for finding and fixing the three major defects This is first book that deals exclusively with the torpedo problem building its case out of original research from the archives of the Bureau of Ordnance the Chief of Naval Operations Vice Admiral Lockwood s personal correspondence and records from the British Admiralty at the National Archives of the United Kingdom These sources are complemented by correspondence and interviews with men who actually participated in the events
